## 1. The Debian Project

1.1 What Is Debian? . . . . .	1
1.1.1 A Multi-Platform Operating System . . . . .	2
1.1.2 The Quality of Free Software . . . . .	4
1.1.3 The Legal Framework: A Non-Profit Organization . . . . .	4
1.2 The Foundation Documents . . . . .	5
1.2.1 The Commitment towards Users . . . . .	5
1.2.2 The Debian Free Software Guidelines . . . . .	7
1.3 The Inner Workings of the Debian Project . . . . .	9
1.3.1 The Debian Developers . . . . .	9
1.3.2 The Active Role of Users . . . . .	14
<i>Reporting bugs</i> . . . . .	14
<i>Translation and documentation</i> . . . . .	15
<i>Sending fixes</i> . . . . .	15
<i>Other ways of contributing</i> . . . . .	17
1.3.3 Teams and Sub-Projects . . . . .	18
<i>Existing Debian Sub-Projects</i> . . . . .	18
<i>Administrative Teams</i> . . . . .	19
<i>Development Teams, Transversal Teams</i> . . . . .	21
1.4 Follow Debian News . . . . .	21
1.5 The Role of Distributions . . . . .	23
1.5.1 The Installer: <i>debian-installer</i> . . . . .	23
1.5.2 The Software Library . . . . .	23
1.6 Lifecycle of a Release . . . . .	24
1.6.1 The <i>Experimental</i> Status . . . . .	24
1.6.2 The <i>Unstable</i> Status . . . . .	24
1.6.3 Migration to <i>Testing</i> . . . . .	26
1.6.4 The Promotion from <i>Testing</i> to <i>Stable</i> . . . . .	27
1.6.5 The <i>Oldstable</i> and <i>Oldoldstable</i> Status . . . . .	31

## 2. Presenting the Case Study

2.1 Fast Growing IT Needs . . . . .	33
2.2 Master Plan . . . . .	34
2.3 Why a GNU/Linux Distribution? . . . . .	35
2.4 Why the Debian Distribution? . . . . .	37

2.4.1 Commercial and Community Driven Distributions . . . . .	37
2.5 Why Debian Buster? . . . . .	38
<b>3. Analyzing the Existing Setup and Migrating</b>	<b>41</b>
3.1 Coexistence in Heterogeneous Environments . . . . .	42
3.1.1 Integration with Windows Machines . . . . .	42
3.1.2 Integration with OS X machines . . . . .	42
3.1.3 Integration with Other Linux/Unix Machines . . . . .	42
3.2 How To Migrate . . . . .	43
3.2.1 Survey and Identify Services . . . . .	43
<i>Network and Processes</i> . . . . .	44
3.2.2 Backing up the Configuration . . . . .	45
3.2.3 Taking Over an Existing Debian Server . . . . .	45
3.2.4 Installing Debian . . . . .	46
3.2.5 Installing and Configuring the Selected Services . . . . .	47
<b>4. Installation</b>	<b>51</b>
4.1 Installation Methods . . . . .	52
4.1.1 Installing from a CD-ROM/DVD-ROM . . . . .	52
4.1.2 Booting from a USB Key . . . . .	53
4.1.3 Installing through Network Booting . . . . .	54
4.1.4 Other Installation Methods . . . . .	54
4.2 Installing, Step by Step . . . . .	54
4.2.1 Booting and Starting the Installer . . . . .	54
4.2.2 Selecting the language . . . . .	56
4.2.3 Selecting the country . . . . .	57
4.2.4 Selecting the keyboard layout . . . . .	57
4.2.5 Detecting Hardware . . . . .	58
4.2.6 Loading Components . . . . .	58
4.2.7 Detecting Network Hardware . . . . .	58
4.2.8 Configuring the Network . . . . .	59
4.2.9 Administrator Password . . . . .	59
4.2.10 Creating the First User . . . . .	60
4.2.11 Configuring the Clock . . . . .	61
4.2.12 Detecting Disks and Other Devices . . . . .	61
4.2.13 Starting the Partitioning Tool . . . . .	61
<i>Guided partitioning</i> . . . . .	63
<i>Manual Partitioning</i> . . . . .	65
<i>Configuring Multidisk Devices (Software RAID)</i> . . . . .	66
<i>Configuring the Logical Volume Manager (LVM)</i> . . . . .	67
<i>Setting Up Encrypted Partitions</i> . . . . .	67
4.2.14 Installing the Base System . . . . .	68
4.2.15 Configuring the Package Manager (apt) . . . . .	69
4.2.16 Debian Package Popularity Contest . . . . .	70
4.2.17 Selecting Packages for Installation . . . . .	71

