

Table of Contents

Chapter 1

- 1 Introduction
- 3 What is typography?
- 3 What is LibreOffice? OpenOffice?
- 5 What is Open Document Format?
- 5 About this book
- 5 About the writer

Chapter 2

- 9 Going in style
- 10 Example: Formatting with styles
- 11 Debunking myths about styles
- 13 Example: Styles save time
- 15 When should you use styles?
- 17 The types of styles
- 19 Working with styles
 - 21 Undocking the Styles and Formatting window
 - 21 Changing the style type
 - 22 Viewing styles
- 24 Finding current styles
- 25 The nature of styles
 - 25 The hierarchy of styles
 - 26 Changing the style hierarchy
 - 26 The Default styles
 - 27 The Organizer tab
- 29 Applying styles
 - 30 Using the Styles and Formatting window
 - 30 Using the Formatting tool bar
 - 31 Using Fill Format Mode
 - 32 Pasting styles
 - 33 Applying styles using keyboard shortcuts
- 34 Creating and modifying styles
 - 36 Hiding and deleting styles
 - 36 Naming styles
 - 37 Automating style application

38 Another way of writing

Chapter 3

39 Recycling using templates

41 When to use templates

41 Example

42 How templates work

42 Linking templates with documents

44 Re-attaching styles

45 Identifying a template

45 Using the Template Manager

47 Planning a template library

48 Example: Assessing template requirements

49 Naming templates

49 Readying templates for use

50 Downloading templates

51 Creating templates with wizards

53 Saving and registering templates

54 Saving multiple templates

54 Setting a new default

55 Storing template structure

56 Using placeholders

57 Using fields in templates

59 Example: Using placeholders & fields

60 Editing templates

61 Deleting templates

61 Exporting templates

61 Changing templates

64 Working with templates in a file manager

66 The complete basics

Chapter 4

67 Fonts, color, and the magic number

68 Finding fonts to use

68 Installing fonts for LibreOffice

69 Choosing fonts in LibreOffice

70 Font families

71 Font styles

- 74 Real fonts vs. manufactured ones
- 75 Selecting fonts by font styles / typefaces
- 77 Font sizes
- 79 Font effects
- 80 Choosing basic fonts
 - 81 Judging fonts
 - 82 Choosing a body font
 - 82 Choosing a heading font
- 83 Other considerations for fonts
- 85 Matching fonts
 - 86 Matching by historical categories
 - 86 Humanist serifs
 - 87 Old Style
 - 87 Transitional
 - 87 Slab serifs
 - 88 Sans serifs
 - 89 Using dummy text to experiment
- 90 Adjusting the page color
 - 91 Setting color through line spacing
 - 93 Contexts for changing color
 - 94 Applying the magic number
- 96 Example: Solving the magic numbers
- 100 An unexpected journey

Chapter 5

- 101 Spacing on all sides
- 102 Preparing to design
- 104 Planning text styles
- 105 Setting vertical line spacing
 - 107 Line spacing at small font sizes
- 108 Spacing between paragraphs
 - 110 Removing unexpected space.
- 110 Avoiding widows and orphans
- 112 Spacing between paragraphs
- 114 Selecting an alignment
 - 115 Using a Justified alignment
 - 116 Setting the last line of justified text
 - 118 Using a Left alignment

- 118 Setting hyphenation
- 120 Setting horizontal spacing
 - 121 Controlling the number of indents
 - 122 Setting first line indentation
- 124 Example: Designing a letter template
- 128 The text style basics

Chapter 6

- 129 Text tools and traps
- 130 Setting borders
 - 131 Adding borders
 - 133 Using borders in character and paragraph styles
- 134 Highlighting and setting backgrounds
 - 136 Using backgrounds in character and paragraph styles
- 136 Setting transparency
- 137 Setting tab stops
 - 139 Using tabs effectively
- 140 Setting up drop capitals
 - 141 Creating drop caps:
- 143 Outlining and making lists
 - 144 Automating lists
 - 145 Restarting paragraph numbering
 - 145 Nesting lists
 - 147 Outlining with paragraph styles
 - 148 Creating outlines with a single paragraph style
 - 149 Adding paragraph styles to outline levels
 - 150 Skipping a paragraph in a list
- 151 Using multiple languages
 - 152 Setting up other language features
- 153 Creating a block quote style
- 154 Preparing styles for HTML
 - 157 Minimizing HTML problems
- 159 Moving beyond practical text

Chapter 7

- 161 Positioning and automating text
- 162 Fine-tuning characters
 - 163 Positioning superscript and subscript

