Section One Introduction to Telemental Health	1
1 Introduction	3
<i>Carolyn L. Turvey and Kathleen Myers</i>	
Introduction	3
The Telemental Health Imperative	3
Current Trends Supporting the Broader Adoption of Telemental Health	4
Organization of This Book	7
References	8
2 Telemental Health as a Solution to the Widening Gap Between Supply and Demand for Mental Health Services	11
<i>Michael Flaum</i>	
Workforce Shortages in Mental Health: The Example of Psychiatry	11
What Is the Current Supply of Psychiatrists in the United States?	11
Rate of Growth in Psychiatrists and All Physicians Over Time	11
The Psychiatry Pipeline: Trends in Residency Training	14
The Aging-Out Effect	14
What Is the Current Need or Demand for Psychiatrists in the United States?	15
Quantifying the need for different kinds of providers of mental health services	16
The Distribution of Psychiatrists: The Iowa Example	18
Telepsychiatry as a Key Strategy for Closing the Gap	19
Workforce Issues of Psychology Health Service Providers	21
Conclusions: The Optimal Use of Telemental Health to Address Workforce Shortages	23
References	24

Section Two	Developing a Therapeutic Space During Telemental Health	27
3	Establishing Therapeutic Rapport in Telemental Health	29
	<i>Dehra Glueck</i>	
	Introduction	29
	Review of the Literature on Rapport and Alliance	30
	Technological Considerations Impacting Rapport	32
	Establishing Therapeutic Rapport with the Patient	34
	Explaining Telemental Health to Patients	36
	Developing Rapport with Special Populations	38
	Establishing Therapeutic Rapport with the Referring Clinic	40
	Building Rapport with Staff: An Open-Door Policy	42
	The Importance of a Clinical Coordinator in Facilitating Rapport at the Patient Site	43
	Establishing Rapport with the Broader Community	44
	Conclusion	44
	References	45
4	Ethical Considerations in Providing Mental Health Services Over Videoteleconferencing	47
	<i>Eve-Lynn Nelson, Kathy Davis and Sarah E. Velasquez</i>	
	Introduction	47
	Applying Ethical Principles in Telemental Health	48
	Principle A: Beneficence and Nonmaleficence	48
	Principle B: Fidelity and Responsibility	51
	Principle C: Integrity	53
	Principle D: Justice	54
	Principle E: Respect for People's Rights and Dignity	55
	Concerns Specific to Research	56
	Emerging VTC-Related Technologies	57
	Home Telehealth and VTC	58
	Mobile Devices and VTC	58
	Integration of Technologies	59
	Conclusion	59
	References	60
5	Integrating Culturally Appropriate Care into Telemental Health Practice	63
	<i>Elizabeth Brooks, Garret Spargo, Peter Yellowlees, Patrick O'Neil and Jay H. Shore</i>	
	Culturally Appropriate Care and Telemental Health: An Introduction	63
	What Is Culturally Appropriate Care?	63
	The Use of Telemental Health with Rural, Distant, and Underserved Populations	64
	The Interplay Between Culture and Telemental Health	65

Prior Research Examining Telehealth with Cultural Subgroups	65
American Indian Veteran Telemental Health Clinics	66
Telehealth Treatment with the Elderly, Child, and Adolescent Populations	67
Treatment with Linguistically Diverse Populations	67
Treatment with Other Cultural Subgroups	68
The Appropriateness of Telemedicine	69
Understanding the Patient Culture and Community	69
Community Leaders and Key Informants	70
Local Outreach Workers	70
Utilizing Local Information	71
Incorporating the Community for Effective Telemental Health Services	71
Establishing Local Partnerships and Collaborations	72
Dual Relationships in Rural Areas	72
Technological Considerations When Working with Diverse Populations	73
Communication	73
Technological Knowledge and Comfort	75
Conclusion	76
Case Studies	76
The Use of Talking Circles in Telemental Health Group Therapy	76
Using Telemental Health to Increase Access in a Medically Underserved Area	77
The Use of Asynchronous Technology to Bridge Language Barriers	78
References	79
6 Managing Risk and Protecting Privacy in Telemental Health: An Overview of Legal, Regulatory, and Risk-Management Issues	83
<i>Greg M. Kramer, Matt C. Mishkind, David D. Luxton and Jay H. Shore</i>	
Introduction	83
Legal and Regulatory Issues	84
Licensure	84
Malpractice	91
Credentialing and Privileging	94
Security and Privacy Considerations	96
Data Security for Electronic Protected Health Information	97
Special Considerations for Mobile Devices in TMH Care	97
Other Privacy Considerations	98
Clinical Practices to Manage Risk	99
Informed Consent	99
Safety Plans and Emergency Management	100
Risk Issues in Home-Based TMH	102
Conclusion	103
References	104