4.2.18 Installing the GRUB Bootloader . . . . .	71
4.2.19 Finishing the Installation and Rebooting . . . . .	72
4.3 After the First Boot . . . . .	73
4.3.1 Installing Additional Software . . . . .	73
4.3.2 Upgrading the System . . . . .	74
<b>5. Packaging System: Tools and Fundamental Principles</b> . . . . .	77
5.1 Structure of a Binary Package . . . . .	78
5.2 Package Meta-Information . . . . .	80
5.2.1 Description: the control File . . . . .	80
<i>Dependencies: the Depends Field</i> . . . . .	81
<i>Conflicts: the Conflicts field</i> . . . . .	83
<i>Incompatibilities: the Breaks Field</i> . . . . .	83
<i>Provided Items: the Provides Field</i> . . . . .	83
<i>Replacing Files: The Replaces Field</i> . . . . .	86
5.2.2 Configuration Scripts . . . . .	86
<i>Installation and Upgrade</i> . . . . .	87
<i>Package Removal</i> . . . . .	87
5.2.3 Checksums, List of Configuration Files . . . . .	89
5.3 Structure of a Source Package . . . . .	90
5.3.1 Format . . . . .	90
5.3.2 Usage within Debian . . . . .	93
5.4 Manipulating Packages with dpkg . . . . .	94
5.4.1 Installing Packages . . . . .	94
5.4.2 Package Removal . . . . .	96
5.4.3 Querying dpkg's Database and Inspecting .deb Files . . . . .	97
5.4.4 dpkg's Log File . . . . .	101
5.4.5 Multi-Arch Support . . . . .	102
<i>Enabling Multi-Arch</i> . . . . .	102
<i>Multi-Arch Related Changes</i> . . . . .	103
5.5 Coexistence with Other Packaging Systems . . . . .	104
<b>6. Maintenance and Updates: The APT Tools</b> . . . . .	107
6.1 Filling in the sources.list File . . . . .	108
6.1.1 Syntax . . . . .	108
6.1.2 Repositories for <i>Stable</i> Users . . . . .	110
<i>Security Updates</i> . . . . .	111
<i>Stable Updates</i> . . . . .	111
<i>Proposed Updates</i> . . . . .	112
<i>Stable Backports</i> . . . . .	112
6.1.3 Repositories for <i>Testing/Unstable</i> Users . . . . .	112
<i>The Experimental Repository</i> . . . . .	113
6.1.4 Using Alternate Mirrors . . . . .	114
6.1.5 Non-Official Resources: mentors.debian.net . . . . .	114
6.1.6 Caching Proxy for Debian Packages . . . . .	115

