

## TABLE OF CONTENTS

Editors' Remarks . . . . .	5
Introduction . . . . .	19
The Biosynthesis of Antibiotics from Actinomycetes with Special Reference to Antibiotics Research in Czechoslovakia (Main Lecture in the General Section) . . . . .	21
<i>I. Málek</i>	
Main Lecture in the Medical Section . . . . .	30
<i>P. Málek</i>	
Opening Lecture in the Medical Section . . . . .	34
<i>O. Šmahel</i>	
Conditions Specially Affecting Technology of Antibiotic Biosynthesis (Main Lecture in Technological Section) . . . . .	41
<i>M. Herold</i>	
Our Aims and Present Experiences in the Search for New Antibiotics . . . . .	48
<i>K. Magyar, I. Horváth, I. Lovrekovich, J. Bárdy, J. Sverteczky, A. Szentirmai and J. Zsadányi</i>	
Some Notes on an Effective Screening System for New Antibiotics . . . . .	51
<i>P. Margalith and G. Beretta</i>	
Trends in New Antibiotic Research in Japan . . . . .	52
<i>Y. Okami</i>	
The Screening of Antibiotics . . . . .	55
<i>J. Ungar</i>	
Actinomycetes of the <i>A. olivaceus</i> Group . . . . .	57
<i>A. G. Kutchayeva, N. A. Krassilnikov and G. K. Skriabin</i>	
Actinomycetes of the Fluorescent Group . . . . .	59
<i>A. I. Korenyako, A. I. Sokolova and N. I. Nikitina</i>	
The Use of Electron-Microscopy of Spores in the Classification of Antagonistic Actinomycetes . . . . .	61
<i>T. P. Preobrazhenskaya, J. S. Kudrina, M. S. Sveshnikova and T. S. Maksimova</i>	
The Use of Immunobiological Reactions for the Identification of Cultures of Actinomycetes Producing Actinomycin . . . . .	63
<i>N. K. Solovyeva, and I. D. Dyelova</i>	
Identification of Microquantities of Antibiotics by Infrared Spectrophotometry . . . . .	66
<i>D. Doskočilová</i>	

A study of the Metabolism in a Strain Producing Albomycin in Connection with the Biosynthesis of the Antibiotic . . . . .	68
<i>N. S. Yegorov, Nejelova and G. G. Zharikova</i>	
Chemical Analysis of Albomycin . . . . .	70
<i>O. Mikeš and F. Šorm</i>	
A New Member of the Polyene Antibiotic Group: Capacidin . . . . .	72
<i>R. Brown and E. L. Hazen</i>	
The Characteristics of Some Polyene Antibiotics and of their Producers . . . . .	75
<i>V. A. Cyganov, P. N. Golyakov, S. N. Soloviev, B. G. Byelenky and A. I. Filipova</i>	
The Types of Polyene Antibiotics Produced by Actinomycetes Isolated from the Soils of Southern China . . . . .	77
<i>Tsai Jung-Shen, Pao Chen-chu, Wu Shu-Yun, Shen Li Chun and Gang Bing-Young</i>	
Grubilin, a New Heptaene Antifungal Antibiotic . . . . .	78
<i>J. Uri, I. Szilágyi and I. Békéssy</i>	
A New Trichothecin-Like Antifungal Antibiotic . . . . .	79
<i>E. T. Gláz, E. Scheiber, J. Gyimesy, I. Horváth, K. Steczek, A. Szentirmai and G. Bohus</i>	
Isolation, Purification and Some Characteristics of the New Antibiotic Albofungin . . . . .	81
<i>A. S. Khokhlov and T. S. Liberman</i>	
Properties of Strain Producing a New Antifungal Antibiotic, Albofungin . . . . .	84
<i>N. K. Solovyeva and S. M. Rudaya</i>	
Effectiveness of Antibiotics Produced by Cultures of <i>Actinomyces violaceus</i> and of Polysaccharide CIINA in Experimental Influenza Infections . . . . .	86
<i>N. M. Furer, I. P. Fomina and T. I. Balezina</i>	
A Study on Correlation between Antiphage and Antivirus Activity with Reference to Screening Method for Antivirus Antibiotics . . . . .	88
<i>F. Šmejkal</i>	
Absorption of Antibiotics in Soil . . . . .	90
<i>Y. A. Chudyakova and I. N. Zuyeva</i>	
The production of Antibiotics in Soil . . . . .	92
<i>T. G. Mirtching and K. P. Greshnych</i>	
Antagonistic Effect of Actinomycetes against Phytopathogenic Microorganisms . . . . .	94
<i>R. O. Mirzabekian</i>	
Melanosporin and Elaiophylin, New Antibiotics Produced by <i>Streptomyces melanosporus</i> Sp. N. . . . .	96
<i>F. Arcamone</i>	

