Contributors	xiii
Preface	xv
Introduction	xvii

1. The Myxomycetes: Introduction, Basic Biology, Life Cycles, Genetics, and Reproduction

Harold W. Keller, Sydney E. Everhart, Courtney M. Kilgore

Introduction	1
Morphology of Fruiting Bodies	3
Fruiting Body Types	4
Myxomycete Terminology	9
Myxomycete Life Cycle Stages	28
Genetics and Reproduction	35
Acknowledgments	37
References	37

2. The History of the Study of Myxomycetes

Bruce Ing, Steven L. Stephenson

The Early Period	41
The First Scientific Studies	45
Arthur and Gulielma Lister	46
More Recent Studies in Europe	49
Studies in the United States	56
Studies Throughout the World	59
Future Studies of Myxomycetes	67
References	68

3. The Phylogeny of Myxomycetes

Dmitry V. Leontyev, Martin Schnittler

Introduction	83
Phylogenetic Revolution in Taxonomy	85
Marker Genes for Myxomycetes	86

Obtaining Sequences of Myxomycete DNA	88
How to Build a Tree?	90
Where are Myxomycetes in the Tree of Life?	92
Major Branches of the Myxomycete Tree	95
Morphology Versus Phylogeny	100
References	101
4. Genomics and Gene Expression in Myxomycetes	
<i>Dennis Miller, Ramesh Padmanabhan, Subha N. Sarcar</i>	
Introduction	107
Nucleolar DNA: Minichromosomes rDNA Genes	107
Chromosomes and Chromosomal DNA	108
Chromosome Number and Telomeres	109
Gene Content and Chromosomal DNA	110
The Mitochondrial RNA Polymerase Gene, an Example of Protein Coding Genes on Nuclear DNA	110
Small, Noncoding RNAs	112
tRNA Gene Structure	112
tRNA Anticodons, Codon/Anticodon Interactions, and the Genetic Code	113
Mitochondrial DNA in Myxomycetes	114
The Relationship of Myxomycetes Relative to Other Clades in the Amoebozoa Based on Mitochondrial DNA Characteristics	114
Comparison of the Mitochondrial DNA Genomes of Three Representative Amoebozoans	115
Mitochondrial Gene Expression in the Amoebozoa	118
Evolutionary Implications of mtDNA Structure and Features	123
Relationships Within the Myxomycetes Based on mtDNA Structure	123
Linear mF Mitochondrial Plasmid	126
Variation in the Structure of the mtDNAs From Different Strains of <i>Physarum</i>	127
mtDNA Structure in <i>Didymium Iridis</i>	128
Mitochondrial Bar Coding and mtDNA Phylogenies of Myxomycetes	129
Insertional RNA Editing in the Myxomycetes	131
Specificity of RNA Editing Site Location	133
Specificity of Inserted Nucleotide Identity	134
Evolution of RNA Editing, Variation in Editing Site Location	135
Concluding Remarks and Areas of Future Research	138
References	139

5. Molecular Techniques and Current Research Approaches	
<i>Laura M. Walker, Thomas Hoppe, Margaret E. Silliker</i>	
Part A: A Synthesis of the Current Knowledge on Molecular Techniques Used for the Recording of Biodiversity and Ecological Analyses	145
Introduction	145
Nucleic Acid Isolation	147
DNA Isolation	147
RNA Isolation	148
Nucleic Acid Amplification and Applications	148
Ribosomal Small Subunit (SSU)	148
Elongation Factor-1 α	149
Internal Transcribed Spacer (ITS)	149
Cytochrome c Oxidase (COI)	150
Sequencing and Applications of Gene Amplification	150
Terminal Restriction Fragment Length Polymorphism (TRFLP)	151
Denaturing Gradient Gel Electrophoresis (DGGE)	151
High-Throughput Sequencing	152
Concluding Remarks	153
Part B: Comparative Molecular Biology and Use of Myxomycetes as Model Organisms	154
Myxomycetes as Model Organisms: Promises, Disappointments, and Discoveries	154
The Cell Cycle	154
Somatic Incompatibility Systems	155
Plasmodial Structure, Motility, Behavior, and Learning	155
Group I Introns in the Myxomycetes	157
Molecular Approaches to Studying Development in Myxomycetes	160
Transfection of <i>Physarum polycephalum</i> and RNAi	162
The First Complete Myxomycete Genome	164
References	165
6. Physiology and Biochemistry of Myxomycetes	
<i>Qi Wang, Yu Li, Pu Liu</i>	
Introduction	175
Spore Germination	175
Amoeboflagellate Cells	177
Plasmodium	178
Sporulation	181
Metabolites of Myxomycetes	181
Metabolites From Members of the Ceratiomyxales	182
Metabolites From Members of the Liceales	182