- 165 Aligning different-sized text on one line
- 166 Rotating text
- 168 Adjusting font width
- 169 Adjusting character combinations (kerning)
- 171 Manufacturing small capitals
 - 171 Making your own small caps
- 172 Making line spacing consistent
- 174 Automating with styles
 - 175 Configuring conditional styles
 - 176 Defining conditional styles
 - 178 Setting page breaks by style
 - 178 Automating page breaks
- 180 Single-sourcing by hiding text
 - 181 Choosing a tactic for hiding/showing text
 - 183 Hiding text using styles
 - 184 Hiding text using fields
 - 187 Hiding with sections
 - 187 Automating the use of fields and sections
 - 189 Using sections
- 190 The limits to LibreOffice text design
 - 191 Using the Typographic toolbar

Chapter 8

- 193 Styling the page
 - 194 Understanding layout conventions
 - 195 Applying page styles
 - 196 Automating the next style
 - 197 Planning page styles
 - 198 Designing left and right pages
 - 198 Designing the first page
- 200 Setting the paper format
 - 201 Example: A4/Letter combined template
- 202 Setting layout settings
- 204 Setting margins
 - 205 Choosing margin proportions
 - 206 Considering binding and trimming
- 207 Designing headers and footers
 - 209 Turning on headers and footers

- 209 Choosing tabs or tables
- 209 Formatting headers and footers
 - 210 Adjusting the border and background
 - 211 Adding header and footer paragraph styles
 - 212 Adding content to headers and footers
 - 213 Using running headers and footers
- 215 Making vertical headers and footers
- 216 Setting page numbers
 - 218 Adding chapter numbers to page numbers
 - 218 Setting page number formats
 - 218 Adding chapters in page numbering
 - 219 Restarting page numbers
- 219 Setting up multiple page columns
 - 221 Combining single- and multiple-column layouts
- 221 Setting up footnotes
- 223 Setting the page background
 - 224 Using recurring images
 - 225 Moving in the new dimension

Chapter 9

- 227 Getting in the frame
- 228 How frame styles work
- 229 Understanding pre-defined frames
- 229 Planning frame use
- 230 Preparing images
 - 232 Preparing images in graphics editors
 - 233 Setting image resolutions
 - 234 Using cropping or indicators
 - 235 Setting natural borders
 - 235 Cleaning up the image
- 236 Inserting images
 - 237 Choosing linking or embedding
- 238 Formatting frames and images
 - 239 Resizing frames and images
 - 240 Positioning frames on the page
 - 241 Setting anchors
 - 242 Choosing text wrap
 - 244 Setting white space around a frame

- 244 Developing a white space policy
- 245 Example: Developing a white space policy
 - 246 Setting other wrap options
 - 246 Setting frame and image borders
 - 247 Setting frame backgrounds
 - 247 Setting general options
 - 248 Adding columns
 - 248 Adding hyperlinks and macros
- 249 Adding captions
 - 252 Formatting captions
 - 252 Adding automatic captions
- 253 Making images stay in place
 - 253 Using the Haugland workaround
 - 255 Using the table workaround
- 258 Advanced uses of frames
 - 258 Creating marginalia and sideheads
 - 260 Creating watermarks
 - 262 Setting text flow between frames
 - 264 Troubleshooting the connection of frames
- 264 Working around the problems

Chapter 10

- 265 Structured prose: lists and tables
- 266 Understanding the types of list
 - 266 Understanding bulleted lists
 - 267 Learning the conventions for bullets
 - 269 Understanding numbered lists
 - 269 Learning the conventions of numbered lists
 - 270 Understanding outline lists
- 272 Naming list styles
- 274 Applying list styles
- 274 Formatting list styles
 - 276 Positioning bullets, numbers, and list items
 - 277 Understanding position fields
 - 278 Formatting ordered (numbered) lists
 - 279 Adding characters before and after numbers
 - 280 Setting the character style
 - 281 Working with two-digit list numbers

- 282 Restarting a numbered list
- 282 Reversing number order
- 282 Designing unordered (bulleted) lists
- 284 Example: Making a checklist
 - 285 Using images as bullets
- 287 Example: Repeating graphics using lists
- 287 Setting up and designing tables
 - 288 Planning tables
 - 290 Designing tables
 - 290 Adding a table
 - 292 Editing table parts
 - 293 Adjusting table spacing
 - 294 Adjusting column spacing
 - 295 Adjusting row spacing
 - 295 Setting text flow options
 - 297 Adding spreadsheet behaviors
 - 297 Adding captions
 - 298 Using AutoFormats
 - 299 Creating AutoFormats
- 301 Using tables as workarounds
- 301 New aspects of literacy

Chapter 11

- 303 Styled features and long documents
- 304 Using outline levels
 - 305 Writing an outline
 - 305 Outlining in the Navigator
 - 307 Changing outline levels using the Navigator
 - 307 Moving material using the Navigator
- 308 Using cross-references
 - 309 Cross-referencing within one document
 - 311 Cross-referencing to another file
- 313 Using outline levels in tables and indexes
 - 314 Creating a table of contents
 - 316 Structuring table entries with building blocks
 - 317 Avoiding the default TOC design
 - 321 Adding a chapter number
 - 322 Creating an index

