

DETAILED CONTENTS

<i>List of figures</i>	xiii
<i>List of tables</i>	xvii
<i>About the author</i>	xix
<i>Preface to the first edition</i>	xxi
<i>Preface to the second edition</i>	xxiii
<i>Online resources</i>	xxvi

PART I LAYING THE FOUNDATIONS FOR ANALYSIS **1**

1 Thinking and working qualitatively **5**

Chapter objectives	6
1.1 Thinking qualitatively	6
1.2 Qualitative methodologies (and methods)	10
1.3 Working qualitatively: pathways through analysis	14
1.4 Working qualitatively: using software	20
1.5 Working qualitatively: implications for analysis	22
1.6 Writing about working qualitatively	25
Further reading	25

2 Foundations for thinking and working qualitatively **27**

Chapter objectives	28
2.1 Making the implicit explicit	28

2.2 Ontological and epistemological perspectives	29
2.3 Inquiry paradigms used by qualitative researchers	31
2.4 Epistemologically informed methods?	42
2.5 Logic and argument: pathways to drawing inferences	44
2.6 Applying deterministic, probabilistic, and mechanistic logic in inferring causation	49
2.7 Concluding comments	51
2.8 Writing about foundations	52
Further reading	52
3 Design that supports analysis	55
Chapter objectives	56
3.1 Design: giving form to ideas	56
3.2 Focusing the study: what do you want to achieve?	59
3.3 Developing research questions	73
3.4 Design for data that can be analysed	74
3.5 Relationships with participants	80
3.6 Design for quality and credibility of conclusions	83
3.7 Concluding comments: a cohesive design?	85
3.8 Writing about design	87
Further reading	88
4 Managing and preparing data for analysis	91
Chapter objectives	92
4.1 Before data collection	92
4.2 Keeping organised, accessible, and useful data records	93
4.3 Recording and preparing data for analysis	96
4.4 The importance of context	111
4.5 Recording sample details for analysis	114
4.6 Checks and balances for data sources	120
4.7 Managing relationships in the research team	121
4.8 Writing about data management	122
Further reading	122
PART II FUNDAMENTALS OF ANALYSIS: WORKING WITH DATA	123
How I use the terms code, category, and concept	124
Code or connect?	125
5 Read, reflect, and connect: initial explorations of data	127
Chapter objectives	128
5.1 Read, and read again	128

5.2 Write as you read or review	129
5.3 Purposeful play: preliminary explorations of each data source	134
5.4 Exploring context	149
5.5 Involving participants in early analysis	151
5.6 Refocus, ready for the next phase	151
5.7 Writing about preliminary analysis	153
Further reading	154
6 Coding as an analytic strategy	155
Chapter objectives	156
6.1 Using codes to work with data	156
6.2 Approaches to coding	162
6.3 Naming codes	165
6.4 Coding to capture substance and meaning	168
6.5 Issues of validity and reliability in coding	183
6.6 Concluding comments	189
6.7 Writing about coding processes	189
Further reading	190
7 Tools to manage the coding process	191
Chapter objectives	192
7.1 Preparing for the task of coding	192
7.2 Pencil-and-paper strategies for coding	195
7.3 Interactive coding with qualitative software	199
7.4 Developing a coding system	206
7.5 Creating a codebook	214
7.6 Machine coding of text content – promise or poison?	216
7.7 Managing the process of coding	226
7.8 Concluding comments	228
7.9 Writing about codes	229
Further reading	229
8 Codes, themes, and descriptive writing	231
Chapter objectives	232
8.1 Describing coded categories and concepts as an analytic step	232
8.2 Combining, connecting, and focusing codes	237
8.3 Theming participant experience: lessons from phenomenology	245
8.4 Writing descriptively to build on codes and themes	248
8.5 Concluding comments	259
8.6 Writing about your use of code or theme-based/descriptive methods	259
Further reading	260

9 Working with cases to build understanding and explanation	261
Chapter objectives	262
9.1 Strategies for learning from cases	262
9.2 Comparing and relating cases	273
9.3 Building explanatory theory – one case at a time	284
9.4 Concluding comments	294
9.5 Writing about your use of case-based methods	294
Further reading	295
10 Learning from stories, accounts, and conversations	297
Chapter objectives	298
10.1 Learning from stories and accounts	298
10.2 Components of stories and accounts	303
10.3 Participant narratives – making meaning of experience	310
10.4 Deconstructing the storyline	315
10.5 Tracing causation through narrative	316
10.6 Learning from discourse: the intersubjective space	319
10.7 Interaction in focus group data	325
10.8 Concluding comments	328
10.9 Writing about your use of narrative and discourse methods	328
Further reading	329
11 Analysing visual data	331
Chapter objectives	332
11.1 The nature of visual data	332
11.2 Using visual data sources in qualitative research	333
11.3 Approaches to the analysis of visual data	338
11.4 Documenting production and ‘biography’	338
11.5 Describing the visual image	339
11.6 Interpreting image content	348
11.7 Contributions from linguistic methodologies	352
11.8 Considering audience	357
11.9 Analysing video and film	359
11.10 Computer technology and visual analysis	364
11.11 Concluding comments	365
11.12 Writing about visual analysis	366
Further reading	366
12 Comparative analyses using coded data	369
Chapter objectives	370
12.1 Why compare?	370

12.2	Tools for comparative analyses	373
12.3	Exploring when, how, or for whom experience varies	380
12.4	Final reflection: comparison as a means rather than an end	388
12.5	Writing about comparisons	389
	Further reading	389
PART III RECONSTRUCTION, CONNECTION, AND COHERENCE		391
13	Exploring, seeing, and investigating connections in data	393
	Chapter objectives	394
13.1	Build on foundational work	394
13.2	Write your way to deeper awareness	396
13.3	Draw to spark ideas about relationships	399
13.4	Interrogate your coding system	410
13.5	Build explanatory theory	425
13.6	Concluding comments	430
13.7	Writing about exploring and testing relationships in data	431
	Further reading	431
14	Elaborating concepts, developing theory	433
	Chapter objectives	434
14.1	Elaborating and theorising concepts	434
14.2	From concepts to theory	446
14.3	Concluding comments	455
14.4	Writing about concepts and theory development	455
	Further reading	456
15	Realising coherent understanding	459
	Chapter objectives	460
15.1	Framing coherence	460
15.2	'Aha!' – or slowly dawning realisation?	463
15.3	Shapes of coherence: what might yours look like?	467
15.4	Making warranted assertions	484
15.5	In conclusion: tips and tricks for bringing it together	487
15.6	Writing about results and conclusions	489
	Further reading	490
16	Defending and extending: issues of quality and significance	491
	Chapter objectives	492
16.1	Quality in qualitative research	492
16.2	Generalisation and transferability	501

16.3 Theoretical extension	503
16.4 Audiences and representation	508
16.5 A final reflection	514
16.6 Writing about quality and significance	514
Further reading	515
