

Contents

- Jandera P.:
**50 years of high performance liquid chromatography:
The contribution of the Department of Analytical
Chemistry in Pardubice** 5–66
- Farag A.S., Švancara I., Sýs M.:
**Electrochemical behaviour of substances responsible
for the vanilla aroma and a study of their structural
analogues at the glassy carbon electrode** 67–77
- Sýs M., Novák M., Mikysek T.:
**Comparison of two different approaches for determination
of biomimetic activity of selected copper complexes** 79–86
- Patočka J., Husáková L.:
**Multi-element analysis of urine using octopole collision
cell ICP-Q-MS** 87–96
- Kalendová P., Meloun M., Česlová L.:
**Effect of long-term storage on degradation of 21 phenolic
compounds in green tea** 97–110
- Klikarová J., Jakubů K., Česlová L., Fischer J.:
**Determination of oleocanthal in extra virgin olive oils
using high-performance liquid chromatography** 111–124
- Pravcová K., Macháčková N., Česlová L.:
**Determination of selected pesticides in honey and mead
by HPLC** 125–137
- Pravcová K., Mikysek T., Česlová L.:
**Comparison of HPLC and electrochemical determination
of 5-hydroxymethylfurfural in honey and mead samples** 139–146
- Surmová S., Wiśniewska P., Śliwińska M., Dymerski T.,
Wardencki W., Namieśnik J., Ventura K., Adam M., Eisner A.:
**Classification of the alcoholic beverages by using
electronic nose technique based on ultra-fast GC** 147–156
- Kopčil M., Janeček R., Fukasová P., Kand'ár R.:
**Determination and profiling of fatty acids in dried breast
milk spot** 157–168

Chmelík J., Machotová J., Slang S., Zelenka J., Vlček M.:	
Influence of aniline oxidative-polymerization conditions and the type of dopant on PANI particles morphology	169–180
Smolík J., Knotek P., Schwarz J., Kutálek P., Pouzar M., Černošková E.:	
Optimization of synthesis and basic characterization of 55PbO-10ZnO-35P₂O₅ glass modified by CoO	181–193
Sajad M.:	
Oxidative dehydrogenation of propane over the boron-nitride catalysts	195–210
Audrlická Vavrušová L., Krejčová A., Bařa R., Pouzar M.:	
Life cycle assessment of Ni-alumina and V-alumina catalysts for catalytic oxidative dehydrogenation of ethane	211–221
Hroch J., Dohnalová Ž.:	
Brown pigments with perovskite structure of SrSnO₃: The role of mineralizers	223–234
Šimková L., Šulcová P.:	
The effect of partial substitution on the hydroxyapatite properties	235–243
Šiška B., Machač I.:	
Terminal falling velocity of spherical particles moving through a Carreau purely viscous fluid	245–253
Košťálová J., Vávra J., Bergerová V.:	
Application of the elements of the Industry 4.0 concept in chemical industry and comparison with other industrial areas in the Czech Republic	255–268
Paták M., Branská L., Pecinová Z.:	
Possibilities of reducing the volume of plastic packaging for consumer chemicals	269–277
Vlčková V., Podškubková L.:	
Analysis and assessment of the achieved level of servitization in the selected chemical company – Case study	279–289
