

Undetailed Contents

Part 1: Structure and Properties of Dental Materials

1. Overview of Dentistry and Dental Materials 3
2. Structure and Properties of Dental Materials 9
3. Structure and Properties of Metals and Alloys 39
4. Electrochemical Properties of Materials 56
5. Biological Properties of Dental Materials 61

Part 2: Direct Restorative Materials

6. Introduction to Restorations, Luting and Pulp Therapy 73
7. Cavity Liners and Varnish 80
8. Dental Cements 84
9. Dental Amalgam 128
10. Direct Filling Gold 156
11. Resin-based Composites and Bonding Agents 167

Part 3: Endodontic Materials

12. Endodontic Medicaments and Irrigants 207
13. Endodontic Sealers and Obturating Materials 216

Part 4: Impression Materials

14. Rigid Impression Materials—Impression Compound and Zoc Paste 243

15. Elastic Impression Materials—Agar and Alginate 258
16. Elastomeric Impression Materials 277

Part 5: Dental Laboratory—Materials and Processes

17. Model, Cast and Die Materials 301
18. Gypsum Products 310
19. Waxes in Dentistry 327
20. Dental Investments and Refractory Materials 345
21. Dental Casting and Metal Fabrication Procedures 358
22. Abrasion and Polishing 378
23. Metal Joining and Dental Lasers 392
24. Additive Manufacturing in Dentistry 407

Part 6: Alloys in Dentistry

25. Dental Casting Alloys 421
26. Dental Implant Materials 452
27. Wrought Metals and Alloys 466

Part 7: Indirect Restorative and Prosthetic Materials

28. Dental Ceramics 479
29. Denture Resins and Polymers 529
30. Maxillofacial Prosthetic Materials 572

Appendices 579
