

**CONTENT**

<b>PREFACE</b>	<b>3</b>
<b>1 DIVISIBILITY</b>	<b>13</b>
1.1 The remainder theorem, the “Divides” relationship .....	14
1.2 The Greatest Common Divisor, the Least Common Multiple ..	19
<b>2 PRIME NUMBERS</b>	<b>25</b>
2.1 Basic properties of prime numbers .....	26
2.2 Fundamental theorem of arithmetic .....	28
2.3 Generating prime numbers .....	33
<b>3 DIOPHANTINE EQUATIONS, EUCLIDEAN ALGORITHM</b>	<b>37</b>
3.1 Linear diophantine equations, Euclidean algorithm .....	38
3.2 Examples of linear diophantine equations .....	42
3.3 Quadratic diophantine equations with two unknowns .....	45
3.4 Bilinear diophantine equations .....	46
3.5 Pythagorean equations .....	47
3.6 Fermat's Last Theorem .....	50
<b>4 THE INCLUSION AND EXCLUSION PRINCIPLE</b>	<b>57</b>
4.1 The Inclusion and Exclusion principle .....	57
4.2 Selected examples of the Inclusion and Exclusion principle ..	58
<b>5 ARITHMETIC FUNCTIONS AND PERFECT NUMBERS</b>	<b>65</b>
5.1 Uses of arithmetic functions .....	67
<b>6 EULER'S AND FERMAT'S LITTLE THEOREM</b>	<b>77</b>
6.1 Euler's theorem, Fermat's Little theorem .....	78
6.2 Euler's and Fermat's Little theorem applications .....	80
<b>7 NUMBER SYSTEMS</b>	<b>87</b>
7.1 Number systems applications .....	90

<b>8 LINEAR CONGRUENCES, RESIDUAL CLASSES</b>	<b>101</b>
8.1 Basic properties of congruences, residual classes .....	101
8.2 Solution of linear congruences .....	108
8.3 Solving systems of linear congruences .....	112
<b>9 FIBONACCI NUMBERS</b>	<b>119</b>
9.1 Fibonacci numbers and the golden ratio .....	120
9.2 Fibonacci numbers and cryptography .....	124
<b>10 THE NUMBER <math>e</math> IS IRRATIONAL</b>	<b>127</b>
<b>11 VARIOUS SOLVED PROBLEMS OF NUMBER THEORY</b>	<b>135</b>
