<b>1 Pathophysiology of the respiratory system (I. Hulín)</b>	<b>3</b>
1.1 The transport of oxygen to the organism . . . . .	3
1.1.1 Oxygenation . . . . .	4
1.1.2 Hypoxia . . . . .	4
1.1.3 Dyspnoea . . . . .	6
1.2 Pathophysiology of respiration and respiratory organs . . . . .	7
1.2.1 Pulmonary ventilation and its disorders . . . . .	7
1.2.2 Distribution of ventilation and its disorders . . . . .	12
1.2.3 Changes in diffusion . . . . .	12
1.2.4 Changes in perfusion . . . . .	13
1.2.5 Exchange of respiratory gases . . . . .	13
1.2.6 Ventilation-perfusion abnormalities . . . . .	15
1.3 Pneumonia . . . . .	16
1.3.1 Alveolar macrophages and lymphocytes . . . . .	17
1.3.2 Inflammatory reaction . . . . .	17
1.4 Hypersensitive pneumonitis . . . . .	18
1.4.1 Eosinophilic pneumonias . . . . .	19
1.5 Pulmonary disorders caused by harmful substances in the inhaled air . . . . .	19
1.6 Chronic diseases of the airways . . . . .	21
1.6.1 The simple and obstructive chronic bronchitis . . . . .	21
1.6.2 Pulmonary emphysema . . . . .	22
1.6.3 Bronchial asthma . . . . .	23
1.7 Bronchiectasis . . . . .	26
1.8 Cystic fibrosis (of the lungs) . . . . .	28
1.9 Interstitial lung diseases . . . . .	29
1.9.1 Interstitial diseases of lungs of unknown etiology . . . . .	31
1.9.2 Interstitial diseases of lungs of known etiology . . . . .	31
1.9.3 Interstitial lung diseases induced by drugs . . . . .	32
1.10 Respiratory failure . . . . .	32
1.10.1 Acute and chronic respiratory failure . . . . .	32
1.10.2 The causes of origin and deterioration of the respiratory failure . . . . .	33
1.10.3 Adult respiratory distress syndrome – ARDS . . . . .	35
1.11 Tumours of the lung and bronchi . . . . .	36
1.11.1 Benign tumours of lungs and bronchi . . . . .	36
1.11.2 Primary malignant tumours of lungs bronchi . . . . .	36
1.11.3 Metastatic malignant tumours of the lungs . . . . .	37
1.12 Disorders of the diaphragm, thorax, pleura and mediastinum . . . . .	37
1.12.1 Disorders of the diaphragm . . . . .	37

1.12.2	Disorders of the thorax configuration . . . . .	38
1.12.3	Disorders of the pleura . . . . .	39
1.12.4	Disorders of the mediastinum . . . . .	42
<b>2</b>	<b>Pathophysiology of blood and haematologic system ( I. Hulín )</b>	<b>44</b>
2.1	Haematopoiesis . . . . .	44
2.1.1	Development of blood cells . . . . .	45
2.1.2	Haemoglobin biosynthesis . . . . .	47
2.1.3	Metabolism of erythrocytes . . . . .	48
2.1.4	Absorption of iron . . . . .	48
2.2	Anaemias . . . . .	50
2.2.1	Anaemia due to iron deficiency . . . . .	50
2.2.2	Sideroblastic anaemias . . . . .	51
2.2.3	Megaloblastic anaemias . . . . .	52
2.2.4	Haemolytic anaemias . . . . .	55
2.2.5	Acquired haemolytic disorders . . . . .	57
2.2.6	Haemoglobinopathies . . . . .	60
2.2.7	Normochromic normocytic anaemia . . . . .	62
2.2.8	Anaemia in uraemic syndrome . . . . .	63
2.2.9	Anaemia in hepatic cirrhosis . . . . .	63
2.2.10	Anaemias in endocrine disorders . . . . .	64
2.2.11	Anaemias in chronic inflammatory processes . . . . .	64