Section Three	Establishing a Telemental Health Practice	109
7	Business Aspects of Telemental Health in Private Practice	111
	<i>Dehra Glueck</i>	
	Introduction	111
	Choosing a Telemedicine Group or Technology-Only Support	112
	Technology-Only Models	113
	Group-Practice Models	115
	Institution-Based Practice Model	115
	Direct-to-Consumer Model	116
	Deciding on the Model of Care—Direct Care Versus Consultation	117
	Direct Care—Evaluation of Patients	117
	Direct Care—Ongoing Treatment of Patients	118
	Consultative Care	118
	Deciding on a Model: Strength and Needs Assessments	119
	Financial Feasibility	120
	Understanding Costs: Patient and Provider Perspective	120
	Impact of Patient Volume on Costs	121
	Impact of No-Show Appointments on Costs	122
	Reimbursement: Insurance	122
	Reimbursement: Private Payment	123
	Reimbursement: Contracted Time	124
	Practical Considerations—Malpractice, Licensure, and Consent	124
	Informed Consent and Standard of Care	125
	Staffing	126
	Sharing Records	126
	Technology—Selection, Use, and Technical Support	127
	Technology: Bandwidth	128
	Technical Support	129
	Building a Referral Base and Growing a Practice	130
	Lifestyle Benefits	130
	Conclusion	131
	References	131
8	Technology Options for the Provision of Mental Health Care Through Videoteleconferencing	135
	<i>Garret Spargo, Ashley Karr and Carolyn L. Turvey</i>	
	Introduction	135
	Standards-Based Versus Consumer-Grade Software	136
	Hardware-Based Codecs	137
	Software-Based Applications	137
	Mobile	137
	Dedicated, Direct Connections to VTC Equipment and End Points	138
	Bandwidth	138
	Impact of Cloud Computing	139

Audio	140
Microphones	140
Echo Cancellation	142
Video	142
Video Standards	142
H.264	143
Screen-in-Screen	143
Camera Options and Clinical Implications	144
Screen Size	144
Video Issues and Troubleshooting	146
Packet Loss	147
Technology and Privacy	147
HIPAA Compliance and Videoteleconferences	147
What Behaviors Are Important to Maintain Privacy	148
Security Standards	150
Backup Technologies and Protocols Should VTC Equipment Fail	150
Conclusion	150
References	151
Section Four Improving Access for Special Populations Through Telemental Health	153
9 Telemental Health in Primary Care	155
<i>Avron Kriechman and Caroline Bonham</i>	
The Rationale for Collaborative and Integrative Care	155
A Continuum of Collaboration	156
Four Key Concepts in Collaborative Care	156
Tailoring TMH to Models of Care	157
TMH Consultation and Collaboration for Children, Adolescents, and Their Families	159
Primary Care Sites	159
School-Based Health Centers	161
TMH Consultation and Collaboration for Adults	161
Direct Care Models	162
Consultation Care Model	162
Collaborative Care Models	163
Asynchronous Telepsychiatry	165
Cultural Considerations	166
Conclusion	167
References	167
10 Geriatric Telemental Health	171
<i>Thomas Sheeran, Jennifer Dealy and Terry Rabinowitz</i>	
Introduction	171

The Need for Better Geriatric Mental Health Services	172
Barriers to Mental Health Care for the Elderly	174
Studies on Geriatric Telemental Health Services	176
Acceptability of Telemental Health Among the Elderly	177
Telepsychiatry in Nursing-Home Settings	180
Remote Telemonitoring and Geriatric Mental Health Care	181
Suicidality	183
Case Presentations: Three Examples of the Use of Telehealth with Geriatric Populations	183
Telepsychiatry in Nursing-Home Settings	184
Tele-DCM for Elderly Rehabilitation Patients	187
Telemonitor-Based Depression Care Management in Home Care	188
Conclusions	189
Acknowledgment	189
References	189
11 Child and Adolescent Telemental Health	197
<i>L. Lee Carlisle</i>	
Introduction	197
Literature Review	198
Developmental and Clinical Considerations	198
The Practice of Child and Adolescent Telemental Health	202
Models of Care and Clinical Practice: Primary Care	202
Models of Care and Clinical Practice: Other Sites of Practice	204
Optimizing the Virtual Clinical Encounter with Children and Families	205
Treatment in Child and Adolescent Telemental Health	210
Telepsychiatry in a Youth's System of Care	212
Summary and Conclusions	216
References	217
12 Rural Veterans and Telemental Health Service Delivery	223
<i>Leslie Morland and Karen Kloezeman</i>	
Introduction	223
Rural Veteran Population	223
Mental Health Disorders in Veterans	224
Rural–Urban Health Disparities in Veterans	225
Access to Care	226
VA Health-Care Service Utilization	226
Barriers to Access to Care	229
Limitations in the Access to Care Literature	232
TMH and the Department of Veterans Affairs	234
Clinical Effectiveness of Psychotherapies Delivered via CVT	235
Considerations Associated with CVT Delivery	235
Challenges Associated with CVT Delivery	238
Limitations in the CVT Literature	240

