

	INTRODUCTION	7
1	OBJECTIVES	9
2	METHODS AND DATA.....	11
2.1	Methods	11
2.2	Data.....	12
2.3	Software	12
2.4	Area of interest	13
3	STATE OF ART	15
3.1	Thermal infrared remote sensing.....	15
3.1.1	Thermal infrared wavelength emittance	15
3.1.2	Vignetting, atmospheric and emissivity corrections	18
3.1.3	Leading applications in TIR remote sensing	19
3.2	Thermal imaging for urban climatology	20
3.2.1	Surface urban heat island	22
3.2.2	Heat waves and health impact of heat.....	22
3.3	Thermal data visualization.....	24
3.3.1	Thermal data visualization in the scientific literature	25
3.3.2	Thermal data visualization in cartography and GIS	27
4	OLOMOUC AIRBORNE THERMAL DATA ACQUISITION	31
4.1	Olomouc flight campaign, 10 th July 2016.....	31

4.2	Image processing.....	33
4.2.1	Radiometric correction	33
4.2.2	Atmospheric corrections.....	36
4.2.3	Emissivity corrections.....	37
4.3	Photogrammetric processing	38
4.4	Final product assessment.....	40
5	DESCRIBED ANALYSES CARRIED OUT ON OLOMOUC THERMAL MOSAICS.....	43
5.1	Thermal regime of materials in an urban environment.....	43
5.2	Investigation of microclimate using TURN method.....	48
5.3	A typology based on temperature change.....	52
5.3.1	Tertile-based typology.....	52
5.3.2	Quartile-based typology.....	54
5.3.3	Quantile-based typology summary.....	55
6	DATA FUSION ANALYSES CARRIED OUT ON OLOMOUC THERMAL MOSAICS.....	57
6.1	Investigation of temperatures on different vertical levels.....	57
6.1.1	Description of buildings dataset and its corrections.....	58
6.1.2	Ground-rooftop and verticality analyses results	59
6.2	Local Climate Zones as the basis for zonal analysis	62
6.3	Temperature evaluation based on open data.....	69
6.3.1	Urban Atlas 2012.....	69
6.3.2	CORINE Land Cover 2018.....	72
7	RESULTS.....	75
8	DISCUSSION	79
9	CONCLUSION.....	83
	REFERENCES.....	85
	LIST OF ABBREVIATIONS	91
	APPENDICES	93