Observations on the Lysis of Yeast Cells by Myxobacteria . . . . .	98
<i>S. Cherian</i>	
Edein—an Antibiotic Produced by the Strain <i>Bacillus brevis</i> Vm 4 . . . . .	100
<i>Z. Kurylo—Borowska</i>	
The Existence of Actinomycetes Effective on Penicillin-Resistant Staphylococcus in the Soils of Bohemia . . . . .	102
<i>J. Plachý and J. Nečásek</i>	
The Biosynthesis of Alternariol, an Antibacterial Product of <i>Alternaria</i> <i>tenuis</i> . . . . .	103
<i>R. Thomas</i>	
Pharmacological and Toxicological Properties of Primycin . . . . .	106
<i>T. Vályi—Nagy</i>	
The Screening for New Antibiotics . . . . .	107
<i>Panel Discussion</i>	
General Biogenetic Pathways in Micro-organisms . . . . .	111
<i>J. D. Bu'lock</i>	
The Utilization of Choline Sulphuric Ester by <i>Penicillium chrysogenum</i> and Its Distribution in Fungi . . . . .	115
<i>A. Balio, E. B. Chain, F. Dentice di Accadia, F. Navazio, C. Rossi</i> <i>and M. T. Ventura</i>	
The Influence of Fungistatic Antibiotic on Extracellular Production of Amylase in the <i>Penicillium chrysogenum</i> Strain . . . . .	117
<i>A. Szentirmai and S. Horváth</i>	
The Role of Amino Acids and Amides in Biosynthesis of Streptomycin . . . . .	119
<i>V. A. Severina, S. V. Gorskaya and I. V. Gratcheva</i>	
Some Observations on the Metabolism of Sucrose by <i>Streptomyces</i> <i>aureofaciens</i> . . . . .	120
<i>J. Doskočil</i>	
Phosphorus Compounds in the Strain <i>Actinomyces aureofaciens</i> Produ- cing Biomycin and their Connection with the Antibiotic Activity . . . . .	122
<i>M. A. Guberniev, L. I. Torbokhina and S. N. Listvinova</i>	
The Influence of Benzyl Thiocyanate on Carbohydrate Metabolism of <i>Streptomyces aureofaciens</i> . . . . .	126
<i>Z. Hošťálek</i>	
Biochemical Studies of the Chlorination Mechanism of <i>Streptomyces</i> <i>aureofaciens</i> . . . . .	128
<i>J. Kollár and M. Járαι</i>	
The Dependence of the Relative Amount of Bases in the Nucleic Acids of <i>Streptomyces rimosus</i> on the Phosphate Content of the Medium . . . . .	130
<i>T. Šik, I. Gadó and I. Horváth</i>	

The Significance of Inorganic Phosphorus for the Growth and Development of <i>Streptomyces rimosus</i> and the Production of Oxytetracycline . . . . .	133
<i>N. V. Orlova, Z. M. Zaitseva and T. P. Verkhovtseva</i>	
A Contribution to the Study of the Biosynthesis of Oxytetracycline . . . . .	135
<i>V. Ševčík, V. Musílek and I. Komersová</i>	
The Study of the Biosynthesis of Desosamine and its Incorporation into Erythromycin . . . . .	137
<i>J. Majer, J. Liebster, K. Vereš, L. Doležilová and Z. Vaněk</i>	
Relation of some Aliphatic Acids to the Biosynthesis of Erythromycin . . . . .	139
<i>V. Musílek and V. Ševčík</i>	
Submerge Growth of Actinomyces <i>Streptomyces erythreus</i> , Production of Erythromycin and Changes of Some Components of the Mycelium of the Microbe . . . . .	141
<i>Z. Řeháček</i>	
Studies on the Biosynthesis of Erythromycin with the Aid of C <sup>14</sup> Labeled Substrates . . . . .	143
<i>Z. Vaněk, J. Majer, J. Liebster, K. Vereš and L. Doležilová</i>	
Biochemistry of the Biosynthesis of Polyacetylenic Antibiotics . . . . .	145
<i>J. D. Bu'lock, H. Gregory, M. G. Hay and E. F. Leadbeater</i>	
Some Factors Influencing the Biosynthesis of Fungicidin . . . . .	146
<i>M. Musílková and J. Nečásek</i>	
The Effect of Medium Constituents and of Fermentation Conditions on the Production of a Polyene Antibiotic: Etrusco-mycin . . . . .	148
<i>F. Mariny and P. Pennella</i>	
The Study of Amino-acids in Medium and Mycelium of Actinomycetes in the Course of the Biosynthesis of Antibiotics . . . . .	150
<i>A. M. Bezborodov, L. E. Semkina, M. V. Fursenko and J. P. Savadierov</i>	
The Mechanism of Antibiotic Biosynthesis . . . . .	152
<i>Panel Discussion</i>	
Antitumour Activity of the Antibiotic El-Be-51 Against Crocker Sarcoma and Ehrlich Carcinoma . . . . .	155
<i>I. Bogdanov</i>	
Histological and Histochemical Criteria of Anti-tumorous Activity of Antibiotics . . . . .	156
<i>A. I. Braude</i>	
The Isolation and Properties of the Antitumorous Antibiotic 6270 . . . . .	158
<i>M. G. Brazhnikova</i>	
The Influence of the Activity of Some Dehydrogenases in Intact Cells of Ehrlich Ascites Carcinoma (EAC) as One of the Criteria in the Search for Cancerostatic Antibiotics and Chemotherapeutics . . . . .	160
<i>L. Drobniča</i>	

