

**CONTENT**

<b>PREFACE</b>	<b>3</b>
<b>1 INTRODUCTION TO MATHEMATICAL PROGRAMMING IN MATLAB®</b>	<b>5</b>
1.1 Numbers and variables .....	5
1.2 Rules for naming variables .....	7
1.3 Rules for evaluating expressions .....	8
1.4 Mathematical functions .....	11
1.5 How to display numbers .....	13
1.6 Vectors and matrixes .....	14
1.7 Dot arithmetic and dynamic properties of arrays .....	19
1.8 Some functions in arrays .....	22
1.9 Some special functions .....	26
1.10 Global variables .....	28
1.11 Scripts and functions .....	29
1.12 Loops and conditions .....	39
1.13 Graphs of real functions .....	48
<b>2 ROOT APPROXIMATION</b>	<b>63</b>
2.1 Built-in numerical methods for finding roots .....	63
2.2 Method of bisection .....	66
2.3 Method of chords .....	69
2.4 Newton method .....	71
<b>3 FUNCTION APPROXIMATION</b>	<b>77</b>
3.1 Interpolation .....	77
3.1.1 Lagrange interpolation polynomial .....	77
3.1.2 Spline interpolation .....	80
3.1.2.1 Linear interpolation spline .....	81
3.1.2.2 Cubic interpolation spline .....	83
3.1.2.3 Quadratic interpolation spline .....	89
<b>4 APPLICATIONS OF MEASURE AS A DEFINITE INTEGRAL</b>	<b>95</b>
4.1 Calculate a definite integral .....	96
4.2 Rectangular method .....	99

4.3	Simpson's method .....	101
4.4	Symbolic integration .....	103
4.5	Monte Carlo method .....	105
<b>5</b>	<b>NUMBER THEORY APPLICATIONS</b>	<b>113</b>
5.1	Primality testing .....	113
5.2	Solving linear diophantine equations .....	116
5.3	Fibonacci numbers .....	122
5.4	Generating perfect numbers .....	130
5.5	Converting numbers between systems of different bases .....	133
<b>6</b>	<b>A SURVEY ON THE GLOBAL OPTIMIZATION PROBLEM</b>	<b>139</b>
6.1	Test functions .....	139
6.2	Fminsearch function .....	144
6.3	Controlled random search .....	146
6.4	Differential evolution .....	150
6.5	Algorithms verification and comparison .....	153
6.5.1	Determination of conditions .....	153
6.5.2	Results of the experiment and their statistical analysis..	159