- 322 Adding index entries
- 323 Generating an index
- 324 Creating a concordance
- 326 Creating citations and bibliographies
 - 327 Building citations and bibliographies
 - 330 Preparing bibliographic formats
 - 333 Preparing citations
- 334 Creating footnotes and endnotes
- 334 Using master documents
 - 335 When to use master documents
 - 336 Understanding master documents' contents
 - 336 Navigating master documents
 - 337 Planning master documents
 - 338 Creating master documents
 - 339 Adding cross-references between sub-documents
- 342 Moving beyond Writer

Chapter 12

- 343 Designing and delivering slide shows
 - 343 Why are slide shows boring?
 - 345 Deciding when to use a slide show
 - 347 Designing a presentation
 - 349 Outlining slide shows
 - 351 Making a structural template
 - 352 Designing with master slides
 - 353 Creating master slides
 - 354 Choosing slide backgrounds
 - 355 Finding backgrounds
 - 355 Designing backgrounds
 - 358 Adding footer information
 - 359 Setting Presentation styles
 - 360 Selecting fonts for slides
 - 360 Adjusting lists
 - 361 Setting alignment
 - 361 Setting indents and spacing
 - 362 Setting wrap
 - 362 Deciding on tabs or tables
 - 363 Selecting a slide transition

- 364 Setting slide layouts
 - 365 Adding other elements
- 366 Example: Displaying one line at a time
- 369 Preparing notes and handouts
- 371 Setting presentation options
 - 372 Saving templates
- 372 Delivering a slide show
- 374 Understanding design constraints

Chapter 13

- 375 Designing drawing content
- 376 Learning design principles
- 377 Example: applying design
 - 378 Alignment
 - 379 Contrast
 - 380 Proximity
 - 381 Repetition
- 382 Finding content
- 383 Producing content
 - 385 Understanding dimension lines
 - 385 Understanding text inside a shape
 - 385 Understanding connectors
 - 386 Understanding curves
 - 386 Understanding freeform lines
 - 387 Understanding callouts
 - 388 Understanding points
 - 388 Understanding the Fontwork Gallery
 - 391 Understanding 3D objects
 - 392 Understanding tables
 - 392 Grouping shapes
 - 394 Stacking shapes into other shapes
 - 396 Connecting lines and curves
 - 397 Adding images
 - 398 Designing fills
 - 398 Designing area colors
 - 400 Designing area gradients
 - 403 Designing area hatching
 - 404 Designing area bitmaps

404 Gathering shapes

Chapter 14

405 Drawing Object styles and charts

406 Planning graphic styles

406 Applying graphic styles

407 Formatting drawings

408 Setting line formatting

409 Setting dimension lines

410 Setting connectors

413 Setting area options

414 Setting shadows

415 Setting transparencies

416 Setting text characteristics

417 Using text animation

418 Creating a flow chart

420 Adding charts and graphs

421 Formatting charts

422 Selecting chart types

424 Choosing 2D or 3D

425 Editing graphs and charts

426 Creating a chart

428 Separating analysis and creativity

Chapter 15

429 Spreadsheet design

430 Planning spreadsheets

431 Building lists and data collections

433 Designing spreadsheet lists

434 Exercise: A trip-planning list

435 Designing data collections

437 Exercise: Creating a mark book

438 Adding data and functions

439 Adding spreadsheet tools

440 Hiding and showing the display cells

440 Grouping and outlining cells

441 Filtering data

443 Creating subtotals

- 445 Defining cell content and adding help
- 447 Creating pivot tables
- 450 Deciding on the styles
- 451 Applying spreadsheet styles
- 452 Setting up cell styles
 - 452 Selecting fonts for spreadsheets
 - 453 Selecting borders
 - 453 Selecting backgrounds
 - 453 Setting how numbers are handled
 - 455 Setting alignment
 - 456 Rotating text
 - 458 Adding hyphenation and text wrap
 - 459 Setting cell protection
 - 461 Setting conditional formatting for cells
- 464 Using page styles
 - 465 Printing sheets
 - 466 Scaling spreadsheets
 - 468 Other options
 - 469 Formatting spreadsheets automatically
 - 470 Adding other elements
- 471 Working with conventions

Chapter 16

- 473 Putting everything together
- 474 Checking copy
 - 474 Your favorite things
 - 475 Checking structure
- 477 Checking design
- 477 Positioning objects
- 478 Adjusting hyphenation
- 479 Checking the spelling
- 480 Checking page breaks
 - 481 Problems with master documents
- 482 Updating
- 482 Making the final check

Appendix A

483 Downloading LibreOffice

483 Extensions and templates

Appendix B

485 Learning more about typography

Appendix C

487 Where to get free-licensed fonts

Appendix D

491 Free-licensed equivalents for standard fonts