The Influence of Some Chemotherapeutic Preparations on the Growth of Human Neuroectodermal Tumours in Tissue Cultures . . . . .	162
<i>A. E. Gosheva</i>	
Further Study of Anticancer Antibiotic Actinomycin K . . . . .	164
<i>Hsu Bin, Chou Chin-Hsu, Wang Tao-Yuan, Chen Jui-Ting, Liu Ming-Chang, Chang Ching-He and Chang Chew-Bin</i>	
Biological Effects of Some Isothiocyanates . . . . .	166
<i>P. Nemeč, L. Drobnica, P. Kristián, K. Antoš and A. Hulka</i>	
Inhibition of Growth of Mammalian Cells in Tissue Culture by Antibiotics	168
<i>D. Perlman, N. A. Giuffre and P. W. Jackson</i>	
The Significance of Anti-tumorous Antibiotics . . . . .	170
<i>Panel Discussion</i>	
The Pathologic-anatomical Analysis of the Effect of Antifungal Antibiotics under Experimental Conditions . . . . .	172
<i>E. K. Berezina, A. I. Semič and L. A. Gamaleya</i>	
An Evaluation of Tetracycline Preparations . . . . .	174
<i>W. P. Boger</i>	
Investigations on Resistance of <i>Staphylococcus</i> , <i>Shigella</i> and <i>Proteus</i> Strains to the New Antibiotic: Tetaïne . . . . .	179
<i>J. Borowski</i>	
The Relation of the Functional State of the Macro-organism to the Effectiveness of the Treatment of Focal Infection by Antibiotics . . . . .	182
<i>A. M. Chernukh</i>	
The Effect of Various Forms of Penicillin on Wound Infection . . . . .	185
<i>J. Emr, O. Fiala, K. Urbánek and F. Výmola</i>	
The Influence of Antibiotics on Lipoprotein Lipase Activity . . . . .	187
<i>D. Grafnetter and J. Grafnetterová</i>	
Binding of Peroral Penicillin Drugs to Human Plasma Proteins . . . . .	190
<i>J. Grafnetterová and O. Šmahel</i>	
The Kinetics of Chloramphenicol . . . . .	193
<i>J. Grafnetterová, K. Cholínský, O. Schüek and O. Šmahel</i>	
The Influence of Tetracycline Antibiotics on Intestinal Microflora in Chronic Carriers of Bacilli of the Typhoid, Para-typhoid and Enteritis Group . . . . .	196
<i>H. Haenel</i>	
The Protective Influence of Chlortetracycline on the Survival of Ischaemised Tissues and Organs . . . . .	198
<i>J. Hejhal, Z. Hrdlička and J. Vrabel</i>	
The Course of Wound Healing Under Penicillin Influence . . . . .	200
<i>Š. Hoja</i>	