2.2.12	Anaemias due to impaired haematopoiesis . . . . .	65
2.3	Haemostasis and haemocoagulation . . . . .	66
2.4	Disorders of primary haemostasis . . . . .	68
2.4.1	Disorders of thrombocytes . . . . .	69
2.4.2	Vascular purpurae . . . . .	72
2.5	Disorders of haemocoagulation . . . . .	72
2.5.1	Haemorrhagic diatheses . . . . .	74
2.5.2	Disseminated intravascular coagulation . . . . .	76
2.5.3	Thromboembolic diseases . . . . .	77
2.6	Disorders of leucocytes . . . . .	78
2.6.1	Leucocytosis . . . . .	79
2.6.2	Leucopenia . . . . .	80
2.7	Malignant haematologic diseases . . . . .	81
2.7.1	Myeloproliferative disorders . . . . .	81
2.7.2	Leukaemias . . . . .	83
2.7.3	Myelodysplastic syndrome . . . . .	85
2.7.4	Lymphomas . . . . .	85
2.7.5	Disorders of plasmacytes . . . . .	86
<b>3</b>	<b>Pathophysiology of the cardiovascular system ( I. Hulín, F. Šimko et al.)</b>	<b>88</b>
3.1	Functional characteristics of the cardiac muscle structure (F. Šimko) . . . . .	88
3.2	Metabolism of cardiac muscle cell (F. Šimko) . . . . .	92
3.2.1	Energy production . . . . .	92
3.2.2	Energy storing . . . . .	94
3.2.3	Energy utilization . . . . .	94
3.3	Contraction-relaxation cycle (F. Šimko) . . . . .	94
3.4	Contractile function of myocardium and pumping function of the heart (F. Šimko) . . . . .	97
3.4.1	Preload . . . . .	97

3.4.2	Contractility . . . . .	99
3.4.3	Afterload . . . . .	99
3.4.4	Frequency of contractions . . . . .	100
3.4.5	Synergic activity of ventricles and the contractile ability of atrii . . . . .	100
3.4.6	Pumping activity of the heart . . . . .	101
3.5	Pathomechanism of heart failure (F. Šimko) . . . . .	103
3.5.1	Symptoms of left ventricular heart failure . . . . .	107
3.5.2	Right heart failure . . . . .	114
3.6	Pathomechanism of cardiomyocyte damage in heart failure (F. Šimko) . . . . .	115
3.6.1	Pathophysiological principles of therapy in heart failure . . . . .	116
3.7	Hypertrophy of the heart – mechanism of adaptation to chronic hemodynamic overload (F. Šimko) . . . . .	119
3.7.1	Pressure and volume overload of the heart . . . . .	120
3.7.2	Direct stimulus of hypertrophic growth . . . . .	120
3.7.3	Hypertrophy stages and their characteristics . . . . .	122
3.7.4	The problem of hypertrophy regression . . . . .	123
3.7.5	Physiological hypertrophy . . . . .	123
3.7.6	Hypertrophy and dilatation of the heart . . . . .	124
3.8	Valvular defects of the heart (F. Šimko) . . . . .	126
3.8.1	Mitral stenosis . . . . .	126
3.8.2	Pathogenesis of clinical symptoms . . . . .	128
3.8.3	Mitral insufficiency . . . . .	129
3.8.4	Aortic stenosis . . . . .	130
3.8.5	Aortic insufficiency . . . . .	132
3.8.6	Valvular defects of the right heart . . . . .	134
3.9	Cardiomyopathies (F. Šimko) . . . . .	135
3.9.1	Dilating cardiomyopathy . . . . .	135
3.9.2	Hypertrophic cardiomyopathy . . . . .	136
3.9.3	Restrictive cardiomyopathy . . . . .	138
3.9.4	Specific diseases of myocardium (secondary cardiomyopathies) . . . . .	138
3.10	General adaptation syndrome – stress (F. Šimko) . . . . .	139
3.10.1	Adaptation . . . . .	139