6.2 aptitude, apt-get, and apt Commands . . . . .	116
6.2.1 Initialization . . . . .	116
6.2.2 Installing and Removing . . . . .	117
6.2.3 System Upgrade . . . . .	120
6.2.4 Configuration Options . . . . .	121
6.2.5 Managing Package Priorities . . . . .	122
6.2.6 Working with Several Distributions . . . . .	124
6.2.7 Tracking Automatically Installed Packages . . . . .	125
6.3 The apt-cache Command . . . . .	126
6.4 The apt-file Command . . . . .	128
6.5 Frontends: aptitude, synaptic . . . . .	129
6.5.1 aptitude . . . . .	129
<i>Managing Recommendations, Suggestions and Tasks</i> . . . . .	131
<i>Better Solver Algorithms</i> . . . . .	132
6.5.2 synaptic . . . . .	132
6.6 Checking Package Authenticity . . . . .	133
6.7 Upgrading from One Stable Distribution to the Next . . . . .	135
6.7.1 Recommended Procedure . . . . .	135
6.7.2 Handling Problems after an Upgrade . . . . .	136
6.7.3 Cleaning Up after an Upgrade . . . . .	137
<i>Packages removed from the Debian Archive</i> . . . . .	138
<i>Dummy and Transitional Packages</i> . . . . .	138
<i>Old or Unused Configuration Files</i> . . . . .	138
<i>Files not owned by any Package</i> . . . . .	139
6.8 Keeping a System Up to Date . . . . .	139
6.9 Automatic Upgrades . . . . .	141
6.9.1 Configuring dpkg . . . . .	141
6.9.2 Configuring APT . . . . .	141
6.9.3 Configuring debconf . . . . .	141
6.9.4 Handling Command Line Interactions . . . . .	141
6.9.5 The Miracle Combination . . . . .	142
6.10 Searching for Packages . . . . .	142
<b>7. Solving Problems and Finding Relevant Information</b> . . . . .	147
7.1 Documentation Sources . . . . .	148
7.1.1 Manual Pages . . . . .	148
7.1.2 info Documents . . . . .	150
7.1.3 Specific Documentation . . . . .	151
7.1.4 Websites . . . . .	151
7.1.5 Tutorials ( <i>HOWTO</i> ) . . . . .	152
7.2 Common Procedures . . . . .	153
7.2.1 Configuring a Program . . . . .	153
7.2.2 Monitoring What Daemons Are Doing . . . . .	154
7.2.3 Asking for Help on a Mailing List . . . . .	155

<b>8. Basic Configuration: Network, Accounts, Printing...</b>	<b>159</b>
8.1 Configuring the System for Another Language . . . . .	160
8.1.1 Setting the Default Language . . . . .	160
8.1.2 Configuring the Keyboard . . . . .	161
8.1.3 Migrating to UTF-8 . . . . .	162
8.2 Configuring the Network . . . . .	163
8.2.1 Ethernet Interface . . . . .	165
8.2.2 Wireless Interface . . . . .	166
<i>Installing the required firmwares</i> . . . . .	166
<i>Wireless specific entries in /etc/network/interfaces</i> . . . . .	167
8.2.3 Connecting with PPP through a PSTN Modem . . . . .	167
8.2.4 Connecting through an ADSL Modem . . . . .	168
<i>Modems Supporting PPPOE</i> . . . . .	168
<i>Modems Supporting PPTP</i> . . . . .	169
<i>Modems Supporting DHCP</i> . . . . .	169
8.2.5 Automatic Network Configuration for Roaming Users . . . . .	169
8.3 Setting the Hostname and Configuring the Name Service . . . . .	170
8.3.1 Name Resolution . . . . .	171
<i>Configuring DNS Servers</i> . . . . .	171
<i>The /etc/hosts file</i> . . . . .	171
8.4 User and Group Databases . . . . .	172
8.4.1 User List: /etc/passwd . . . . .	173
8.4.2 The Hidden and Encrypted Password File: /etc/shadow . . . . .	173
8.4.3 Modifying an Existing Account or Password . . . . .	174
8.4.4 Disabling an Account . . . . .	174
8.4.5 Group List: /etc/group . . . . .	174
8.5 Creating Accounts . . . . .	175
8.6 Shell Environment . . . . .	176
8.7 Printer Configuration . . . . .	178
8.8 Configuring the Bootloader . . . . .	179
8.8.1 Identifying the Disks . . . . .	179
8.8.2 Configuring LILO . . . . .	181
8.8.3 GRUB 2 Configuration . . . . .	182
8.9 Other Configurations: Time Synchronization, Logs, Sharing Access... . . . . .	183
8.9.1 Timezone . . . . .	183
8.9.2 Time Synchronization . . . . .	184
<i>For Workstations</i> . . . . .	185
<i>For Servers</i> . . . . .	185
8.9.3 Rotating Log Files . . . . .	185
8.9.4 Sharing Administrator Rights . . . . .	186
8.9.5 List of Mount Points . . . . .	186
8.9.6 locate and updatedb . . . . .	189