Experimental Results Concerning the Use of Micerin in Neurosurgery . . . . .	202
<i>V. F. Imshenetskaya</i>	
The Influence of Antibiotics on the Origin of Immunity in Experiment . . . . .	205
<i>M. N. Yegorova and T. M. Kokushkina</i>	
New Ways in Anti-tumour Antibiotic Research . . . . .	208
<i>Z. V. Yermolyeva, I. V. Rabich, S. M. Navashin and A. I. Braude</i>	
Influence of the State of the Organism on the Circulation of Antibiotics . . . . .	210
<i>S. D. Yudinsev</i>	
Trials of Antitumorous Antibiotics . . . . .	212
<i>D. A. Karnofsky</i>	
Adaptation of Pathogenic Microbes to Antibiotics . . . . .	214
<i>P. N. Kashkin</i>	
Candidoses, Complications of Antibiotic Therapy . . . . .	217
<i>P. N. Kashkin</i>	
The Pharmacology of Flavofungin . . . . .	220
<i>B. Kelentey, J. Uri and I. Békéssy</i>	
The Influence of Antibiotics on Emulgation and Lipolysis of Fats by Na- tive Digestive Juice . . . . .	223
<i>A. Krondl, H. Vavřínková, Z. Placer and Z. Slabochová</i>	
Effect of Antibiotics on Immunity . . . . .	229
<i>A. Lamensans and A. Fari</i>	
Reverin . . . . .	232
<i>R. Lentz</i>	
On the Influence of Tetracycline Antibiotics on Physiological Processes of the Macro-organism . . . . .	234
<i>A. V. Loginov, A. M. Dumova, B. B. Bystrova, S. L. Volynskaya, V. D. Zhestyanikov, V. A. Lovchikov and P. P. Soloviev</i>	
Further Experimental and Clinical Studies on Antibiolymphines . . . . .	237
<i>P. Málek, M. Herold, J. Málek and J. Kolc</i>	
Experimentally Clinical Problems of Tetracycline Antibiotic Effect on Enzymes . . . . .	240
<i>P. Málek and J. Kolc</i>	
Some Problems of Long-term Intra-arterial Application of Antibiotics . . . . .	245
<i>V. Michal</i>	
Experimental Studies in Pharmacology and Toxicology of Antibiotics . . . . .	248
<i>H. Mückter, G. Osterloh, F. Lagler and W. Krüpe</i>	
On the Mechanism of Penicillin Action on Bacteria . . . . .	251
<i>M. V. Nermut</i>	

Sensitivity of Staphylococci to Antibiotics. . . . .	254
<i>P. G. Oganesian and L. A. Steinlucht</i>	
Excretion of Antibiotics in the Gall . . . . .	256
<i>Z. Ondráček</i>	
Changes in Microbial Biocenosis in Man after Peroral Application of Penicillin and Tetracycline Antibiotics . . . . .	258
<i>F. Patočka and M. Pohunek</i>	
The Influence of Tetracycline on the Formation of Antibodies in Immunisation and Infection Experiment . . . . .	260
<i>F. Patočka, C. John, V. Kubelka, J. Korb and E. Šrajbr</i>	
The Protective Influence of Some Antibiotics and Drugs against Hypoxia	262
<i>B. Peleška and J. Marková</i>	
Inhibitory Effect of Antibiotics on Digestive and Serum Esterase Systems	267
<i>Z. Placer, Z. Slabochová, A. Krondl and Z. Roubal</i>	
Antagonistic Actions of Antibiotics and Heparin <i>in vitro</i> . . . . .	271
<i>Z. Placer, Z. Slabochová, P. Málek, J. Kolc, Z. Roubal and M. Havlová</i>	
Antibiotic Distribution in Normal Organism and under Pathological Conditions; Antibiotics and the Lymphatic System . . . . .	274
<i>K. Planyelyes</i>	
The Influence of Chlortetracycline on Pancreatic Enzymes <i>in vitro</i> . . . . .	276
<i>J. Rokos, M. Burger and P. Procházka</i>	
The Use of Plasmatic Clearance in the Pharmacology of Some Antibiotics and in Clinical Practice . . . . .	278
<i>O. Schüick, O. Šmahel and K. Cholínský</i>	
On the Mechanism of Chlortetracycline Effect on Macro-organism . . . . .	282
<i>V. Sobek</i>	
The Influence of Penethamate Hydroiodide . . . . .	284
<i>V. Sobek, M. Háva and H. Rašková</i>	
Micerin and Its Therapeutic Properties . . . . .	286
<i>J. V. Solovyeva and Z. N. Byelova</i>	
The Influence of the Invasion and Elimination of Antibiotics and the Possibility of their Clinical Utilisation . . . . .	288
<i>K. H. Spitzzy</i>	
Reabsorption of Crystalline Penicillin G in Human Urinary Bladder . . . . .	292
<i>J. Stříbrná and O. Schüick</i>	
The Influence of Antibiotics on Carbohydrate Metabolism of Human Erythrocytes . . . . .	293
<i>J. Šonka, L. Kašpárek and V. Kohoutek</i>	