3.10.2	Stress . . . . .	140
3.10.3	Civilization diseases . . . . .	144
3.11	Congenital heart diseases (I. Hulín, L. Zlatoš) . . . . .	145
3.11.1	Atrial septal defect (ASD) . . . . .	146
3.11.2	Ventricular septal defect . . . . .	147
3.11.3	Patent ductus arteriosus . . . . .	147
3.11.4	Anomalies of coronary artery emergence . . . . .	148
3.11.5	Congenital aortic stenosis . . . . .	148
3.11.6	Coarctation of aorta . . . . .	148
3.11.7	Pulmonary artery stenosis . . . . .	149
3.11.8	Transposition of the great vessels (arteries) TGA . . . . .	149
3.11.9	Ebstein anomaly . . . . .	149
3.11.10	Tetralogy of Fallot . . . . .	149
3.12	Infective endocarditis (I. Hulín) . . . . .	150
3.13	Pathological changes of the blood pressure (H. Sapáková) . . . . .	152
3.13.1	Functional anatomy of the circulation . . . . .	152
3.13.2	Regulation of the blood pressure . . . . .	153

3.14	Systemic arterial hypertension (H. Sapáková)	155
3.14.1	Essential hypertension	157
3.15	Secondary arterial hypertension (H. Sapáková)	162
3.15.1	Renal hypertension	162
3.15.2	Endocrinal hypertension	164
3.15.3	Hypertension in cardiovascular diseases	166
3.15.4	Hypertension in diseases of the nervous system	166
3.15.5	Hypertension in gravidity	167
3.15.6	Hypertension caused by drugs and toxic substances	168
3.16	Systemic arterial hypotension (D. Maasová)	169
3.16.1	Orthostatic (postural) hypotension	169
3.17	Syncope (D. Maasová)	171
3.17.1	Cardiac syncope	171
3.17.2	Vasomotor syncope	171
3.18	Shock states (I. Hulín)	172
3.18.1	The adapting and compensatory mechanisms activated by the low tissue perfusion during shock	173
3.18.2	Shock	178
3.18.3	Some common signs of the individual types of shock	180
3.18.4	Clinical manifestation of shock	182
3.19	Septic shock and septicemia (I. Hulín)	183
3.20	Etiopathogenesis of atherosclerosis (L. Zlatoš)	186
3.20.1	Atherosclerosis of important vascular regions (B. Mladosičová)	192
3.20.2	Aorta diseases	193
3.21	Coronary circulation disturbances (I. Hulín)	194
3.22	Ischaemic heart disease (I. Hulín)	196
3.22.1	Angina pectoris	197
3.23	Acute myocardial infarction (J. Murín)	199
3.24	Pathophysiology of the brain circulation (B. Mladosičová)	205
3.24.1	Stroke – acute cerebrovascular accident	207
3.24.2	Subarachnoid haemorrhage	210
3.24.3	Aneurysms	210
3.24.4	Generalized arteriosclerosis of the small cerebral arteries	210
3.24.5	Thrombosis and thrombophlebitis of the cerebral veins and sinuses	210
3.25	The basis of the electrical action of the heart (I. Hulín)	211
3.25.1	The resting (membrane) potential	212
3.25.2	The action potential	213
3.25.3	Automatic cells	214
3.25.4	The progress of activation	216
3.25.5	Anatomy and physiology of the conductive system of the heart	217
3.25.6	The electrocardiographic changes in cardiac disorders	224
3.26	The electrophysiological basis in the generation of cardiac arrhythmias (I. Hulín)	228
3.26.1	Automaticity	229
3.26.2	Automaticity disturbances	230
3.26.3	Excitability disturbances	231
3.26.4	Conduction disorders	232