8.10 Compiling a Kernel . . . . .	189
8.10.1 Introduction and Prerequisites . . . . .	189
8.10.2 Getting the Sources . . . . .	190
8.10.3 Configuring the Kernel . . . . .	191
8.10.4 Compiling and Building the Package . . . . .	192
8.10.5 Compiling External Modules . . . . .	192
8.10.6 Applying a Kernel Patch . . . . .	193
8.11 Installing a Kernel . . . . .	194
8.11.1 Features of a Debian Kernel Package . . . . .	194
8.11.2 Installing with dpkg . . . . .	195
<b>9. Unix Services</b>	197
9.1 System Boot . . . . .	198
9.1.1 The systemd init system . . . . .	198
9.1.2 The System V init system . . . . .	204
9.2 Remote Login . . . . .	207
9.2.1 Secure Remote Login: SSH . . . . .	207
<i>Key-Based Authentication</i> . . . . .	208
<i>Using Remote X11 Applications</i> . . . . .	210
<i>Creating Encrypted Tunnels with Port Forwarding</i> . . . . .	210
9.2.2 Using Remote Graphical Desktops . . . . .	211
9.3 Managing Rights . . . . .	213
9.4 Administration Interfaces . . . . .	215
9.4.1 Administrating on a Web Interface: webmin . . . . .	215
9.4.2 Configuring Packages: debconf . . . . .	217
9.5 syslog System Events . . . . .	218
9.5.1 Principle and Mechanism . . . . .	218
9.5.2 The Configuration File . . . . .	219
<i>Syntax of the Selector</i> . . . . .	219
<i>Syntax of Actions</i> . . . . .	219
9.6 The inetd Super-Server . . . . .	220
9.7 Scheduling Tasks with cron and atd . . . . .	221
9.7.1 Format of a crontab File . . . . .	222
9.7.2 Using the at Command . . . . .	224
9.8 Scheduling Asynchronous Tasks: anacron . . . . .	225
9.9 Quotas . . . . .	225
9.10 Backup . . . . .	227
9.10.1 Backing Up with rsync . . . . .	227
9.10.2 Restoring Machines without Backups . . . . .	229
9.11 Hot Plugging: <i>hotplug</i> . . . . .	230
9.11.1 Introduction . . . . .	230
9.11.2 The Naming Problem . . . . .	230
9.11.3 How <i>udev</i> Works . . . . .	230
9.11.4 A concrete example . . . . .	232

**10. Network Infrastructure**

10.1 Gateway . . . . .	238
10.2 X.509 certificates . . . . .	240
10.2.1 Creating gratis trusted certificates . . . . .	240
10.2.2 Public Key Infrastructure: <i>easy-rsa</i> . . . . .	243
10.3 Virtual Private Network . . . . .	247
10.3.1 OpenVPN . . . . .	247
<i>Configuring the OpenVPN Server</i> . . . . .	248
<i>Configuring the OpenVPN Server</i> . . . . .	248
<i>Configuring the OpenVPN Client</i> . . . . .	249
10.3.2 Virtual Private Network with SSH . . . . .	249
10.3.3 IPsec . . . . .	250
10.3.4 PPTP . . . . .	250
<i>Configuring the Client</i> . . . . .	251
<i>Configuring the Server</i> . . . . .	252
10.4 Quality of Service . . . . .	255
10.4.1 Principle and Mechanism . . . . .	255
10.4.2 Configuring and Implementing . . . . .	255
<i>Reducing Latencies: wondershaper</i> . . . . .	255
<i>Standard Configuration</i> . . . . .	256
10.5 Dynamic Routing . . . . .	257
10.6 IPv6 . . . . .	257
10.6.1 Tunneling . . . . .	259
10.7 Domain Name Servers (DNS) . . . . .	259
10.7.1 DNS software . . . . .	260
10.7.2 Configuring bind . . . . .	260
10.8 DHCP . . . . .	263
10.8.1 Configuring . . . . .	263
10.8.2 DHCP and DNS . . . . .	264
10.9 Network Diagnosis Tools . . . . .	265
10.9.1 Local Diagnosis: netstat . . . . .	265
10.9.2 Remote Diagnosis: nmap . . . . .	266
10.9.3 Sniffers: tcpdump and wireshark . . . . .	268

**11. Network Services: Postfix, Apache, NFS, Samba, Squid, LDAP, SIP, XMPP, TURN**

11.1 Mail Server . . . . .	272
11.1.1 Installing Postfix . . . . .	272
11.1.2 Configuring Virtual Domains . . . . .	275
<i>Virtual Alias Domains</i> . . . . .	276
<i>Virtual Mailbox Domains</i> . . . . .	276
11.1.3 Restrictions for Receiving and Sending . . . . .	277
<i>IP-Based Access Restrictions</i> . . . . .	278

