

Contents

Foreword	ix
Preface	xi
Acknowledgments	xiii
1. The Water We Drink	1
Natural Water	2
Water and the Public Health	17
References	28
2. Water Pollution	29
Human Waste and Pollution	29
Industrial Pollution	31
Wastewater Control and Treatment	37
Nonpoint Sources of Water Pollution	67
Pollution Sources and Water Quality	81
Summary	83
References	84
3. Water Protection	89
The Basics of Water Supply	90
Basic Water Treatment	93
Beyond Basic Water Treatment	99
An Issue of Equality	102
Chemical Monitoring and Warnings for Regulated Pollutants	103
The National Drinking Water Contaminant Occurrence Database	109
Unregulated Pollutants and Monitoring Regulations	110
Setting New Drinking Water Standards	111
Why Consumers Should Be Concerned	114
Approaches to Mitigate Chemical Exposure	122
Water Pollution and Risk	139
References	140

4. Living with the Risk of Polluted Water	143
The Burden of Proof	144
Permissible Pollution	146
The Dose Makes the Poison	148
Basic Concepts of Dose	149
Mechanism of Toxicity	154
Biotransformation and Detoxification	157
Toxicity and Defining Standards	159
Timing Is Everything	163
Endocrine-Disrupting Chemicals	167
Pharmaceutical Pollutants	169
Pharmaceuticals Detected in the Environment	175
Living with Risk	179
Population, Pollution, Risk, and Precaution	182
The Risk Assessment Process	184
Summary	193
References	194
5. Managing Risk and Drinking Water Quality	197
Learning from the Past and Present	198
Risk and Economics	201
An Alternative Approach	206
Consumer-Based Protection	208
Potential Action by the Water Industry	214
Potential Governmental Actions	221
An Alternative Risk Management Program	227
References	229
Appendix 1-1 Average Elemental Abundance in the Earth's Crust	231
Appendix 1-2 Chemical Compounds with Established Water Quality Criteria—1952	233
Appendix 1-3 USEPA National Recommended Water Quality Criteria for Freshwater and Human Consumption of Water + Organism: 2002	237
Appendix 2-1 Dow Industrial Chemicals, Solvents and Dyes in 1938	241
Appendix 2-2 USEPA List of Priority Pollutants	243
Appendix 2-3 Summary of Surface Water Data	247
Appendix 2-4 Summary of Shallow Groundwater Data	249
Appendix 2-5 Organic Chemicals Found in Landfill Leachate and Gas	251
Appendix 2-6 Unregulated Pollutants Discharged to or Identified in Water Resources	255
Appendix 2-7 Chemicals Known to the State of California to Cause Cancer or Reproductive Toxicity	257
Appendix 2-8 Regulated Pesticides in Food with Residue Tolerances	267

Appendix 2-9 Comparison of Chemicals Required to be Monitored in Groundwater by RCRA	275
Appendix 3-1 General Drinking Water Monitoring and Warning Requirements (as of 2002)	281
Appendix 3-2 National Drinking Water Contaminant Occurrence Database Data on Primary Water Quality Standards (May 18, 2001)	285
Appendix 3-3 National Drinking Water Contaminant Occurrence Database: Data on Unregulated Compounds	293
Appendix 3-4 Examples of Bottled Mineral Water Chemistry	297
Appendix 3-5 Examples of Bottled Water Chemistry	315
Appendix 3-6 Trace Element Analysis of Mineral Waters (ppb) That Appear in Either Appendix 3-4 or Appendix 3-5	337
Appendix 4-1 Glossary of Terms Adapted from the International Union of Pure and Applied Chemistry (IUPAC) (1993)	339
Appendix 4-2 Chemical Examples on the Toxicology of Drinking Water Standards	343
Appendix 4-3 Suspected Endocrine-Disrupting Chemicals	353
Appendix 4-4 U.S. Geological Survey Target Compounds, National Reconnaissance of Emerging Contaminants in U.S. Streams (2000)	357
 Glossary	 361
 Index	 365
