

Contents

We begin with the results of the global survey, an explanation of the design thinking process, and a brief checklist. In addition, warm-ups are presented that loosen up the mood and fit the respective situation. In terms of content, the presentation of the tools follows the logic of the design thinking micro-process. At the end of the Toolbox, we will present initiatives that show how design thinking can herald in a cultural transformation in the context of the company and beyond.