<i>Checking the Validity of the EHLO or HELO Commands</i>	279
<i>Accepting or Refusing Based on the Announced Sender</i>	280
<i>Accepting or Refusing Based on the Recipient</i>	281
<i>Restrictions Associated with the DATA Command</i>	282
<i>Applying Restrictions</i>	282
<i>Filtering Based on the Message Contents</i>	282
11.1.4 <i>Setting Up greylisting</i>	283
11.1.5 <i>Customizing Filters Based On the Recipient</i>	285
11.1.6 <i>Integrating an Antivirus</i>	286
11.1.7 <i>Fighting Spam with SPF, DKIM and DMARC</i>	287
<i>Integrating the Sender Policy Framework (SPF)</i>	288
<i>Integrating DomainKeys (DKIM) Signing and Checking</i>	289
<i>Integrating Domain-based Message Authentication, Reporting and Conformance (DMARC)</i>	291
11.1.8 <i>Authenticated SMTP</i>	292
11.2 <b>Web Server (HTTP)</b>	293
11.2.1 <i>Installing Apache</i>	294
11.2.2 <i>Adding support for SSL</i>	295
11.2.3 <i>Configuring Virtual Hosts</i>	295
11.2.4 <i>Common Directives</i>	297
<i>Requiring Authentication</i>	298
<i>Restricting Access</i>	299
11.2.5 <i>Log Analyzers</i>	299
11.3 <b>FTP File Server</b>	301
11.4 <b>NFS File Server</b>	302
11.4.1 <i>Securing NFS</i>	303
11.4.2 <i>NFS Server</i>	303
11.4.3 <i>NFS Client</i>	304
11.5 <b>Setting Up Windows Shares with Samba</b>	305
11.5.1 <i>Samba Server</i>	305
<i>Configuring with debconf</i>	306
<i>Configuring Manually</i>	306
11.5.2 <i>Samba Client</i>	307
<i>The smbclient Program</i>	308
<i>Mounting Windows Shares</i>	308
<i>Printing on a Shared Printer</i>	308
11.6 <b>HTTP/FTP Proxy</b>	309
11.6.1 <i>Installing</i>	309
11.6.2 <i>Configuring a Cache</i>	309
11.6.3 <i>Configuring a Filter</i>	310
11.7 <b>LDAP Directory</b>	311
11.7.1 <i>Installing</i>	311
11.7.2 <i>Filling in the Directory</i>	312
11.7.3 <i>Managing Accounts with LDAP</i>	313

<i>Configuring NSS</i>	313
<i>Configuring PAM</i>	315
<i>Securing LDAP Data Exchanges</i>	316
<b>11.8 Real-Time Communication Services</b>	320
11.8.1 DNS settings for RTC services	320
11.8.2 TURN Server	321
11.8.3 SIP Proxy Server	321
<i>Install the SIP proxy</i>	322
11.8.4 XMPP Server	323
<i>Install the XMPP server</i>	323
<i>Managing the XMPP server</i>	323
11.8.5 Running services on port 443	324
11.8.6 Adding WebRTC	324
<b>12. Advanced Administration</b>	327
<b>12.1 RAID and LVM</b>	328
12.1.1 Software RAID	328
<i>Different RAID Levels</i>	329
<i>Setting up RAID</i>	331
<i>Backing up the Configuration</i>	337
12.1.2 LVM	339
<i>LVM Concepts</i>	339
<i>Setting up LVM</i>	340
<i>LVM Over Time</i>	344
12.1.3 RAID or LVM?	346
<b>12.2 Virtualization</b>	349
12.2.1 Xen	350
12.2.2 LXC	356
<i>Preliminary Steps</i>	357
<i>Network Configuration</i>	357
<i>Setting Up the System</i>	358
<i>Starting the Container</i>	359
12.2.3 Virtualization with KVM	360
<i>Preliminary Steps</i>	361
<i>Network Configuration</i>	361
<i>Installation with virt-install</i>	362
<i>Managing Machines with virsh</i>	364
<i>Installing an RPM based system in Debian with yum</i>	364
<b>12.3 Automated Installation</b>	365
12.3.1 Fully Automatic Installer (FAI)	366
12.3.2 Preseeding Debian-Installer	367
<i>Using a Preseed File</i>	367
<i>Creating a Preseed File</i>	368
<i>Creating a Customized Boot Media</i>	369