The Treatment of Dysentery in Children by a Combination of Antibiotics and Bacteriophage . . . . .	296
<i>O. I. Shevyakova</i>	
Clinical Results of Micerin Therapy in Neuro-surgery . . . . .	298
<i>A. A. Shlikov</i>	
Comparison of Levels of Perocillin and Phenoxymethyl-penicillin in Volunteers . . . . .	300
<i>O. Šmahel and M. Herold</i>	
Biological Properties of Griseofulvin . . . . .	304
<i>J. Ungar</i>	
Analysis of Staphylococci Sensitivity to Antibiotics . . . . .	305
<i>E. A. Vyedmina and T. V. Golosova</i>	
Sensitivity of <i>Micrococcus pyogenes var. aureus</i> to Antibiotics, Especially to Erythromycin . . . . .	307
<i>V. Wagner, Z. Jedličková and V. Malý</i>	
The Preliminary Results of a Study of the Relationship between Numbers of Microorganisms and the Antistaphylococcal Effect of Certain Antibiotics . . . . .	308
<i>E. M. Yow and T. Sakuma</i>	
The Influence of Penicillin on Oral Microflora . . . . .	311
<i>K. Zahradnický</i>	
Sensitivity of <i>Staphylococcus pyogenes aureus</i> to Erythromycin, Oleandomycin, Spiramycin and Staphylomycin . . . . .	314
<i>Z. Zhagar</i>	
Pure Culture of <i>Staphylococcus pyogenes aureus</i> Strains Isolated from Nasal Mucous Membrane and Their Antibiogram . . . . .	315
<i>Z. Zhagar</i>	
Fate of Antibiotics in the Organism . . . . .	316
<i>Panel Discussion</i>	
Antibiotics and the Macroorganism . . . . .	316
<i>Panel Discussion</i>	
Long-term Cultivation of the Strain <i>Actinomyces lavendulae</i> 2535 B in a Continuously Flowing Medium. . . . .	317
<i>M. N. Bechteryeva and I. G. Kolesnikova</i>	
An Analysis of the Causes of Productivity and a Specific Stimulator of the Fumagillin Fermentation . . . . .	320
<i>Z. E. Bekker and R. A. Maksimova</i>	
The Biosynthesis of New Penicillins Using Sulfamidophenoxyacetic Acid and Its Amides as Precursors . . . . .	322
<i>G. Botez</i>	

X-Ray Irradiation of Streptomycetes . . . . .	324
<i>N. J. Darvas</i>	
Degeneration of the <i>Streptomyces erythreus</i> Strain . . . . .	326
<i>L. Doležilová, Z. Vaněk and O. Králík</i>	
Some Considerations of Bioengineering from a Microscopic Viewpoint .	329
<i>R. Donovick</i>	
Kinetics of the Development of <i>Streptomyces aureofaciens</i> in Submerged Culture . . . . .	335
<i>J. Doskočil</i>	
Fermentation Process Scale-up . . . . .	337
<i>E. L. Gaden</i>	
Methylene Blue as a Protecting Agent against the Production-Inhibiting Effect of Iron on <i>Streptomyces rimosus</i> . . . . .	344
<i>I. Gadó, I. Horváth and K. Magyar</i>	
Biosynthesis and Production of Streptomycin by the Strain <i>Actinomyces globisporus streptomycini</i> LS under Varying Bioengineering Conditions — on an Industrial Scale . . . . .	345
<i>F. Hodinář and F. Ulrych</i>	
Stimulation of Chlortetracycline Biosynthesis by Benzyl Thiocyanate in the Cultivation of the Producing Strain in Starch Substrates . . . . .	346
<i>Z. Hošťálek and M. Herold</i>	
Individual Variations in the Production of Penicillin in the <i>Penicillium chrysogenum</i> NH Strain . . . . .	348
<i>S. Igali</i>	
Variability of Actinomycetes Producing B <sub>12</sub> Vitamin and Streptomycin Caused by Actinophage . . . . .	349
<i>T. S. Ilyina and A. F. Teteryatnik</i>	
Fermentation Conditions of Producers of New Antibiotics in Pilot Plant .	351
<i>K. K. Ivanov, V. K. Kovalenkova, N. P. Ilyicheva, G. V. Gavrilina and S. A. Lirova</i>	
The Effect of Photoreactivation in the Use of UV-Rays for Selection of Strains Producing Antibiotics . . . . .	352
<i>L. I. Yerokhina</i>	
The Kinetics of Erythromycin Degradation in Acid Medium . . . . .	355
<i>E. Korecká</i>	
The Use of Sequestering Agents in the Isolation of Oxytetracycline. . .	357
<i>Z. Lassota</i>	
Studies on the Biosynthesis of Tetracycline . . . . .	359
