

Contents

Introduction to the series	7
Introduction to this book	9
Data compilation and coding	11
Categories for coding the ecological preferences	14
Acknowledgements	28
References	29
Ecological parameters	33
Species inventory	35
Ecoregional distribution	51
Endemism	73
Rare species	83
Stream zonation preference	89
Altitude preference and altitude preference (WFD)	101
Microhabitat/substrate preference	123
Current preference	129
Temperature preference and temperature range preference	139
pH preference	149

Feeding type	153
Respiration	169
Resistance/resilience to droughts	185
Life duration	189
Larval development cycle	203
Emergence/flight period and duration of emergence period	207
Reproductive life cycles per year	225
References to the ecological parameters	231
Abbreviations	259
