List of contributors	xv
About the editors	xix
Preface—obesity in obstetrics	xxi

Section 1 Epidemiology

1. Worldwide epidemic of obesity 3

Rohana N. Haththotuwa, Chandrika N. Wijeyaratne and Upul Senarath

Introduction	3
Definitions of overweight and obesity	3
The extent of the problem	4
Obesity in children and adolescents	4
Temporal trends	5
Factors associated with overweight and obesity	5
Disease burden and impact on health and economy	6
International response to the epidemic	6
Conclusion	7
References	7

2. Social, ethnic, and environmental determinants of obesity 9

Adi Katz, Sarah Pachtman Shetty and Richard A. Stein

Introduction	9
Trends in obesity	9
Health impact and burden of overweight and obesity	9

Factors that contribute to disparities in obesity	10
Conclusion	17
References	17

3. Obesity based on genetic and molecular influences 25

Charles Savona-Ventura, Adnan Hasan and Tahir Mahmood

Introduction	25
Genetic factors	25
Molecular basis for energy intake regulation	26
Control of energy expenditure and adipogenesis	29
Metabolic programming	31
Conclusion	32
References	33

4. The psychological basis of obesity 37

Afewerk Tsegaye, Gyöngyi Kökönyei, Alexander Baldacchino, Róbert Urbán, Zolt Demetrovics and H.N. Alexander Logemann

General introduction	37
Eating behavior	38
Cognition	38
Stigma and discrimination	39
Stress and mood disorders	39
Personality traits	40
Emotion regulation	40
Summary	41
Acknowledgments	41
References	41

Section 2

Planning for Pregnancy in Obese Women

5. Preconception and antepartum care in overweight and obese women

47

Amos Grunebaum, Joachim Dudenhausen and Frank A. Chervenak

Introduction	47
Epidemiology of obesity and overweight in pregnancy or reproductive age women	47
Impact of overweight/obesity on female and male (plus age) on fertility	47
Morbidity and mortality of overweight/obesity in pregnancy	47
Preconception care of overweight/obesity	48
Early pregnancy in overweight and obese women	48
Recommended and optimal weight gain in pregnancy	48
Lifestyle and nutrition recommendations for pregnant obese women	49
Antepartum care of overweight and obese women	49
Obesity and gestational diabetes mellitus	50
Obesity and hypertension	50
Obesity, preterm birth, and neonatal mortality	50
Intrapartum care and prevention of postpartum risks in obese patients	50
Managing weight postpartum	51
Conclusion	51
References	51

6. Management of pregnancy in women with history of weight loss surgery

53

Matthew Brown and Leonie Penna

Obesity and bariatric surgery	53
Types of bariatric surgery	54
Restrictive procedures	54
Malabsorptive procedures	55
Complications of bariatric surgery	55
Reproductive health after bariatric surgery	55
Preconception counseling	56
Antenatal management	57
Recommended investigations in pregnancy after bariatric surgery	57
Nutrition and treatment of possible deficiencies	57
Management of acute attendance during pregnancy	59

Postpartum management	59
References	59

7. Ultrasound scanning in early pregnancy and fetal abnormality screening in obese women

61

Victoria Mumford and Asma Khalil

Key points for clinical practice	61
Introduction	61
Excess fetal risks associated with obesity	62
Ultrasound assessment in obesity	63
Fetal growth assessment	65
Technical tips for ultrasound in obese women	65
Financial issues	65
Medicolegal litigations	66
Interventions	66
Conclusion	67
References	67

8. Challenges of third-trimester screening in obese women

69

Moti Gulersen and Frank A. Chervenak

Selecting optimal site for measurements	69
Estimation of Foetal birth weight	69
Accuracy of Foetal weight estimation near term	70
Limitation of ultrasound estimation of weight	71
Optimal timing for sonographic assessment	71
Assessment of amniotic fluid volume	71
Summary	72
References	72

9. An overview of complications associated with obesity during pregnancy

75

Tahir Mahmood

Introduction	75
Pathophysiological changes among obese women during pregnancy	75
Obesity in pregnancy	75
Gestational diabetes	76
Preeclampsia and pregnancy-induced hypertension	76
Maternal venous thromboembolism	77
Congenital abnormalities and obesity	77
Macrosomia and obesity	77
Obesity and risk of preterm rupture of membranes	78
Stillbirth and obesity	78
Obesity and induction of labor	78
Place of birth	78
Obesity and mode of delivery	78

