| <i>Book Description</i>                                                           | xix      |
| <i>Introduction to the Imperial College Lectures<br/>in Petroleum Engineering</i> | xxi      |
| <b>Chapter 1. Introduction to Geology</b>                                         | <b>1</b> |
| 1.1. Introduction . . . . .                                                       | 1        |
| 1.2. Shape, Internal Structure, and Composition of the<br>Earth . . . . .         | 1        |
| 1.3. How Old is the Earth? . . . . .                                              | 6        |
| 1.4. The Earth's Crust (Lithosphere) . . . . .                                    | 7        |
| 1.5. Formation of Igneous Rocks . . . . .                                         | 8        |
| 1.6. Formation of Metamorphic Rocks . . . . .                                     | 10       |
| 1.7. The Rock Cycle . . . . .                                                     | 11       |
| 1.8. Sedimentary Rocks: Key Features<br>and Terminology . . . . .                 | 13       |
| 1.8.1. Formation . . . . .                                                        | 13       |
| 1.8.2. Sedimentary environment . . . . .                                          | 13       |

|                                                                                                          |                                                                    |           |
|----------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------|-----------|
| 1.8.3.                                                                                                   | Fauna and flora . . . . .                                          | 15        |
| 1.9.                                                                                                     | Common Sedimentary Rocks . . . . .                                 | 16        |
| 1.9.1.                                                                                                   | Sandstone . . . . .                                                | 16        |
| 1.9.2.                                                                                                   | Carbonates . . . . .                                               | 16        |
| 1.9.3.                                                                                                   | Shale . . . . .                                                    | 22        |
| 1.9.4.                                                                                                   | Evaporites . . . . .                                               | 22        |
| 1.9.5.                                                                                                   | Coal . . . . .                                                     | 23        |
| 1.10.                                                                                                    | Lithification of Sediments into Sedimentary<br>Rocks . . . . .     | 23        |
