

# CONTENTS

<i>R. Vávra</i> : Welcome to Participants . . . . .	11
<i>J. N. Walton</i> : Some Recent Advances in Muscle Disease . . . . .	13
<i>I. Hausmanowa-Petrusewicz</i> : Nonprogressive Myopathies with Particular Reference to Their Electromyographic Aspect. . . . .	20
<i>P. E. Becker</i> : Non-dystrophic Myotonias (A survey) . . . . .	29
<i>J. M. Schröder, P. E. Becker and E. Kuhn</i> : The T-System and the Sarco- plasmatic Reticulum of the Muscle Fiber in Myotonic Disorders . . . . .	53
<i>E. Kuhn, D. Seiler and J. M. Schröder</i> : Hereditary Myopathies Caused by Specific Enzyme Deficiencies . . . . .	54
<i>L. Steidl and K. Urbánek</i> : Scapulo—Peroneal Syndrome as a Mani- festation of Progressive Muscular Dystrophy . . . . .	67
<i>P. Kocura and J. Vacek</i> : Myothyreoidal Syndrome . . . . .	78
<i>B. P. Hughes</i> : The Significance of some Lipid Changes in Human and Mouse Dystrophy . . . . .	84
<i>H. Moser and H. P. Ludin</i> : Steroid Myopathy in Childhood . . . . .	93
<i>J. Lichý, J. Tichý, J. Štoviček and J. Kopečný</i> : Myodysplasia Fibrosa Multiplex. . . . .	102
<i>V. Kyrál and V. Dušek</i> : Electromyographic Findings in Myodysplasia Fibrosa Multiplex . . . . .	112
<i>J. Lichý, R. Vacek, L. Dobiášová and I. Drašner</i> : Oculopharyngeal Muscular Dystrophy . . . . .	120
<i>A. E. H. Emery</i> : Electrocardiographic Studies in Hereditary Myopathies . . . . .	128
<i>R. Vávra</i> : Intervals of the Electrocardiogram. . . . .	139
<i>D. Rohlena and Z. Nesvadba</i> : ECG Changes in Muscular Dystrophy. . . . .	142
<i>H. Moser, M. Mumenthaler and U. Wiesmann</i> : Clinical, Biochemical and Myopathological Findings in Carriers of Duchenne Type Muscular Dystrophy . . . . .	149
<i>E. Gutmann and V. Hanzlíková</i> : Specific and Unspecific Changes in Muscle Atrophy and Hypertrophy . . . . .	158
<i>Z. Nesvadba, P. Ždánský, J. Sedláček and J. Groh</i> : Mineral and Glycide Metabolism in Blood in Vitro in Progressive Muscular Dystrophy . . . . .	168
<i>V. Kyrál, M. Šercl, V. Dušek and M. Hartmann</i> : Study of Fatigue in Myopathy and Other Muscular and Neural Lesions . . . . .	174
<i>J. C. Dreyfus</i> : Phosphorylases and Phosphorylase Regulation in Diseases. . . . .	183
<i>J. Demos</i> : Early Diagnosis and Treatment of Rapidly Evolving Duchenne de Boulogne Myopathy (DDB I) . . . . .	194

<i>J. Demos</i> : Microcirculation Theory in Myopathy . . . . .	203
<i>F. Citta</i> : Disturbance of the Basic Antigravitational Stereotype in Progressive Muscular Dystrophy . . . . .	212
<i>K. Schellnack</i> : Contribution to Pharmacological Treatment of Progressive Muscular Dystrophy . . . . .	222
<i>W. Taillard</i> : Orthopaedic Treatment of Myopathies . . . . .	230
<i>M. Uher</i> : Indications for Surgical Treatment of Myopathies . . . . .	237
<i>L. Hošková, J. Nesvadbová and V. Petková</i> : Rehabilitation Treatment of Myopathies in Czechoslovak State Spa Janské Lázně. . . . .	240
<i>K. Kazda, V. Veselková, J. Peterková</i> : Educational Problems as an Inseparable Component of the Complex Therapy in Myopathic Children . . . . .	245
<i>J. Ulman and J. Posker</i> : To Be Treated — or to Live? . . . . .	249
<i>K. Trník</i> : Medical Care of Myopathies in ČSSR in View of Myopathies Themselves . . . . .	250
<i>A. Zelenka</i> : Our Experience with Myopathic Patients Hospitalized in Jedlička's Institute in Prague . . . . .	251
<i>G. Nardella</i> : Drug Treatment of Sporadic Myopathies . . . . .	252
<i>P. Kocura and J. Vacek</i> : Polyneuropathy — Myopathy in Chronic Renal Insufficiency with Special View to Patients Classed in the Regular Hemodialysation Programme . . . . .	253
<i>H. Radu, V. Ionescu, P. Nicolescu and A. Radu</i> : Rod-Like Bodies and Type I Fibre Atrophy in Hypotonic Girl . . . . .	255
<i>N. Kaspar, M. Mumenthaler, A. Steiner, N. Wiesman</i> : Regeneration of Tibialis Anterior muscle in Rat after Complete Excision and Reimplantation of muscle Fragment . . . . .	256
<i>E. Stoica and M. Serban</i> : Experimental Research on Vascular Permeability in Muscle Neurogenic Atrophy . . . . .	257
<i>N. L. Artemčuk</i> : Contribution to the Hereditary Problems in Functional Disturbances of CNS in Myopathies . . . . .	258