12.3.3 Simple-CDD: The All-In-One Solution . . . . .	370
<i>Creating Profiles</i> . . . . .	370
<i>Configuring and Using build-simple-cdd</i> . . . . .	371
<i>Generating an ISO Image</i> . . . . .	372
12.4 Monitoring . . . . .	372
12.4.1 Setting Up Munin . . . . .	372
<i>Configuring Hosts To Monitor</i> . . . . .	373
<i>Configuring the Grapher</i> . . . . .	374
12.4.2 Setting Up Nagios . . . . .	374
<i>Installing</i> . . . . .	375
<i>Configuring</i> . . . . .	375
<b>13. Workstation</b> . . . . .	381
13.1 Configuring the X11 Server . . . . .	382
13.2 Customizing the Graphical Interface . . . . .	383
13.2.1 Choosing a Display Manager . . . . .	383
13.2.2 Choosing a Window Manager . . . . .	383
13.2.3 Menu Management . . . . .	384
13.3 Graphical Desktops . . . . .	385
13.3.1 GNOME . . . . .	385
13.3.2 KDE and Plasma . . . . .	386
13.3.3 Xfce and Others . . . . .	387
13.3.4 Other Desktop Environments . . . . .	388
13.4 Email . . . . .	389
13.4.1 Evolution . . . . .	389
13.4.2 KMail . . . . .	390
13.4.3 Thunderbird . . . . .	390
13.5 Web Browsers . . . . .	391
13.6 Development . . . . .	393
13.6.1 Tools for GTK+ on GNOME . . . . .	393
13.6.2 Tools for Qt . . . . .	393
13.7 Collaborative Work . . . . .	394
13.7.1 Working in Groups: <i>groupware</i> . . . . .	394
13.7.2 Collaborative Work With FusionForge . . . . .	394
13.8 Office Suites . . . . .	395
13.9 Emulating Windows: Wine . . . . .	396
13.10 Real-Time Communications software . . . . .	397
<b>14. Security</b> . . . . .	401
14.1 Defining a Security Policy . . . . .	402
14.2 Firewall or Packet Filtering . . . . .	403
14.2.1 nftables Behavior . . . . .	404
14.2.2 Moving from iptables to nftables . . . . .	406
14.2.3 Syntax of nft . . . . .	408
14.2.4 Installing the Rules at Each Boot . . . . .	409

<b>14.3 Supervision: Prevention, Detection, Deterrence</b>	410
14.3.1 Monitoring Logs with <code>logcheck</code>	410
14.3.2 Monitoring Activity	411
<i>In Real Time</i>	411
<i>History</i>	411
14.3.3 Avoiding Intrusion	412
14.3.4 Detecting Changes	413
<i>Auditing Packages with <code>dpkg --verify</code></i>	413
<i>Auditing Packages: <code>debsums</code> and its Limits</i>	414
<i>Monitoring Files: AIDE</i>	414
14.3.5 Detecting Intrusion (IDS/NIDS)	416
<b>14.4 Introduction to AppArmor</b>	417
14.4.1 Principles	417
14.4.2 Enabling AppArmor and managing AppArmor profiles	417
14.4.3 Creating a new profile	418
<b>14.5 Introduction to SELinux</b>	424
14.5.1 Principles	424
14.5.2 Setting Up SELinux	426
14.5.3 Managing an SELinux System	427
<i>Managing SELinux Modules</i>	427
<i>Managing Identities</i>	428
<i>Managing File Contexts, Ports and Booleans</i>	429
14.5.4 Adapting the Rules	430
<i>Writing a <code>.fc</code> file</i>	430
<i>Writing a <code>.if</code> File</i>	430
<i>Writing a <code>.te</code> File</i>	432
<i>Compiling the Files</i>	435
<b>14.6 Other Security-Related Considerations</b>	435
14.6.1 Inherent Risks of Web Applications	435
14.6.2 Knowing What To Expect	436
14.6.3 Choosing the Software Wisely	437
14.6.4 Managing a Machine as a Whole	438
14.6.5 Users Are Players	438
14.6.6 Physical Security	439
14.6.7 Legal Liability	439
<b>14.7 Dealing with a Compromised Machine</b>	440
14.7.1 Detecting and Seeing the Cracker's Intrusion	440
14.7.2 Putting the Server Off-Line	440
14.7.3 Keeping Everything that Could Be Used as Evidence	441
14.7.4 Re-installing	442
14.7.5 Forensic Analysis	442
14.7.6 Reconstituting the Attack Scenario	443
<b>15. Creating a Debian Package</b>	447

