Introduction	9
/Chapter 1/	
Theoretical framework	13
1.1 Professional vision	14
1.2 Practice-based education of future teachers	16
1.2.1 The conception of quality teaching	18
1.2.2 Reflective tasks around videos.	22
1.3 Video-interventions and their influence on pre-service teachers' noticing and knowledge-based reasoning.	25
1.4 Summary and terminology used in the book	29
/Chapter 2/	
Video-interventions – design and overview of their implementation	31
2.1 Design of the video-interventions	32
2.1.1 Selection of videos for the 'public video' intervention	32
2.1.2 The PSTs' own lessons for the 'own video' intervention	33
2.1.3 Homework tasks	34
2.1.4 In-session work	36
2.2 Overview of interventions	37
2.3 'Public video' interventions for each subject group	40
2.3.1 Elementary Art Education (EAE).....	41
2.3.2 Elementary Social Studies (ESS).....	47
2.3.3 Biology (BI)	53
2.3.4 English Language (EL).....	58
2.3.5 Mathematics (MA).....	65
2.4 'Own video' interventions for each subject group	73
2.4.1 Elementary Art Education (EAE).....	74
2.4.2 Elementary Social Studies (ESS).....	79
2.4.3 Biology (BI)	83
2.4.4 English Language (EL).....	86
2.4.5 Mathematics (MA).....	88
2.5 Summary	92
/Chapter 3/	
Focus on noticing and knowledge-based reasoning (Study 1)	95
3.1 Literature review	96
3.1.1 'Own video' versus 'public video' interventions	96
3.1.2 Noticing expert phenomena and PSTs' alignment with the experts' views	97
3.2 An embedded study: Identification of expert phenomena	99

3.2.1	Participants – experts	99
3.2.2	Data analysis	99
3.2.3	Results: Expert phenomena.	103
3.3	Research design of Study 1	106
3.3.1	Participants.	106
3.3.2	Research instruments.	107
3.4	Participants according to the initial questionnaire	109
3.4.1	Future elementary teachers (EAE, ESS).	109
3.4.2	Future lower and upper secondary teachers (BI, EL, MA)	110
3.5	Analysis of data.	112
3.5.1	Noticing and knowledge-based reasoning (Study 1a).	112
3.5.2	Expert-like noticing and reasoning (Study 1b).	116
3.6	Results	119
3.6.1	Noticing and knowledge-based reasoning (Study 1a).	119
3.6.2	Noticing and reasoning about expert phenomena (Study 1b)	122
3.6.3	Pre-service teachers' noticing of and reasoning about the expert phenomena	126
3.7	Discussion and conclusions.	130
3.7.1	Noticing and knowledge-based reasoning (Study 1a).	130
3.7.2	Noticing of and reasoning about expert phenomena (Study 1b).	131

/Chapter 4/

	Focus on pre-service teachers' voices (Study 2)	135
4.1	Literature review.	135
4.2	Methodology.	138
4.2.1	Post-questionnaire	138
4.2.2	Analysis of data	138
4.3	Results	140
4.3.1	Professional self-development.	141
4.3.2	The structure and organisation of the video-interventions	147
4.4	Discussion and conclusion	154
4.4.1	The PSTs' perception of their development during the video-interventions.	154
4.4.2	Learning to notice and development of knowledge-based reasoning?	155
4.4.3	The PSTs' views about the structure and organisation of video-interventions	156

/Chapter 5/

	Focus on individual pre-service teachers (Study 3)	159
5.1	Elementary Art Education: Olive and Paula learn differently	161
5.1.1	Olive learns to notice details and focuses on pupils	161
5.1.2	Paula becomes aware of the gaps in her expert knowledge.	166
5.1.3	Conclusion for Olive and Paula	172

5.2 Elementary Social Studies: Mary and Rosa's different approaches	
to teaching influence their learning in the video-intervention	173
5.2.1 Mary and Rosa develop their conception of social studies teaching.	174
5.2.2 How Mary and Rosa worked during the video-intervention	175
5.2.3 Mary and Rosa perceive benefits of their participation	
in the video-intervention differently	181
5.2.4 Conclusion for Mary and Rosa	182
5.3 Biology: Michelle and Rachel benefit differently in the video-intervention	183
5.3.1 Michelle and Rachel differ in their approaches to the work	
within the video-intervention and their beliefs about what they learnt	183
5.3.2 Michelle and Rachel notice differently in the hot	
and the distanced reflections	185
5.3.3 Michelle and Rachel differ in their noticing	
and knowledge-based reasoning	188
5.3.4 Conclusion for Michelle and Rachel	192
5.4 English Language: Types of videos influence Phoebe and Olga's learning	193
5.4.1 Phoebe develops her skills through other PSTs' reflections	195
5.4.2 Olga develops her skills through her own reflections	199
5.4.3 Conclusion for Phoebe and Olga	203
5.5 Mathematics: Interactions with peers influence Randy and Hilary's learning	204
5.5.1 Randy changes his views	206
5.5.2 Hilary learns to notice details	210
5.5.3 Conclusion for Randy and Hilary	213
5.6 Summary and conclusions.	214

/Chapter 6/

Focus on development in the ability to reflect	
in the 'own video' setting (Study 4)	219
6.1 Elementary Art Education: Alma changes her views	
based on her peers' critical feedback	220
6.1.1 Alma's preparation and conducting of the lesson	221
6.1.2 Developments in Alma's reflection on her lesson.	221
6.1.3 Conclusion for Alma	225
6.2 Elementary Social Studies: The PSTs' fears and doubts decrease	225
6.2.1 Fear of indoctrination	226
6.2.2 Doubts about the effectiveness of the planned lesson	
for the acquisition of knowledge.	228
6.2.3 Mediation of the difficulty of the topic for pupils	229
6.2.4 Conclusion for the Elementary Social Studies group	231
6.3 Biology: The PSTs change their views of the lesson when confronted	
with the views of others.	232
6.3.1 Issues related to management and pedagogy in Camilla's lesson	234
6.3.2 Subject-specific aspects of Camilla's lesson.	236

6.3.3 Issues from Camilla's lesson considered noteworthy by the PSTs	239
6.3.4 Conclusion for the Biology group	240
6.4 English Language: Nel's reflective approach develops thanks	
to the tasks and her peers' and the course leader's input	241
6.4.1 Nel's hot reflection and work with her experimental lesson	242
6.4.2 Nel's reflection on a lesson taught by her peer	244
6.4.3 Nel's revisiting of the experimental lessons and revision of the plan	247
6.4.4 Nel's perception of her learning in the video-interventions	249
6.4.5 Conclusion for Nel	250
6.5 Mathematics: Asking pupils to justify is the missing variable in Megan's lesson	251
6.5.1 Megan's teaching reflections soon after the lesson	251
6.5.2 Megan's lesson reflection with the help of the video-recording	253
6.5.3 Important moments in Megan's lesson	256
6.5.4 Conclusion for the Mathematics group	258
6.6 Summary of case studies	259
/Chapter 7/	
Conclusions, limitations and implications	261
7.1 Results	262
7.2 Implications	266
7.3 Limitations and further research	267
7.4 Conclusions	269
References	273
Appendices	287
A1. Initial questionnaire (pre-Q)	287
A2. Post-questionnaire (post-Q)	290
A3. Delayed questionnaire (del-Q)	290
A4. Expert phenomena identified in the pre- and post-task lessons	
and their brief descriptions	291
A5. Possible interpretative framework, version adapted for mathematics	296
Abbreviations	299