Metabolites From Members of the Trichiales	186
Metabolites From Members of the Physarales	187
Metabolites From Members of the Stemonitales	191
Research Methods Used in the Study of Metabolites	192
Antibacterial Activity	193
Antitumor Activity	193
Cytotoxic Activity	194
Antioxidant Activity	195
Research Methods in the Study of Bioactivity	195
Chemical Characteristics	195
Acknowledgments	197
References	197
7. Taxonomy and Systematics: Current Knowledge and Approaches on the Taxonomic Treatment of Myxomycetes	
<i>Carlos Lado, Uno Eliasson</i>	
Introduction	205
Definition of Taxonomy, Systematics, and Nomenclature	206
Brief History of the Taxonomy of Myxomycetes	210
Gross Systematics Within Myxomycetes	212
Exosporous Myxomycetes	213
Endosporous Myxomycetes	214
Taxonomic Literature on the Myxomycetes	221
Classification of the Myxomycetes (From Class to Genera, With References to the Protologue and a Brief Diagnosis of the Most Relevant Distinctive Characters)	222
The New Era of Taxonomy: How New Technologies Can Help to Resolve Classical Taxonomic Problems	237
Virtual Libraries and Herbaria	240
Repositories of Biodiversity Information	241
Projects	241
Banks of Data	242
Virtual Encyclopedias	243
Web Pages	243
Software	244
Challenges in Taxonomy	244
Acknowledgments	245
References	246
8. Ecology and Distribution of Myxomycetes	
<i>Yuri K. Novozhilov, Adam W. Rollins, Martin Schnittler</i>	
Introduction	253
Methods of Study	254
Field Surveys	254
Moist Chamber Cultures	256

Agar Cultures	261
Metacommunity Analysis	262
Data Evaluation for Diversity Studies in Myxomycetes	263
Microhabitat Descriptions	266
Environmental Factors and Ecological Niche	268
Acidity of Substrate (pH)	270
Microhabitats and Ecological Assemblages of Myxomycetes	272
Ground Litter	273
Coarse Woody Debris	275
Bark of Living Woody Plants	276
Aerial Microhabitats	278
Tropical Lianas	280
Weathered Dung of Herbivorous Animals	281
Soil	282
Aquatic Habitats	282
Effect of Disturbance Events on Assemblages of Myxomycetes	283
Phenology of Sporulation (Seasonality of Myxomycetes)	283
Relationships With Other Organisms	284
Conclusions	285
Acknowledgments	286
References	286

9. Biogeographical Patterns in Myxomycetes

Martin Schnittler, Nikki Heherson A. Dagamac, Yuri K. Novozhilov

Introduction	299
Spore Dispersal as a Key Feature for Myxomycetes	299
Myxomycete Biogeography—What Can We See?	302
Biogeographic Hypotheses About Myxomycete Distribution	304
Two-Hundred Years of Fruiting Body-Based Diversity	
Research in Myxomycetes	305
Diversity and Species Composition of Myxomycete	
Communities From Major Ecosystems of the World	309
Tundra, Forest-Tundra and Subantarctic Habitats	309
Boreal Forests (Taiga) and Subalpine/Montane	
Coniferous Forests	310
Temperate Forests	311
Mediterranean Forests, Woodlands, Scrub	312
Tropical and Subtropical Forests	312
Steppes and Prairies	315
Subalpine and Alpine Grasslands	315
Deserts and Other Arid Areas	316
Coastal Habitats and Mangroves	317
Agricultural and Urban Habitats	318
Heathlands	319
Savannahs and Semi-Arid Grasslands	319
Acknowledgments	319
References	319

10. Techniques for Recording and Isolating Myxomycetes

Diana Wrigley de Basanta, Arturo Estrada-Torres

Introduction	333
Field Collections	334
Field Collections: Discussion of Advantages and Constraints	339
Isolation of Myxomycetes by Laboratory Culture	340
Moist Chamber Cultures	340
Cold Moist Chamber Cultures	345
Moist Chambers: Discussion of Advantages and Constraints	346
Agar Cultures	350
Agar Cultures: Discussion of Advantages and Constraints	353
Environmental Sequencing	354
Environmental Sequencing: Discussion of Advantages and Constraints	356
Conclusions	357
Acknowledgments	357
References	357

11. Uses and Potential: Summary of the Biomedical and Engineering Applications of Myxomycetes in the 21st Century

Hanh T.M. Tran, Andrew Adamatzky

Part A: Bioactive Compounds From Myxomycetes	365
Myxomycete Antimicrobial Compounds	366
Myxomycete Anticancer Compounds	369
Other Bioactive Compounds Obtained From Myxomycetes	373
Initial Studies on the Use of Myxomycete Lipids for Biodiesel Production	373
Part B: Myxomycetes in Unconventional Computing and Sensing	374
Shortest Path	375
Spanning Tree	377
Approximation of Transport Networks	377
Space Exploration	379
Tactile Sensor	380
Color sensor	381
Chemical Sensor	381
Robot Controllers	382
Music generation	383
References	383

12. Myxomycetes in Education: The Use of These Organisms in Promoting Active and Engaged Learning

*Katherine E. Winsett, Thomas Edison E. dela Cruz,
Diana Wrigley de Basanta*

Introduction	389
Techniques	392
Collecting Myxomycetes in the Field	392
Setting Up Moist Chamber Cultures	393
Storing Fruiting Bodies and Maintaining a Collection	394
Culture of Myxomycetes on Agar	394
Identifying Myxomycetes	396
Collecting and Classifying Myxomycetes	397
Observations	397
Observing Feeding Behavior of Myxomycetes	401
Assessing Ecological Patterns of Myxomycetes	401
High School and Beyond	402
Developing Myxomycete Infomaterials for Promoting Biodiversity Conservation	406
Photographing Myxomycetes	407
Conclusions	410
Acknowledgments	411
References	411

13. Myxomycetes in the 21st Century

Carlos Rojas, Tetiana Kryvomaz

Connection With the World	413
Research Perspectives	419
Conservation and Management	424
Putting the Pieces Together	431
References	433

Index	437