3.26.5	Sinoatrial node dysfunction	236
3.26.6	Disturbances of AV conduction	237
3.27	Tachyarrhythmia (I. Hulín)	239

3.27.1	Extrasystole . . . . .	240
3.27.2	Tachycardia . . . . .	242
3.27.3	Paroxysmal supraventricular tachycardia . . . . .	244
3.27.4	Ventricular fibrillation and ventricular flutter . . . . .	247
3.27.5	Pathophysiological outcomes of antiarrhythmic treatment . . . . .	248
3.28	Diseases of the venous system (J. Holzerová) . . . . .	248
3.28.1	Varices . . . . .	249
3.28.2	Thrombophlebitis . . . . .	250
3.28.3	Phlebothrombosis . . . . .	250
3.28.4	Pulmonary embolism . . . . .	251
3.28.5	Chronic venous insufficiency . . . . .	252
3.29	The role of endothelium in the reactivity of the vascular smooth muscle (R. Sochorová) . . . . .	253
3.29.1	Effects of endothelin . . . . .	254
3.29.2	The mechanism of endothelin effect . . . . .	255
<b>4</b>	<b>Pathophysiology of kidneys and urinary system (I. Hulín)</b> . . . . .	<b>257</b>
4.1	Introduction . . . . .	257
4.1.1	Important tasks of uropoietic system . . . . .	257
4.2	Basic anatomic notes . . . . .	258
4.2.1	Nephron . . . . .	259
4.2.2	The urinary outflow tract . . . . .	263
4.3	Peculiarities of renal blood flow . . . . .	263
4.4	The urine formation . . . . .	266
4.4.1	Glomerular filtration . . . . .	266
4.4.2	Tubular functions . . . . .	268
4.5	Disturbances of glomerular functions . . . . .	275
4.5.1	Decrease of glomerular filtration rate . . . . .	275
4.5.2	Alterations of glomerular membrane permeability . . . . .	275
4.5.3	The involution of nephrons . . . . .	278
4.6	Acute renal failure . . . . .	279
4.7	Chronic renal failure . . . . .	281
4.7.1	Cell – organ – and metabolic alterations due to uraemia . . . . .	282
4.7.2	Pathophysiology of symptoms in uraemia . . . . .	283
4.7.3	Consequences of alterations occurring in chronic renal failure . . . . .	283
4.8	Inflammatory processes of kidneys due to immunopathogenic mechanisms . . . . .	285
4.8.1	Renal damage due to antibodies against basement membrane . . . . .	285
4.8.2	Renal damage induced by immune complexes . . . . .	287
4.9	Glomerulopathies . . . . .	288
4.9.1	Acute glomerulonephritis . . . . .	288
4.9.2	Rapidly progressive glomerulonephritis . . . . .	289
4.9.3	Nephrotic syndrome . . . . .	290
4.9.4	Isolated asymptomatic renal disorders . . . . .	292
4.9.5	Glomerulopathies in other diseases . . . . .	293
4.9.6	Hereditary glomerulopathies . . . . .	296
4.10	Infections of the urinary tract . . . . .	296
4.10.1	Cystitis, acute pyelonephritis, urethritis . . . . .	296
4.10.2	Prostatitis . . . . .	297
4.10.3	Chronic pyelonephritis . . . . .	297
4.10.4	Papillary necrosis . . . . .	297
4.11	Tubulointerstitial renal diseases . . . . .	298

4.11.1	Nephropathies	298
4.12	Renovascular diseases	300
4.12.1	Diseases related to the blood supply	300
4.13	Prae-eclampsia and eclampsia	302
4.14	Hereditary renal diseases	302
4.14.1	Polycystic kidney disease	302
4.14.2	Disturbances of tubular functions	302
4.15	Urolithiasis	304
4.16	Urinary outflow tract disturbances	305