15.1 Rebuilding a Package from its Sources . . . . .	448
15.1.1 Getting the Sources . . . . .	448
15.1.2 Making Changes . . . . .	448
15.1.3 Starting the Rebuild . . . . .	450
15.2 Building your First Package . . . . .	451
15.2.1 Meta-Packages or Fake Packages . . . . .	451
15.2.2 Simple File Archive . . . . .	452
15.3 Creating a Package Repository for APT . . . . .	456
15.4 Becoming a Package Maintainer . . . . .	458
15.4.1 Learning to Make Packages . . . . .	458
<i>Rules</i> . . . . .	459
<i>Procedures</i> . . . . .	459
<i>Tools</i> . . . . .	459
15.4.2 Acceptance Process . . . . .	461
<i>Prerequisites</i> . . . . .	461
<i>Registration</i> . . . . .	461
<i>Accepting the Principles</i> . . . . .	462
<i>Checking Skills</i> . . . . .	462
<i>Final Approval</i> . . . . .	463
<b>16. Conclusion: Debian's Future</b> . . . . .	465
16.1 Upcoming Developments . . . . .	466
16.2 Debian's Future . . . . .	466
16.3 Future of this Book . . . . .	467
<b>A. Derivative Distributions</b> . . . . .	469
A.1 Census and Cooperation . . . . .	469
A.2 Ubuntu . . . . .	469
A.3 Linux Mint . . . . .	470
A.4 Knoppix . . . . .	471
A.5 Aptosid and Siduction . . . . .	471
A.6 Grml . . . . .	472
A.7 Tails . . . . .	472
A.8 Kali Linux . . . . .	472
A.9 Devuan . . . . .	472
A.10 DoudouLinux . . . . .	472
A.11 Raspbian . . . . .	473
A.12 PureOS . . . . .	473
A.13 SteamOS . . . . .	473
A.14 And Many More . . . . .	473
<b>B. Short Remedial Course</b> . . . . .	475
B.1 Shell and Basic Commands . . . . .	475
B.1.1 Browsing the Directory Tree and Managing Files . . . . .	475
B.1.2 Displaying and Modifying Text Files . . . . .	476

B.1.3 Searching for Files and within Files . . . . .	477
B.1.4 Managing Processes . . . . .	477
B.1.5 System Information: Memory, Disk Space, Identity . . . . .	477
<b>B.2 Organization of the Filesystem Hierarchy . . . . .</b>	<b>478</b>
B.2.1 The Root Directory . . . . .	478
B.2.2 The User's Home Directory . . . . .	479
<b>B.3 Inner Workings of a Computer: the Different Layers Involved . . . . .</b>	<b>480</b>
B.3.1 The Deepest Layer: the Hardware . . . . .	480
B.3.2 The Starter: the BIOS or UEFI . . . . .	481
B.3.3 The Kernel . . . . .	482
B.3.4 The User Space . . . . .	482
<b>B.4 Some Tasks Handled by the Kernel . . . . .</b>	<b>482</b>
B.4.1 Driving the Hardware . . . . .	482
B.4.2 Filesystems . . . . .	483
B.4.3 Shared Functions . . . . .	484
B.4.4 Managing Processes . . . . .	484
B.4.5 Rights Management . . . . .	485
<b>B.5 The User Space . . . . .</b>	<b>485</b>
B.5.1 Process . . . . .	486
B.5.2 Daemons . . . . .	486
B.5.3 Inter-Process Communications . . . . .	487
B.5.4 Libraries . . . . .	488
