3 Carbon Nanomaterials for Optical Bioimaging and Phototherapy 43

Haifeng Dong and Yu Cao

- 3.1 Introduction 43
- 3.2 Surface Functionalization of Carbon Nanomaterials 43
- 3.3 Carbon Nanomaterials for Optical Imaging 45
 - 3.3.1 Intrinsic Fluorescence of Carbon Nanomaterials 45
 - 3.3.2 Imaging Utilizing Intrinsic Fluorescence Features of Carbon Nanomaterials 46
 - 3.3.3 Imaging with Fluorescently Labeled Carbon Nanomaterials 51
- 3.4 Carbon Nanomaterials for Phototherapies of Cancer 51
 - 3.4.1 Photothermal Therapy 52
 - 3.4.2 Photodynamic Therapy 53
- 3.5 Conclusions and Outlook 56
- References 56

Part II Bioimaging and Bioanalysis 63

4 High-Resolution and High-Contrast Fluorescence Imaging with Carbon Nanomaterials for Preclinical and Clinical Applications 65

John Czerski and Susanta K. Sarkar

- 4.1 Introduction 65
- 4.2 Survey of Carbon Nanomaterials 66
 - 4.2.1 Fluorescent Nanodiamonds 66
 - 4.2.2 Carbon Nanotubes 66
 - 4.2.3 Graphene 69
 - 4.2.4 Carbon Nanodots 69
- 4.3 Fluorescent Properties of FNDs and SWCNTs 69
 - 4.3.1 FNDs 69
 - 4.3.2 SWCNTs 71
- 4.4 Survey of High-Resolution and High-Contrast Imaging 71
 - 4.4.1 General Considerations for Eventual Human Use 71
 - 4.4.2 General Considerations for Achieving High-Resolution and High-Contrast Imaging 72
 - 4.4.2.1 Photoacoustic Imaging (PAI) 72
 - 4.4.2.2 X-ray Computed Tomographic (CT) Imaging 73
 - 4.4.2.3 Magnetic Resonance Imaging (MRI) 73
 - 4.4.2.4 Image Alignment and Drift Correction 74
 - 4.4.3 Preclinical and Clinical Optical Imaging with CNMs 74
 - 4.4.4 Optical Imaging in the Short-Wavelength Window (~650–950 nm) 74
 - 4.4.4.1 Optical Imaging Beyond the Diffraction Limit 75

4.4.4.2	Selective Modulation of Emission	75
4.4.4.3	Time-Gated Fluorescence Lifetime Imaging	77
4.4.5	Optical Imaging in the Long-Wavelength Window (~950–1400 nm)	77
4.5	Conclusions	78
	References	79
5	Carbon Nanomaterials for Deep-Tissue Imaging in the NIR Spectral Window	87
	<i>Stefania Lettieri and Silvia Giordani</i>	
5.1	Introduction	87
5.1.1	Transparent Optical Windows in Biological Tissue	87
5.1.2	Near-Infrared Imaging Materials	88
5.2	Carbon Nanomaterials for NIR Imaging	89
5.2.1	Biocompatibility of CNMs	90
5.2.2	Fluorescence of CNMs Probes	91
5.2.3	Covalent and Noncovalent Functionalization	91
5.2.4	CNMs as Bioimaging Platforms	91
5.2.4.1	Fullerene	91
5.2.4.2	Carbon Nanotubes	93
5.2.4.3	Graphene Derivatives	99
5.2.4.4	Carbon Dots	100
5.2.4.5	Carbon Nano-onions	102
5.2.4.6	Nanodiamonds	104
5.3	Conclusions and Outlook	105

 - References 193
- 9 Recent Advances in Carbon Dots for Bioanalysis and the Future Perspectives 203**
 - Jessica Fung Yee Fong, Yann Huey Ng, and Sing Muk Ng*
 - 9.1 Introduction 203
 - 9.2 Fundamentals of CDs 205
 - 9.2.1 Synthesis Approaches 205
 - 9.2.2 Optical Properties 206
 - 9.2.2.1 Absorbance and Photoluminescence (PL) 206
 - 9.2.2.2 Quantum Yield (QY) 210
 - 9.2.2.3 Photoluminescence Origins 210
 - 9.2.2.4 Up-Conversion Photoluminescence (UCPL) 211
 - 9.2.2.5 Phosphorescence 212
 - 9.2.3 Physical and Chemical Properties 213
 - 9.2.4 Biosafety Assessments 214
 - 9.3 Bioengineering of CDs for Bioanalysis 216
 - 9.3.1 Functionalization Mechanism and Strategies 216
 - 9.3.1.1 Chemical Functionalization 216