4.17	Tumors of urinary tract	307
<b>5</b>	<b>Pathophysiology of endocrine system (L. Zlatoš)</b>	<b>308</b>
5.1	Types of endocrine disorders	308
5.2	Etiology of endocrine disorders	309
5.3	Pathophysiology of hypothalamic-hypophyseal system	310
5.3.1	Pathophysiology of hypothalamic-neurohypophyseal system	310
5.3.2	Pathophysiology of hypothalamic-adenohypophyseal system	312
5.4	Pathophysiology of thyroid gland	325
5.4.1	Goiter (struma)	325
5.4.2	Hypothyroidism	330
5.4.3	Hyperthyroidism	339
5.4.4	Inflamations of the thyroid gland (thyroiditis)	348
5.4.5	Thyroid neoplasms	352
5.5	Pathophysiology of parathyroid glands	356
5.5.1	Hypoparathyroidism	356
5.5.2	Pseudohypoparathyroidism	359
5.5.3	Hyperparathyroidism	361
5.6	Pathophysiology of the adrenal glands	366
5.6.1	Pathophysiology of the adrenal cortex	367
5.6.2	Pathophysiology of adrenal medulla	387
5.7	Endocrine disorders of the ovaries	391
5.7.1	Ovarian endocrine hypofunction	391
5.7.2	Ovarian endocrine hyperfunction	394
5.7.3	Secretion of hormones atypical for the ovaries	397
5.8	Endocrine disorders of the testes	397
5.8.1	Hyposecretion of testicular hormones	398
5.8.2	Hypersecretion of testicular hormones	401
5.9	Pathophysiology of the endocrine pancreas	404
5.9.1	Diabetes mellitus	404
5.9.2	Tumors of the endocrine pancreas	426
<b>6</b>	<b>Pathophysiology of the nervous system (M. Bernadič et al.)</b>	<b>430</b>
6.1	The basic anatomical and physiological aspects	430
6.2	Neuronal injury	435
6.3	Neuroglia	437
6.4	The basic etiopathogenetic factors in the nervous system disturbances	437
6.4.1	Diseases with mainly intrinsic causes	437
6.4.2	Diseases mainly die to extrinsic causative agents	439
6.4.3	Diseases with mixed or unknown etiology	440
6.5	Some syndroms occuring upon the injury of the nervous system	440

6.6	Head injuries . . . . .	442
6.6.1	Brain tissue injury . . . . .	443
6.7	Brain edema . . . . .	446
6.8	Intracranial hypertension . . . . .	448
6.9	Hydrocephaly . . . . .	450
6.10	Demyelination disease . . . . .	451
6.10.1	Multiple sclerosis . . . . .	451
6.10.2	Acute disseminated encephalomyelitis . . . . .	453
6.10.3	The acute haemorrhagic leukoencephalopathy . . . . .	453
6.10.4	Experimental allergic encephalomyelitis . . . . .	453
6.10.5	Dysmyelination diseases . . . . .	454
6.11	Degenerative diseases of the CNS . . . . .	454
6.11.1	Parkinson disease (paralysis agitans) . . . . .	455
6.11.2	Alzheimer disease . . . . .	456
6.12	Epilepsy (J. Holzerová) . . . . .	457
6.12.1	The etiopathogenesis of the epileptic attack . . . . .	457
6.12.2	The epileptic focus . . . . .	458
6.12.3	Classification of the epileptic seizures . . . . .	462
6.12.4	Experimental epilepsy . . . . .	464
6.13	Disturbances of the oxygen supply to the brain (M. Bernadič) . . . . .	464
6.13.1	Hypoxic syndrom . . . . .	465
6.13.2	Localized ischemia . . . . .	465
6.13.3	Hyperoxic syndrom . . . . .	466
6.14	Cerebral infarction . . . . .	466
6.15	Intracranial haemorrhage . . . . .	467
6.15.1	Intracerebral haemorrhage . . . . .	467