Future Directions	240
Conclusions	241
References	242
13 Videoteleconferencing in Forensic and Correctional Practice	251

Videoteleconferencing Health in Forensic and Correctional Practices	251
The Development of Videoteleconferencing in Forensic and Correctional Settings	251
Barriers to Health Care	253
How Can VTC Improve Services in Criminal Justice Settings?	255
Demonstrating the Effectiveness of VTC	256
Challenges Facing VTC in Corrections	260
The Need for Specialty Best Practice Guidelines	261
Future Directions	262
Spotlight on TMH and Telelaw Programs	265
Summary	267
References	267
Section Five Assessment and Intervention	273
14 Special Considerations in Conducting Neuropsychology Assessment over Videoteleconferencing	275
<i>C. Munro Cullum and Maria C. Grosch</i>	
Background and Scope	275
Why Teleneuropsychology?	276
Limiting Factors	276
Availability of Equipment	276
Data Transmission Speeds	277
VTC Environment	278
Setting Up Teleneuropsychology Services	279
Evidence for VTC-Based Diagnosis and VTC-Based Cognitive Assessment	280
Consumer Satisfaction with VTC-Based Services	286
Practical and Ethical Issues in Teleneuropsychology	287
Mobile Teleneuropsychology Applications	288
Future Directions	289
Summary	289
References	290
15 Special Considerations for Conducting Psychotherapy over Videoteleconferencing	295
<i>Eve-Lynn Nelson, Angela Banitt Duncan and Teresa Lillis</i>	
Considerations for Conducting Psychotherapy over VTC	295
Why Deliver Psychotherapy over VTC?	296

Where is Psychotherapy over VTC Delivered?	297
Who Participates in Psychotherapy over VTC?	298
Clients and Family	298
Therapists and Trainees	299
VTC Coordinator	300
Multiple Informants	300
What Constitutes Psychotherapy over VTC?	301
Depression	301
Anger Management	302
Posttraumatic Stress Disorder	302
Other Anxiety Disorders	303
Eating Disorders	304
Substance Abuse	305
Additional Therapy Strategies over VTC	306
How is Psychotherapy over VTC Implemented?	306
Conclusion	309
References	310
16 Special Considerations for Conducting Psychopharmacologic Treatment over Videoteleconferencing	315
<i>Carol M. Rockhill</i>	
Introduction	315
Background: The Case for Telepsychiatry	316
Access to Care	316
Establishing a Therapeutic Relationship	317
Feasibility and Acceptability of Telepsychiatry	318
Clinical and Financial Models of Telepsychiatry Practice	319
Best Practices for Conducting Psychopharmacology via Telepsychiatry	321
Practice Standards and Guidelines	322
Decisions Specific to Prescribing: Consenting Patients	323
Decisions Specific to Prescribing: Choice and Logistics of Medication Provision	323
e-Prescribing	325
Current Controversy Regarding Prescribing Through VTC	326
Conclusions	326
References	340
Section Six Next Steps in Disseminating Telemental Health and Establishing an Evidence Base	345
17 Clinically Informed Telemental Health in Post-Disaster Areas	347
<i>Eugene F. Augusterfer</i>	
Introduction	347

Literature Review and Background	348
Overview	348
Impact of Disasters on Mental Health	349
The Importance of Sustainable Care	350
The Role of Telemental Health in Sustainable Care	351
The Literature Supporting Telemental Health in Disaster Response	351
Case Examples of Disaster and a Potential Role for Telemental Health	352
Case Example I: Hurricane Katrina, Natural Disaster	353
Case Example II: Haiti, International Disaster	356
Case Example III: Kenya, Armed Conflict	359
Lessons Learned	362
Future Directions	363
Conclusion	363
References	364