9.3.1.2	Doping	217
9.3.1.3	Coupling with Gold Nanoparticles	217
9.3.1.4	Fabrication onto Solid Polymeric Matrices	218
9.3.2	Biomolecules Grafted on CDs as Sensing Receptors	218
9.3.2.1	Deoxyribonucleic Acid (DNA)	218
9.3.2.2	Aptamers	219
9.3.2.3	Proteins/Peptides	219
9.3.2.4	Biopolymers	220
9.4	Bioanalysis Applications of CDs	221
9.4.1	Biosensing Mechanism/Transduction Schemes	221
9.4.1.1	Fluorescence	222
9.4.1.2	Chemiluminescence (CL)	223
9.4.1.3	Electrochemiluminescence (ECL)	224
9.4.1.4	Electrochemical	224
9.4.2	Uses of CDs in Bioanalysis	225
9.4.2.1	Heavy Metals/Elements	225
9.4.2.2	Reactive Oxygen/Nitrogen Species (ROS/RNS)	226
9.4.2.3	Oligonucleotides	227
9.4.2.4	Small Molecules/Pharmaceutical Drugs/Natural Compounds	228
9.4.2.5	Proteins	230
9.4.2.6	Enzyme Activities and Inhibitor Screening	231
9.4.2.7	pH	232
9.4.2.8	Temperature	234
9.4.3	Solid-State Sensing for Point-of-Care Diagnostic Kits	234
9.4.4	Bioimaging/Real-Time Monitoring	236
9.4.5	Theranostics	238
9.5	Future Perspectives	240
9.5.1	Better Understanding of PL Mechanisms	240
9.5.2	Establishment of Systematic Synthesis Protocol	241
9.5.3	QY Improvement and Spectral Expansion to Longer Wavelength	241
9.5.4	Sensitivity Improvement for Solid-State Sensing	242
9.6	Conclusions	242
	References	242

Part III Therapy 265

10	Functionalized Carbon Nanomaterials for Drug Delivery	267
	<i>Naoki Komatsu</i>	267
10.1	Introduction	267
10.2	Direct Fabrication of Graphene-Based Composite with Photosensitizer for Cancer Phototherapy	268
10.2.1	Fabrication of Graphene-Based Composite with Chlorin e6 (G-Ce6)	268
10.2.2	Characterization of G-Ce6	268
10.2.3	<i>In vitro</i> Evaluation of G-Ce6 for Cancer Phototherapy	272
10.3	Polyglycerol-Functionalized Nanodiamond Conjugated with Platinum-Based Drug for Cancer Chemotherapy	274

- 10.3.1 Synthesis of Polyglycerol-Functionalized Nanodiamond Conjugated with Platinum-Based Drug and Targeting Peptide 274
- 10.3.2 Characterization of Polyglycerol-Functionalized Nanodiamond and the Derivatives 276
- 10.3.3 *In vitro* Evaluation of Polyglycerol-Functionalized Nanodiamond Conjugated with Platinum-Based Drug for Cancer Chemotherapy 279
- 10.4 Polyglycerol-Functionalized Nanodiamond Hybridized with DNA for Gene Therapy 280
- 10.4.1 Synthesis and Characterization of Polyglycerol-Functionalized Nanodiamond Conjugated with Basic Polypeptides 280
- 10.4.2 Characterization of Polyglycerol-Functionalized Nanodiamond Hybridized with Plasmid DNA 280
- 10.5 Conclusions and Perspectives 283
- Acknowledgments 285
- References 285
- 11 Multifunctional Graphene-Based Nanocomposites for Cancer Diagnosis and Therapy 289**
- Ayub Aghanejad, Parinaz Abdollahiyan, Jaleh Barar, and Yadollah Omidi*
- 11.1 Introduction 289
- 11.2 Multifunctional Graphene-Based Composites for the Diagnosis/Therapy of Cancer 291
- 11.2.1 Metal-Graphene Nanocomposites 292
- 11.2.1.1 Gold-Graphene Composites 292
- 11.2.1.2 Magnetic Graphene Nanocomposites 294
- 11.2.2 Polymeric Graphene Nanocomposites 295
- 11.2.3 Graphene Biomaterials for MR Imaging 299
- 11.3 Multimodal Graphene-Based Composites for the Radiotherapy of Cancer 300
- 11.4 Graphene-Based Nanobiomaterials for Cancer Diagnosis 302
- 11.5 Conclusion 302
- Acknowledgment 303
- References 303
- 12 Carbon Nanomaterials for Photothermal Therapies 309**
- Jiantao Yu, Lingyan Yang, Junyan Yan, Wen-Cheng Wang, Yi-Chun Chen, Hung-Hsiang Chen, and Chia-Hua Lin*
- 12.1 Introduction 309
- 12.2 GO for PTT 311
- 12.2.1 PTT-Related Physical and Chemical Properties of GO 311
- 12.2.2 GO for *in vitro* PTT 312
- 12.2.3 GO for *in vivo* PTT 314
- 12.3 CNTs and CNHs for PTT 314
- 12.3.1 Physical and Chemical Properties of CNTs and CNHs Related to PTT 315
- 12.3.2 CNTs and CNHs for *in vitro* PTT 316
- 12.3.3 CNTs and CNHs for *in vivo* PTT 316
- 12.4 CDs and GDs for PTT 318

12.4.1	Physical and Chemical Properties of CDs and GDs Related to PTT	318
12.4.2	CDs and GDs for <i>in vitro</i> PTT	319
12.4.3	CDs and GDs for <i>in vivo</i> PTT	319
12.5	Fullerenes for PTT	320
12.5.1	Physical and Chemical Properties of Fullerenes Related to PTT	320
12.5.2	Fullerenes for <i>in vitro</i> PTT	320
12.5.3	Fullerenes for <i>in vivo</i> PTT	321
12.6	Carbon Nanomaterial-Based Nanocomposites for PTT	321
12.6.1	GO-Based Nanocomposites for PTT	322
12.6.2	CNT-Based Nanocomposites for PTT	323
12.6.3	CD- and GD-Based Nanocomposites for PTT	323
12.7	Carbon Nanomaterial-Based Combined Therapy with PTT	324
12.7.1	Chemotherapy	324
12.7.2	RT	324
12.7.3	Photodynamic Therapy (PDT)	325
12.7.4	Gene Therapy	325
12.7.5	Immune Therapy	327
12.7.6	Theranostic Applications	328
12.8	Conclusions and Perspectives	329