6.15.2	Subarachnoid haemorrhage . . . . .	467
6.16	Aging changes and brain tissue atrophy . . . . .	468
6.17	Infections . . . . .	468
6.17.1	Bacterial infections . . . . .	468
6.17.2	Viral infections . . . . .	469
6.17.3	Infections with yeast and fungi . . . . .	471
6.17.4	Protozoal infections . . . . .	471
6.17.5	Metazoal infections . . . . .	472
6.18	Nutritional, toxic, and metabolic dysfunctions of the brain (encephalopathies) . . . . .	472
6.18.1	Diseases caused by nutritional disturbances . . . . .	472
6.18.2	Diseases caused by exogenous toxic substances . . . . .	473
6.18.3	Secondary conditioned metabolic injury to the nervous system . . . . .	473
6.18.4	Ethanol . . . . .	474
6.19	Tumors of the nervous system . . . . .	475
6.20	Injury of the spine . . . . .	476
6.20.1	Ascending and descending degeneration . . . . .	476
6.20.2	Injury of the motorpathways . . . . .	477
6.21	Diseases of the motor neuron . . . . .	477
6.21.1	Progressive bulbar paralysis and pseudobulbar paralysis . . . . .	478
6.22	Peripheral nerves . . . . .	478
6.23	Neuromuscular diseases . . . . .	479
6.23.1	Myasthenia gravis . . . . .	479
6.24	Autonomous (vegetative) nervous system (A. Kráľ) . . . . .	480

6.24.1	The architecture of the ANS . . . . .	481
6.24.2	The sympathetic nervous system and the adrenal medulla. The dopaminergic system. . . . .	483
6.24.3	Parasympathetic NS . . . . .	488
6.24.4	Non-adrenergic and non-cholinergic autonomic nerves . . . . .	489
6.24.5	Involvement of the ANS in the pathophysiology of disease states . . . . .	490
<b>7</b>	<b>Pathophysiology of the gastrointestinal tract ( I. Hulín, I. Ďuriš et al. )</b>	<b>496</b>
7.1	Introduction (I. Ďuriš, I. Hulín) . . . . .	496
7.2	Oesophagus . . . . .	497
7.2.1	Deglutition . . . . .	497
7.3	Diseases of the oesophagus . . . . .	498
7.3.1	Dysphagia . . . . .	498
7.3.2	Gastro-oesophageal reflux . . . . .	498
7.3.3	Motor impairments of the oesophagus . . . . .	498
7.4	Stomach and duodenum (I. Hulín, I. Ďuriš) . . . . .	499
7.5	Diseases of the stomach and duodenum . . . . .	501
7.5.1	Gastritis . . . . .	501
7.5.2	Peptic ulcer . . . . .	501
7.5.3	Stress ulcers and erosions . . . . .	505
7.5.4	Helicobacter pylori and diseases of GIT . . . . .	505
7.6	Exocrine pancreas (M. Bernadič) . . . . .	506
7.6.1	Classification of pathological states of the pancreas . . . . .	507
7.7	Impairment of the exocrine function of pancreas (M. Bernadič) . . . . .	508
7.7.1	Pancreatitis . . . . .	508
7.7.2	Cystic fibrosis of the pancreas (mucoviscidosis) . . . . .	510
7.8	Small intestine (I. Hulín, I. Ďuriš) . . . . .	510
7.8.1	Digestion and absorption in the small intestine . . . . .	511
7.8.2	Motility of the small intestine . . . . .	513
7.9	The large intestine . . . . .	514
7.10	Malabsorption . . . . .	515
7.10.1	Inadequate digestion (maldigestion) . . . . .	515
7.10.2	Inadequate absorption (malabsorption) . . . . .	515
7.11	Diarrhea . . . . .	517
7.11.1	Secretory diarrhea . . . . .	518
7.11.2	Osmotic diarrhea . . . . .	518