Obesity and obstetrics anesthetics	79	13. Obesity, hypertension, and preeclampsia	117
Postpartum complications	79	<i>Fiona Broughton-Pipkin and Pamela Loughna</i>	
Breastfeeding	79	Introduction	117
Postnatal depression	79	Definitions	117
Perinatal outcome	80	Blood pressure measurement	117
Conclusion	80	Urine testing	118
Conflict of interest	80	Changing incidence of obesity	118
References	80	Does obesity predispose to preeclampsia?	118
		Potential mechanisms	119
		Adipokines	120
		Is "preeclampsia" in the obese really underlying chronic (essential) hypertension?	121
		Final considerations	122
		References	123
10. Obesity and adolescent pregnancy	83	14. Obesity and venous thromboembolism and management plan	125
<i>Manasi Patil, Hilda Yenuberi and Matthews Mathai</i>		<i>Joanne Ellison and Andrew Thomson</i>	
Introduction	83	Introduction	125
Adolescent pregnancy	83	Epidemiology, prevalence, and trends	125
Adolescent Obesity	85	Obesity, pregnancy, and venous thromboembolism risk: underlying mechanisms	126
Pregnancy in obese adolescents	86	Prevention of venous thromboembolism in obese women during pregnancy	127
Interventions	86	Care of individuals identified as at higher risk of venous thromboembolism	129
References	88	Investigation of suspected venous thromboembolism in obese pregnant women	131
		Summary	131
		References	132
11. Algorithmic approach to antenatal care for women with obesity	91	Section 3	
<i>Shiri Shinar, Dan Farine and Cynthia Maxwell</i>		Obesity and hyperglycaemia of pregnancy	
Review of guidelines for antepartum care	91	15. Pregnancy and metabolic syndrome of obesity	137
Prepregnancy care and recommendations	93	<i>Sarah Barr, Scott M. Nelson and Shahzya S. Huda</i>	
Antenatal care	94	Introduction	137
Antenatal fetal screening—special considerations	95	Lipid metabolism and fat deposition in lean pregnancy	137
Planning for labor and birth	96	Lipid metabolism and fat deposition in obese women	138
Intrapartum care and anesthetic considerations	97		
Summary	101		
References	101		
12. Antenatal care for postbariatric women	105		
<i>Natalie Meirowitz, Ruchira Sharma and Andrew C. Rausch</i>			
Key points	105		
Is there an optimal time to conceive a pregnancy after bariatric surgery?	105		
Nutritional considerations	106		
Gestational weight gain	107		
Gestational diabetes: risk, screening, and management	108		
Nonobstetric complications in the postbariatric gravida	109		
Pregnancy outcomes after bariatric surgery	111		
References	113		

Glucose metabolism in lean and obese pregnancy	139	Implications for public health intervention	157
Adiposity, obesity and insulin resistance: potential mechanisms	139	Acknowledgments	158
Adiposity and pregnancy-specific insulin resistance: potential mechanisms	140	References	158
Adiposity, obesity and hypothalamic–pituitary–adrenal axis activity: potential mechanisms	141	17. Universal testing for hyperglycemia in pregnancy	165
Amino acid metabolism in lean and obese pregnancy	141	<i>Anil Kapur and Tahir Mahmood</i>	
Preeclampsia, obesity, and metabolic syndrome of pregnancy	141	Rising burden of disability and hyperglycemia in pregnancy	165
Intervention strategies in maternal obesity and effects on metabolism	142	Short- and long-term consequence of hyperglycemia in pregnancy	166
Intervention strategies: lifestyle	142	Should all pregnant women be tested for hyperglycemia in pregnancy?	168
Intervention strategies: pharmacological	143	Should all women be subjected to a 75 g oral glucose tolerance test?	168
Conclusion	144	Is global consensus on diagnostic cutoff values possible?	168
References	144	References	169
16. Maternal obesity and developmental priming of risk of later disease	149	18. Metformin use in gestational diabetes	173
<i>Ronald Ching Wan Ma, Peter D. Gluckman and Mark A. Hanson</i>		<i>Ian W. Campbell</i>	
Introduction	149	Introduction	173
Epidemiological observations on maternal obesity, macrosomia, and neonatal adiposity	149	Efficacy of metformin in gestational diabetes	173
Maternal obesity and childhood obesity	150	Safety of metformin in gestational diabetes	174
Maternal pregnancy weight gain and childhood obesity	150	Clinical practice guidelines for metformin and gestational diabetes	174
Maternal diabetes, gestational diabetes, and glucose effects	151	Metformin in overweight and obese pregnant women	175
Relationship between maternal hyperglycemia and neonatal adiposity	152	Metformin therapy after gestational diabetes	175
Maternal hyperglycemia and childhood obesity	152	Metformin in the future	176
GDM and cardiometabolic diseases in the offspring	152	Acknowledgments	177
Maternal insulin resistance, hyperinsulinemia, and fetal growth	153	References	177
Glucose metabolism and fetal growth	154	19. Management of gestational diabetes mellitus to optimize outcomes	179
Maternal lipid supply and fetal growth	154	<i>Yoel Toledano, Eran Hadar and Moshe Hod</i>	
Amino acid metabolism and insights from metabolomics studies	154	Adverse pregnancy outcomes associated with gestational diabetes	179
Effects on vascular function	154	Gestational diabetes mellitus treatment	180
Animal models using maternal obesity	155	Glycemic targets and monitoring	180
Neurohormonal changes	156	Diet and lifestyle	181
Intestinal inflammation and gut microbiota	156	Pharmacologic therapy—Oral	182
Placenta, fetal programming, and fetal development	156	Insulin analogs	183
Epigenetics as the unifying mechanism in fetal priming of noncommunicable disease risk	156	New technologies	184
		Obstetric considerations and monitoring	184
		References	186

