

CONTENTS

1. An Introduction To Survey Errors	1
1.1 Diverse Perspectives on Survey Research	1
1.2 The Themes of Integration: Errors and Costs	6
1.3 The Languages of Error	6
1.4 Classifications of Error Within Survey Statistics	8
1.4.1 A More Restrictive View, Sampling Statistics	12
1.4.2 Total Survey Error	15
1.4.3 Other Error Terms in Survey Statistics	15
1.5 Terminology of Errors in Psychological Measurement	18
1.5.1 Estimating Validity	22
1.5.2 Other Notions of Validity	26
1.6 The Language of Errors in Econometrics	27
1.7 Debates About Inferential Errors	28
1.8 Important Features of Language Differences	30
1.9 Summary: The Tyranny of the Measurable	32
1.10 Summary and Plan of This Book	34
Appendix for Mathematical Presentation of Error Perspectives	38
1.A Classifications of Error Within Survey Statistics	38
1.B Terminology of Errors in Psychological Measurement	41
1.C The Language of Errors in Econometrics	46
2. An Introduction To Survey Costs	49
2.1 Rationale for a Joint Concern About Costs and Errors	49

- 2.2 Use of Cost and Error Models in Sample Design 50
- 2.3 Criticisms of Cost-Error Modeling to Guide Survey Decisions 53
- 2.4 Nonlinear Cost Models Often Apply To Practical Survey Administration 57
- 2.5 Survey Cost Models are Inherently Discontinuous 61
- 2.6 Cost Models Often Have Stochastic Features 63
- 2.7 Domains of Applicability of Cost Models Must Be Specified 72
- 2.8 Simulation Studies Might Be Best Suited to Design Decisions 76
- 2.9 Is Time Money? 77
- 2.10 Summary: Cost Models and Survey Errors 79
- 3. Costs And Errors Of Covering The Population 81**
 - 3.1 Definitions of Populations Relevant to the Survey 81
 - 3.2 Coverage Error in Descriptive Statistics 84
 - 3.3 An Approach to Coverage Error in Analytic Statistics 86
 - 3.3.1 Inferential Populations in Analytic Statistics 86
 - 3.3.2 Treatment of Inferential Populations in Survey Analysis 87
 - 3.3.3 A Link Between Coverage Error and Analytic Modeling 90
 - 3.4 Components of Coverage Error 95
 - 3.5 Coverage Problems with the Target Population of Households 99
 - 3.5.1 Coverage of Housing Units 100
 - 3.5.2 Coverage Errors for Persons Within Housing Units 108
 - 3.5.3 Telephone Number Frames for the Household Population 116

3.6	Measurement of and Adjustments for Noncoverage Error	119
3.6.1	Noncoverage Error Estimation	119
3.6.2	Multiplicity Sampling and Measurement	122
3.6.3	Multiple Frame Methods	124
3.6.4	The Half-Open Interval	127
3.6.5	Use of Post Survey Adjustments for Coverage Error	128
3.7	Survey Cost Issues Involving Coverage Error	130
3.8	Summary	131
4.	Nonresponse in Sample Surveys	133
4.1	Nonresponse Rates	135
4.1.1	Components of Unit Nonresponse	135
4.1.2	Nonobservation of Sample Units	136
4.1.3	Classification of Outcomes	139
4.2	Response Rate Calculation	140
4.3	Temporal Change in Response Rates	145
4.3.1	Ongoing Surveys of Government Survey Organizations	145
4.3.2	Ongoing Surveys of Academic Survey Organizations	154
4.3.3	Surveys Conducted by Commercial Agencies	154
4.4	Item Missing Data	156
4.5	Statistical Treatment of Nonresponse in Surveys	156
4.5.1	Properties of Components of Nonresponse Error	158
4.5.2	Statistical Models for Nonresponse	159
4.5.3	A Sequential Design Option Incorporating Nonresponse Concerns	172
4.6	Summary	182

5. Probing The Causes Of Nonresponse And Efforts To Reduce Nonresponse	185
5.1 Empirical Correlates of Survey Participation	186
5.1.1 Patterns of Being At Home	192
5.1.2 Demographic Characteristics of Refusers	201
5.2 Efforts by Survey Methodologists to Reduce Refusals	208
5.2.1 Contact with Sample Households Before the Survey Request	209
5.2.2 Descriptions of the Survey at Time of Introduction	213
5.2.3 Attempts to Increase the Benefits of Cooperation	215
5.2.4 Discussion of Attempts to Reduce Nonresponse from Refusals	217
5.3 Sociological Concepts Relevant to Survey Nonresponse	219
5.4 Psychological Attributes of Nonrespondents	222
5.4.1 The Literature on Altruism and Compliance	223
5.4.2 The Psychology of Persuasion	235
5.5 Summary	237
6. Costs And Errors Arising From Sampling	239
6.1 Introduction	239
6.2 The Nature of Sampling Error	240
6.3 Measuring Sampling Error	242
6.3.1 Nonprobability Samples	246
6.3.2 Comparing Probability and Nonprobability Samples	249
6.4 Four Effects of the Design on Sampling Error	252
6.4.1 Stratification	253
6.4.2 Probabilities of Selection	257
6.4.3 Clustering	259
6.4.4 Sample Size	267
6.4.5 Combinations of Sample Design Features	268

