

# DETAILED CONTENTS

Preface xxi

Acknowledgments xxviii

## **PART I: INTRODUCTION** 1

### **1** Introduction to Educational Research 2

Why Study Educational Research? 4

Areas of Educational Research 5

Examples of Educational Research 8

General Kinds of Research 9

    Basic and Applied Research 9

    Evaluation Research 10

    Action Research 11

    Orientational Research 11

Sources of Knowledge 12

    Experience 12

    Reasoning 13

The Scientific Approach to Knowledge Generation 14

    Dynamics of Science 14

    Basic Assumptions of Science 15

    Scientific Methods 17

    Theory 18

    The Principle of Evidence 20

Objectives of Educational Research 21

Overview of This Book 25

Summary 26

Key Terms 26

Discussion Questions 26

Research Exercises 27

Relevant Internet Sites 27

Recommended Reading 28

### **2** Quantitative, Qualitative, and Mixed Research 29

Characteristics of the Three Research Paradigms 33

Quantitative Research Methods: Experimental  
and Nonexperimental Research 38

Variables	39
Experimental Research	41
Nonexperimental Research	43
Qualitative Research Methods	48
Phenomenology	48
Ethnography	49
Narrative Inquiry	49
Case Study Research	50
Grounded Theory	50
Mixed Research (or Mixed Methods Research)	51
The Advantages of Mixed Research	51
Our Research Typology	52
Summary	53
Key Terms	53
Discussion Questions	54
Research Exercises	54
Relevant Internet Sites	55
Recommended Reading	55

### **3** Action Research for Lifelong Learning

57

Defining Action Research	58
Origins of Action Research	59
Basic Scientific Research Versus Action Research	62
Types of Action Research	64
The Cycle of Action Research	68
Strengths and Weaknesses of Action Research	72
Action Research Journaling	73
Action Research in the Remaining Chapters of This Book	74
Summary	75
Key Terms	75
Discussion Questions	76
Research Exercises	76
Relevant Internet Sites	76
Recommended Reading	77
Note	77

## **PART II: PLANNING THE RESEARCH STUDY**

79

### **4** How to Review the Literature and Develop Research Questions

80

Sources of Research Ideas	82
Everyday Life	82
Practical Issues	82
Past Research	83
Theory	84

Ideas That Can't Be Resolved Through Empirical Research	85
Review of the Literature	86
Literature Review for Quantitative Research Studies	86
Literature Review for Qualitative Research Studies	87
Literature Review for Mixed Research Studies	88
Sources of Information	89
Feasibility of the Study	90
Statement of the Research Problem	90
Stating a Quantitative Research Problem	91
Stating a Qualitative Research Problem	92
Stating a Mixed Research Problem	93
Statement of the Purpose of the Study	93
Statement of Purpose in a Quantitative Study	94
Statement of Purpose in a Qualitative Study	94
Statement of Purpose in a Mixed Methods Study	95
Statement of Research Questions	96
Statement of a Quantitative Research Question	96
Statement of a Qualitative Research Question	97
Statement of Research Questions in Mixed Research	98
Formulating Hypotheses	99
Consumer Use of the Literature	101
Action Research Reflection	106
Summary	106
Key Terms	107
Discussion Questions	107
Proposal Exercises	107
Relevant Internet Sites	108
Recommended Reading	108

## 5

### How to Write a Research Proposal

109

Framework of the Research Proposal	111
Strategies for Writing Each Section of the Research Proposal	111
Introduction	113
Method	113
Research Participants	114
Design	114
Apparatus and/or Instruments	115
Procedure	116
Data Analysis	118
Abstract	118
Action Research Reflection	119
Summary	119
Key Terms	120
Discussion Questions	120
Proposal Exercise	120

- Relevant Internet Sites 120
- Recommended Reading 121

## 6

### Research Ethics

122

- What Are Research Ethics? 124
- Ethical Concerns 125
  - Relationship Between Society and Science 125
  - Professional Issues 126
  - Treatment of Research Participants 128
- Ethical Guidelines for Research With Humans 130
  - Informed Consent 131
  - Informed Consent and Minors as Research Participants 134
  - Passive Versus Active Consent 135
  - Additional Consent 137
  - Deception 137
  - Freedom to Withdraw 138
  - Protection From Mental and Physical Harm 138
  - Confidentiality, Anonymity, and the Concept of Privacy 139
- Institutional Review Board 140
- Ethical Issues in Electronic Research 145
  - Informed Consent and Internet Research 146
  - Privacy and Internet Research 146
  - Debriefing and Internet Research 147
- Ethical Issues in Preparing the Research Report 147
  - Authorship 147
  - Writing the Research Report 148
- Action Research Reflection 149
- Summary 150
- Key Terms 151
- Discussion Questions 151
- Research Exercises 152
- Proposal Exercises 152
- Relevant Internet Sites 153
- Recommended Reading 153

## PART III: FOUNDATIONS OF RESEARCH

155

## 7

### Standardized Measurement and Assessment

156

- Defining Measurement 158
- Scales of Measurement 158
  - Nominal Scale 159
  - Ordinal Scale 159
  - Interval Scale 160
  - Ratio Scale 161
- Assumptions Underlying Testing and Assessment 162

Identifying a Good Test or Assessment Procedure	163
Overview of Reliability and Validity	163
Reliability	164
Validity	170
Using Reliability and Validity Information in Your Research	176
Educational and Psychological Tests	177
Intelligence Tests	177
Personality Tests	178
Educational Assessment Tests	179
Sources of Information About Tests	182
Action Research Reflection	183
Summary	184
Key Terms	184
Discussion Questions	185
Research Exercises	185
Proposal Exercises	186
Relevant Internet Sites	186
Recommended Reading	187
Notes	187

## 8

### How to Construct a Questionnaire

189

What Is a Questionnaire?	190
Principles of Questionnaire Construction	192
Principle 1. Make sure the questionnaire items match your research objectives.	192
Principle 2. Understand your research participants.	193
Principle 3. Use natural and familiar language.	193
Principle 4. Write items that are clear, precise, and relatively short.	194
Principle 5. Do not use “leading” or “loaded” questions.	195
Principle 6. Avoid double-barreled questions.	196
Principle 7. Avoid double negatives.	196
Principle 8. Determine whether an open-ended or a closed-ended question is needed.	197
Principle 9. Use mutually exclusive and exhaustive response categories for closed-ended questions.	199
Principle 10. Consider the different types of response categories available for closed-ended questionnaire items.	200
Principle 11. Use multiple items to measure abstract constructs.	206
Principle 12. Consider using multiple methods when measuring abstract constructs.	207
Principle 13. Use caution if you reverse the wording in some of the items to prevent response sets in multi-item scales.	208
Principle 14. Develop a questionnaire that is properly organized and easy for the participant to use.	208
Principle 15. Always pilot test your questionnaire.	211
Putting It All Together	213
Action Research Reflection	218