20. Obesity, insulin resistance, and placental dysfunction—fetal growth 191

Mariam Al Beloushi, Anjum Doshani and Justin C. Konje

Introduction	191
Obesity and the endocrine environment	192
Placenta and insulin resistance	192
Placental size	193
Placental transporter system	193
Placenta and inflammatory response	194
Prothrombotic state	194
Diabetes and the placenta	194
The intrauterine growth—restricted fetus	195
Conclusion	195
References	196

Section 4 Management of labour

21. Induction of labor in obese women 201

Andrew P. Brown, Carolyn Chiswick and Fiona C. Denison

Background	201
Indications for induction of labor	201
Women with a previous caesarean section	203
Assessment prior to induction of labor	204
Methods of inducing labor	204
Fetal well-being	204
Summary	205
References	205

22. Intrapartum care for obese and morbidly obese women 207

Lindsay Edwards and Boon H. Lim

Introduction	207
Preterm and postterm pregnancy	207
Induction of labour	207
Place of delivery	208
Equipment required	208
Labour and intrapartum monitoring	208
Labour dystocia	209
Second-stage progress	210
Caesarean section in the obese woman	211
Macrosomia and shoulder dystocia	213
Postpartum care	213
Perinatal morbidity	214
Risks in subsequent pregnancy	214

Conclusion	215
References	215

23. Anesthetic issues during labor in obese women 219

Alistair Milne and Alistair Lee

Introduction	219
Physiology of Obesity and Pregnancy	219
Anesthetic considerations	220
The anesthetic clinic	221
The labor ward	222
The operating theater	223
The postoperative period	225
Conclusion	226
References	226

24. Obesity, diabetes, placental pathology, and fetal malformations 229

Margaret J. Evans

Introduction	229
Obesity, diabetes, and the umbilical cord coiling	230
Obesity, diabetes, and the placenta	232
Obesity and other placental changes	233
Obesity, diabetes, and fetal pathology	233
Obesity, diabetes, and disease in childhood	235
Conclusion	236
References	236

25. Maternal obesity and the risk of stillbirth 239

Lisa Scott and Mairead Black

Background	239
Epidemiology	239
Pathophysiology	240
Direct risk factors	240
Gestational diabetes	240
Hypertensive disorders	240
Vascular pathology and placental dysfunction	240
Metabolic syndrome	241
Previous obstetric history	241
Fetal abnormalities	241
Sleep disorders	241
Failed antenatal screening	241
Postmaturity	241
Indirect risk factors	241
Age	241
Parity	241

Conclusion	297		
Acknowledgment	297		
References	297		
30. Antiobesity drugs for obese women planning pregnancy	301		
<i>Hang Wun Raymond Li, Karen Siu Ling Lam and Pak Chung Ho</i>			
Introduction	301		
Classification of antiobesity drugs	301		
Drugs for weight reduction in reproductive age women: pharmacology and clinical efficacy	301		
Pharmacological antiobesity treatment in women contemplating pregnancy	304		
Concluding remarks	305		
References	305		
31. Weight-reducing surgery for women planning pregnancy: where are we now?	307		
<i>Siara Teelucksingh, Lorenzo Gonzales and Surujpal Teelucksingh</i>			
Introduction	307		
Background	307		
The pros and cons of bariatric surgery	309		
How does bariatric surgery affect sexuality and sexual function?	309		
Should the desire of fertility be a prime indication for bariatric surgery?	310		
A case of spontaneous conception following weight-reducing surgery	310		
What is the optimum timing for planning a pregnancy after weight-reducing surgery?	311		
Special precautions after weight-reducing surgery	311		
Nutrition	311		
Anemia	311		
Gastrointestinal symptoms	311		
Monitoring of fetal growth	311		
Pregnancy outcomes after weight-reducing surgery	312		
Continued need to screen for gestational diabetes mellitus and hypertension after weight-reducing surgery	312		
Postpartum considerations	313		
Future work	313		
Conclusion	313		
References	313		
32. Developing standards of care for obese women during pregnancy	317		
<i>Chu Lim, Tahir Mahmood and Sabaratnam Arulkumaran</i>			
Introduction	317		
The development of standard of care	317		
How to develop standards?	317		
The obesity epidemic	318		
Prepregnancy care	318		
Interventions for the management of obesity before and during pregnancy	319		
Antenatal care	320		
Conclusion	323		
References	323		
33. Planning for the future: maternity services in 2035	327		
<i>Hajeb Kamali, Sophie Moloney-Geany, Tim Draycott and Tahir Mahmood</i>			
Projected prevalence of obesity in 2035	327		
Current model of care	329		
Future model of care	329		
How can we deliver this care?	332		
Research needed to inform future planning	332		
Summary	332		
References	332		
34. Maternal obesity and stigma	335		
<i>Ellinor K. Olander</i>			
Introduction to chapter	335		
Stigma	335		
Pregnant women's experiences of obesity stigma	335		
Obesity stigma and its influence on maternal health	336		
Health-care professionals' attitudes toward and experiences of caring for pregnant women with obesity	337		
Reducing weight stigma within maternity services	338		
Summary	339		
References	340		
Index			343