6.5	The Effect of Nonsampling Errors on Sampling Error Estimates	268
6.6	Measuring Sampling Errors on Sample Means and Proportions from Complex Samples	271
6.7	The Debate on Reflecting the Sample Design in Estimating Analytic Statistics	279
6.8	Reflecting the Sample Design When Estimating Complex Statistics	291
6.9	Summary	293
7.	Empirical Estimation Of Survey Measurement Error	295
7.1	A First Examination of Observational Errors Versus Errors of Nonobservation	295
7.2	Laboratory Experiments Resembling the Survey Interview	297
7.3	Measures External to the Survey	299
7.4	Randomized Assignment of Measurement Procedures to Sample Persons	304
7.4.1	Split Sample Experiments Concerning Measurement Error	307
7.4.2	Interpenetration for Estimation of Variable Measurement Error	311
7.4.3	Practical Problems with Randomization as a Procedure for Estimating Measurement Error	320
7.5	Repeated Measurements of the Same Persons	323
7.5.1	Reinterviews To Estimate Measurement Error	324
7.5.2	Multiple Indicators of the Same Characteristics Administered in the Same Questionnaire	329
7.5.3	Measuring Characteristics of the Interview Itself	337
7.5.4	Direct Measures of Cognitive Steps in Response Formation	341
7.5.5	Evaluating Repeated Measurements as a Procedure for Estimating Measurement Error	344

7.6	Summary of Individual Techniques of Measurement Error Estimation	348
7.7	Combinations of Design Features	350
7.7.1	Interpenetration for Measurement Bias Estimation and Interpenetration for Variable Interviewer Effect Estimation	350
7.7.2	Interpenetration of Interviewer Assignments and Reinterviews	351
7.7.3	Interpenetration of Interviewer Assignments and Multiple Indicators	352
7.8	Summary	353
8.	The Interviewer as a Source of Survey Measurement Error	357
8.1	Alternative Views on the Role of the Observer	357
8.2	The Role of the Survey Interviewer	359
8.3	Designs for Measuring Interviewer Variance	360
8.4	Interviewer Effects in Personal Interview Surveys	363
8.5	Interviewer Effects in Centralized Telephone Surveys	365
8.5.1	Magnitudes and Precision of Estimated Interviewer Effects	368
8.5.2	Stability of Interviewer Effect Estimates	368
8.6	Explaining the Magnitude of Interviewer Effects	374
8.6.1	The Influence of Question Form on Interviewer Effects	374
8.6.2	Effects of Interviewer Behavior Guidelines on Interviewer Variability	376
8.6.3	Effect of Computer-Assisted Telephone Interviewing (CATI) on Interviewer Variability	377
8.6.4	Interviewer Characteristics and Interviewer Effects	378
8.6.5	Respondent Characteristics and Interviewer Effects	379

8.7	Summary of Research on Interviewer Variance	380
8.8	Measurement of Interviewer Compliance With Training Guidelines	381
8.9	Experiments in Manipulating Interviewer Behavior	389
8.9.1	Effects of Interviewer Training	390
8.9.2	Experiments with Interviewer Feedback to Respondents	392
8.10	Social Psychological and Sociological Explanations for Response Error Associated with Interviewers	394
8.10.1	Effects of Interviewer Expectations	395
8.10.2	Demographic Characteristics of the Interviewer	398
8.11	Summary	404
9.	The Respondent as a Source of Measurement Error	407
9.1	Components of Response Formation Process	407
9.2	The Encoding Process and the Absence of Knowledge Relevant to the Survey Question	410
9.2.1	Respondent Rule Effects	414
9.2.2	Nonattitudes	417
9.3	Comprehension of the Survey Question	419
9.4	Retrieval of Information from Memory	420
9.4.1	Length of Recall Period	422
9.4.2	Saliency of Events to Be Recalled	430
9.4.3	Task Difficulty	432
9.4.4	Respondent Attention or Motivation	433
9.5	Judgment of Appropriate Answer	434
9.6	Communication of Response	436
9.6.1	Social Desirability Effects	437
9.6.2	Acquiescence, Yea-Saying, Nay-Saying, Response Tendencies	439

9.7 Sociological and Demographic Correlates of Respondent Error	441
9.8 Summary	445
10. Measurement Errors Associated With the Questionnaire	449
10.1 Properties of Words in Questions	450
10.2 Properties of Question Structure	460
10.2.1 Length of the Question	461
10.2.2 Open Versus Closed Questions	462
10.2.3 Number and Order of Response Categories in Fixed Alternative Questions	464
10.2.4 Explicit "Don't Know" Response Categories	468
10.2.5 Question Structure in Measurement of Sensitive Topics	471
10.2.6 Question Structure and Recall of Past Events	475
10.3 Properties of Question Order	477
10.3.1 Context Effects on Responses	478
10.3.2 Position of the Question in the Questionnaire	481
10.4 Conclusions About Measurement Error Related to the Questionnaire	482
10.5 Estimates of Measurement Error from Multiple Indicator Models	484
10.6 Cost Models Associated With Measurement Error Through the Questionnaire	490
10.7 Summary	497
11. Response Effects of the Mode of Data Collection	501
11.1 Two Very Different Questions About Mode of Data Collection	502
11.2 Properties of Media of Communication	507

11.3	Applying Theories of Mediated Communication to Survey Research	509
11.4	Findings from the Telephone Survey Literature	511
11.5	Interaction Effects of Mode and Other Design Characteristics on Responses	517
11.5.1	Social Desirability Effects on the Telephone	517
11.5.2	Cognitive Demands of the Survey Question and Mode	520
11.5.3	Mode Effects and Interviewer Effects	524
11.6	Survey Costs and the Mode of Data Collection	526
11.6.1	A Cost Model for a Centralized Telephone Facility	526
11.6.2	Empirical Data on Cost of Data Collection in Different Modes	533
11.7	Cost and Error Modeling with Telephone and Face to Face Surveys	539
11.7.1	Dual Frame Survey Design	539
11.7.2	Administrative Structures for Dual Frame, Mixed Mode Designs	540
11.7.3	An Example of a Dual Frame, Mixed Mode Design Simulation	544
11.8	Summary	551
	References	553