7.11.3	Diarrhea due to abnormal intestinal motility . . . . .	518
7.12	Constipation (H. Sapáková) . . . . .	519
7.12.1	Etiology and pathogenesis . . . . .	520
7.12.2	Irritable bowel syndrome . . . . .	521
7.12.3	Congenital and acquired megacolon . . . . .	522
7.13	Intestinal obstruction (M. Turčáni) . . . . .	522
7.13.1	Terminology, classification, clinical impact . . . . .	522
7.13.2	Etiology . . . . .	524
7.13.3	Pathogenesis . . . . .	524
7.13.4	Pathophysiological principles of ileus prevention . . . . .	526
7.14	Inflammation and other intestinal diseases (I. Hulín, I. Ďuriš) . . . . .	526
7.14.1	Ulcerative colitis . . . . .	527
7.14.2	Crohn's disease . . . . .	527
7.14.3	Ischaemic colitis . . . . .	528
7.14.4	Diverticulitis . . . . .	528

7.14.5	Extraintestinal manifestation of inflammatory intestinal diseases . . . . .	529
7.15	Tumours of the GIT . . . . .	529
7.15.1	Carcinoma of the oesophagus . . . . .	529
7.15.2	Carcinoma of the stomach . . . . .	530
7.15.3	Carcinoma of the large intestine . . . . .	530
7.15.4	Polyps in GIT . . . . .	531
7.16	Bleeding from GIT . . . . .	531
7.17	Abdominal pain . . . . .	533
7.18	The Liver (D. Maasová) . . . . .	535
7.18.1	Metabolism in liver . . . . .	536
7.19	Pathophysiology of the liver (D. Maasová) . . . . .	540
7.19.1	Acute hepatitis . . . . .	540
7.19.2	Chronic hepatitis . . . . .	542
7.19.3	Acute hepatic failure . . . . .	543
7.19.4	Chronic hepatic failure . . . . .	543
7.19.5	Hepatic cirrhosis . . . . .	543
7.19.6	Portal hypertension . . . . .	545
7.19.7	Ascites . . . . .	546
7.19.8	Hepatic encephalopathy . . . . .	546
7.19.9	Hepatorenal syndrome . . . . .	547
7.20	Jaundice (D. Maasová) . . . . .	547
7.21	Diseases of the gallbladder (D. Maasová) . . . . .	552
7.21.1	Cholelithiasis . . . . .	552
7.21.2	Cholecystitis . . . . .	552
7.22	Gastrointestinal hormones (I. Ďuriš) . . . . .	553
<b>8</b>	<b>Pathophysiology of bones and joints ( D. Maasová et al. )</b>	<b>557</b>
8.1	Introduction . . . . .	557
8.1.1	Remarks to the anatomy and physiology of bones . . . . .	557
8.1.2	Hormones influencing the bone tissue . . . . .	559
8.2	Generalized skeleton disorders . . . . .	562
8.2.1	Skeleton balance disorders . . . . .	562
8.2.2	Disorders of ground substance . . . . .	565
8.2.3	Disorders of mineralization . . . . .	566
8.2.4	Renal osteodystrophy – a combined disturbance of mineral metabolism . . . . .	567
8.3	Localized bone disorders . . . . .	568
8.3.1	Locally enhanced bone resorption . . . . .	568
8.3.2	Local disorders of blood supply . . . . .	568
8.4	Disorders of joints (I. Šulková, M. Bakošová) . . . . .	569
8.4.1	Some remarks on anatomy and physiology . . . . .	569
8.4.2	Degenerative disorders of the joints . . . . .	570
8.4.3	Inflammatory disorders of the joints . . . . .	572
8.4.4	Arthritis urica (gout) . . . . .	575
<b>9</b>	<b>Inflammation and fever ( I. Hulín, M. Ferenčík, V. Štvrtinová, J. Jakubovský )</b>	<b>577</b>
9.1	Inflammation . . . . .	577
9.1.1	Principles of inflammation . . . . .	577
9.1.2	Exudation and swelling . . . . .	583
