

CONTENTS

Preface	xiii
Acknowledgments	xv
Author	xvii
1 Measurements and Units	1
Why Do We Need Mathematics in Culinary Processes?	1
Types of Measurements in the Kitchen	1
Units of Measurements in Culinary Calculations	5
Rule	7
Everyday Calculations in the Kitchen	9
Fractions and Percentages	9
Yield Percent	11
Recipe Yield Conversion	11
Simplified Cost Calculations for Culinary Operations	13
Simplified Statistics for Culinary Operations	16
Experiment 1.1	17
Points to Remember	20
Study Questions	21
Selected References	22
2 Basic Food Chemistry	23
Food Processing Is All about Chemistry	23
Experiment 2.1	27
Experiment 2.2	29
The Science Behind the Results	33
Points to Remember	36
Selected References	37

3 Water in Culinary Transformations	39
Functional Properties of Water in Culinary Processes	39
Structure of Water	41
Experiment 3.1	45
The Science Behind the Results	49
Experiment 3.2	51
The Science Behind the Results	55
Experiment 3.3	57
The Science Behind the Results	61
Experiment 3.4	63
The Science Behind the Results	67
Experiment 3.5	69
The Science Behind the Results	73
Experiment 3.6	75
The Science Behind the Results	79
Experiment 3.7	81
The Science Behind the Results	85
Points to Remember	86
More Ideas to Try	87
Study Questions	87
Selected References	87
4 Carbohydrates in Culinary Transformations	89
Functional Properties of Carbohydrates in Culinary Processes	89
Carbohydrate Structure	90
General Formula for Carbohydrates	90
Experiment 4.1	93
The Science Behind the Results	97
Experiment 4.2	99
The Science Behind the Results	105
Experiment 4.3	107
The Science Behind the Results	109
Experiment 4.4	111
Study Questions	113
The Science Behind the Results	115
Experiment 4.5	119
The Science Behind the Results	123
Experiment 4.6	125
The Science Behind the Results	129

Experiment 4.7	131
Study Questions	132
The Science Behind the Results	133
Experiment 4.8	135
Study Question	136
The Science Behind the Results	137
Experiment 4.9	139
The Science Behind the Results	141
Points to Remember	142
More Ideas to Try	143
Study Questions	143
Selected References	143
5 Proteins in Culinary Transformations	145
Functional Properties of Proteins in Culinary Processes	145
Protein Structure	146
Experiment 5.1	151
The Science Behind the Results	155
Experiment 5.2	157
Study Questions	159
The Science Behind the Results	161
Experiment 5.3	163
The Science Behind the Results	165
Experiment 5.4	167
The Science Behind the Results	169
Experiment 5.5	171
The Science Behind the Results	173
Experiment 5.6	175
Study Questions	177
The Science Behind the Results	179
Experiment 5.7	181
The Science Behind the Results	185
Experiment 5.8	187
The Science Behind the Results	189
Experiment 5.9	191
The Science Behind the Results	195
Experiment 5.10	197
Study Questions	198
The Science Behind the Results	201

Experiment 5.11	203
The Science Behind the Results	209
Points to Remember	210
More Ideas to Try	211
Study Questions	211
Selected References	211
6 Fats and Oils in Culinary Transformations	213
Functional Properties of Fats and Oils in Culinary Processes	213
Fat and Oil Structure	214
Experiment 6.1	217
The Science Behind the Results	219
Experiment 6.2	223
Experiment 6.3	225
The Science Behind the Results	229
Experiment 6.4	231
Study Questions	233
The Science Behind the Results	235
Experiment 6.5	237
The Science Behind the Results	241
Experiment 6.6	243
The Science Behind the Results	245
Experiment 6.7	249
The Science Behind the Results	253
More Ideas to Try	254
Study Questions	254
Points to Remember	255
Selected References	256
7 Keys to Developing the Perfect Bite: New Food Product Development and Sensory Evaluation Tests	257
Reasons to Develop a New Food Product	257
Stages in New Food Product Development	258
Idea Development	259
Product Development	259
Commercialization	260
How to Carry Out Sensory Evaluation Tests	260
Points to Remember	269
Selected References	270

8 The Science of Flavor and Flavor Pairing	271
Experiment 8.1	273
The Science Behind the Results	275
Experiment 8.2	277
The Science Behind the Results	281
Experiment 8.3	283
Experiment 8.4	287
The Science Behind the Results	289
Points to Remember	303
More Ideas to Try	304
Selected References	304
9 Food Additives in Culinary Transformations	307
Classification of Food Additives	307
Intentional/Direct Food Additives	307
Unintentional/Indirect Food Additives	308
Experiment 9.1	313
Hydrocolloids in Culinary Transformations	317
Experiment 9.2	319
Experiment 9.3	325
The Science Behind the Results	331
Experiment 9.4	339
The Science Behind the Results	343
Study Question	343
More Ideas to Try	343
Points to Remember	344
Selected References	345
10 Food Safety and Hygiene in Culinary Transformations	347
Consumers Have a Right to Expect That the Foods They Consume Will Be Safe and of High Quality	347
Food Safety Has to Do with Controlling Potential Foodborne Hazards	348
Experiment 10.1	349
The Science Behind the Results	353
Experiment 10.2	355
The Science Behind the Results	361
Experiment 10.3	367
The Science Behind the Results	369
Safe Practices are Important to Avoid Foodborne Illness	369

XII CONTENTS

Experiment 10.4	371
The Science Behind the Results	373
Points to Remember	374
More Ideas to Try	375
Study Questions	375
Selected References	375
Extended Glossary	377
Index	387