9.1.3	Cells participating in inflammation . . . . .	584
9.1.4	Mediators of inflammation . . . . .	604

9.1.5	Molecular mechanisms of the acute cell-mediated inflammatory reaction . . . . .	624
9.1.6	Categories of inflammation mediated by the immune system . . . . .	628
9.2	Fever (I. Hulín) . . . . .	634
9.2.1	Regulation and control of body temperature . . . . .	634
9.2.2	Pathogenesis of fever . . . . .	635
9.2.3	Causes of fever . . . . .	636
9.2.4	Progress of the fever and accompanying symptoms . . . . .	637
9.2.5	Fever from the clinical point of view . . . . .	639
<b>10</b>	<b>Pathophysiology of malignant disease ( B. Mladosičová )</b>	<b>641</b>
10.1	Carcinogenesis . . . . .	641
10.1.1	Chemical carcinogenesis . . . . .	642
10.1.2	Radiation carcinogenesis . . . . .	643
10.1.3	Viral carcinogenesis . . . . .	644
10.1.4	Hormones and carcinogenesis . . . . .	646
10.1.5	Irritation and carcinogenesis . . . . .	646
10.2	Cellular oncogenes . . . . .	646
10.3	Characteristics of cancer cells . . . . .	647
10.3.1	Tumor cell markers . . . . .	648
10.3.2	Similarity of embryonic and malignant cells . . . . .	649
10.4	Tumor growth and development . . . . .	651
10.4.1	Tumor classification . . . . .	651
10.4.2	Malignant tumor growth . . . . .	651
10.4.3	Tumor angiogenesis . . . . .	651
10.4.4	Pathogenesis of metastasis . . . . .	651
10.5	Predisposing factors of cancer cells . . . . .	653
10.6	Characteristics of benign tumors . . . . .	653
10.7	Pathophysiology of malignant disease . . . . .	654
10.7.1	Cachexia . . . . .	655
10.7.2	Infection . . . . .	655
10.7.3	Anaemia . . . . .	656
10.7.4	Leukopenia and thrombocytopenia . . . . .	656
10.7.5	Pain . . . . .	658
10.8	Immune surveillance and cancer . . . . .	658
<b>11</b>	<b>Fluids and electrolytes ( H. Sapáková, D. Maasová )</b>	<b>659</b>
11.1	Fluid disorders (H. Sapáková) . . . . .	659
11.1.1	Extracellular fluid (ECF) . . . . .	660
11.1.2	Fluid in other extracellular spaces . . . . .	660
11.1.3	Intracellular fluid (ICF) . . . . .	660
11.1.4	The characteristic of the main body fluid compartments . . . . .	661
11.1.5	Changes in the volume of body fluids . . . . .	662
11.1.6	Dehydration . . . . .	662
11.1.7	Hyperhydration . . . . .	664
11.2	Electrolyte balance and its disturbances (H. Sapáková) . . . . .	666
11.2.1	Sodium . . . . .	666
11.2.2	Chlorides . . . . .	668
11.2.3	Potassium . . . . .	668
11.2.4	Calcium and Magnesium . . . . .	670
11.2.5	Phosphorus . . . . .	673

11.3 Disorders of acid-base homeostasis (D. Maasová, Š. Navarčíková) . . . . .	674
11.3.1 Regulation mechanisms of acid-base homeostasis . . . . .	674
11.3.2 Classification of acid-base disturbances . . . . .	675
11.3.3 Compensation of acid-base disturbances . . . . .	676
11.3.4 Metabolic acidosis . . . . .	677
11.3.5 Metabolic alkalosis . . . . .	678
11.3.6 Respiratory acidosis . . . . .	679
11.3.7 Respiratory alkalosis . . . . .	680
11.3.8 Therapeutical principles of acid-base disturbances . . . . .	680
<b>Key words index</b>	<b>683</b>
