<b>1</b>	<b>Introduction: Periodic Signals and Filters</b> . . . . .	1
1.1	Periodic Discrete-Time Signals . . . . .	1
1.1.1	One-Dimensional Periodic Discrete-Time Signals . . . . .	1
1.1.2	Two-Dimensional Periodic Discrete-Time Signals . . . . .	4
1.2	Periodic Filters . . . . .	5
1.2.1	Definition of Periodic Filters . . . . .	5
1.2.2	Multirate p-Filtering . . . . .	6
1.3	Periodic Filter Banks . . . . .	8
1.3.1	Modulation Matrices of p-Filter Banks . . . . .	8
1.3.2	Polyphase Matrices of p-Filter Banks . . . . .	9
	References . . . . .	10
<b>2</b>	<b>Periodic Polynomial Splines</b> . . . . .	11
2.1	Periodic B-Splines and Spline Spaces . . . . .	11
2.2	Exponential Splines and Characteristic Sequences . . . . .	13
2.3	Spline Harmonic Analysis (SHA) in the Space of Periodic Polynomial Splines . . . . .	14
2.3.1	Orthogonal Periodic Exponential Splines . . . . .	14
2.3.2	Representation of Periodic Splines by Exponential Spline Bases . . . . .	15
2.4	SHA in Two-Dimensional Spline Spaces . . . . .	19
	References . . . . .	20
<b>3</b>	<b>Periodic Discrete and Discrete-Time Splines</b> . . . . .	21
3.1	Periodic Discrete Splines of Span 2 . . . . .	21
3.1.1	B-Splines and Discrete Spline Spaces . . . . .	21
3.1.2	Exponential Discrete Splines and Characteristic Sequences . . . . .	23

3.1.3	Interpolating and Quasi-interpolating Discrete Splines . . . . .	25
3.1.4	Orthonormal Periodic Discrete Splines . . . . .	27
3.2	Two-Dimensional Discrete Splines of Span 2 . . . . .	30
3.3	Periodic Discrete-Time Splines . . . . .	32
3.3.1	B-Splines and Discrete-Time Spline Spaces . . . . .	32
3.3.2	Exponential Discrete-Time Splines and Characteristic Sequences . . . . .	35
3.3.3	Orthonormal Periodic Discrete-Time Splines . . . . .	37
3.3.4	Interpolating Discrete-Time Splines . . . . .	39
	References . . . . .	40
<b>4</b>	<b>Periodic Orthogonal Wavelets and Wavelet Packets . . . . .</b>	<b>41</b>
4.1	Discrete-Spline Wavelets of First Decomposition Level . . . . .	41
4.1.1	Orthogonal Complement for Subspace ${}^{2r}\mathcal{S}_{[1]}^0$ . . . . .	41
4.1.2	Orthogonal Complement for Subspace ${}^p\bar{\mathcal{S}}_{[1]}^0$ . . . . .	44
4.1.3	One-Level Wavelet Transform of a Signal . . . . .	45
4.2	Two-Level Discrete-Spline Wavelet and Wavelet Packets Transforms . . . . .	48
4.2.1	P-Filter Banks for the Second Decomposition Level . . . . .	48
4.2.2	Two-Level Wavelet Transforms . . . . .	50
4.2.3	Two-Level Wavelet Packet Transforms . . . . .	55
4.2.4	Selection of Wavelet-Packet Basis . . . . .	59
4.3	Extension of Wavelet Packet Transforms to Lower Decomposition Levels . . . . .	61
4.3.1	Discrete-Spline Wavelet Packets . . . . .	61
4.3.2	Discrete-Time-Spline Wavelet Packets . . . . .	63
4.4	Best Basis and Signal's Restoration from Wavelet Packet Bases . . . . .	64
4.5	Illustrations . . . . .	66
4.6	Waveband Spectra . . . . .	68
	References . . . . .	72
<b>5</b>	<b>Two-Dimensional Orthogonal Wavelets and Wavelet Packets . . . . .</b>	<b>73</b>
5.1	Two-Dimensional Discrete-Spline and Discrete-Time-Spline Wavelets . . . . .	73
5.1.1	Wavelets of the First Decomposition Level . . . . .	73
5.1.2	Multi-level 2D Wavelet Transforms . . . . .	76
5.2	Two-Dimensional Discrete-Spline Wavelet Packets . . . . .	78
5.2.1	Direct Wavelet Packet Transforms . . . . .	78
5.2.2	Best Basis and Restoration of 2D Signals From Wavelet Packet Bases . . . . .	80

<b>6</b>	<b>Local Splines on Non-uniform Grid</b> .....	83
6.1	Preliminaries .....	83
6.2	Local Cubic Splines .....	86
6.2.1	Simplest Cubic Splines .....	87
6.2.2	Quasi-interpolating Cubic Splines .....	88
6.2.3	Two-Dimensional Cubic Splines .....	97
6.3	Local Quadratic Splines .....	100
6.3.1	Design of Quadratic Quasi-interpolating Splines .....	100
6.3.2	Extension of Splines to Boundaries and Extrapolation .....	105
6.3.3	Quadratic Splines on Uniform Grids .....	107
6.4	Examples: Restoration of <i>Chirp</i> Function .....	110
6.4.1	Cubic Splines .....	110
6.4.2	Quadratic Splines .....	111

**Appendix A: Guide to SB\_Soft1** ..... 263

**Glossary** ..... 275

**Bibliography** ..... 279

**Index** ..... 285

11.6 Appendix: Outline of the CARF Algorithm ..... 216

11.7 Appendix: References ..... 218

12 Acoustic Detection of Moving Vehicles ..... 261

12.1 Introduction ..... 219

12.2 Structure of the Recorded Acoustic Signals ..... 220

12.3 Formulation of the Approach ..... 222

12.3.1 Outline of the Approach ..... 223

12.4 Description of the Algorithm and Its Implementation ..... 224

12.4.1 The Algorithm ..... 224

12.4.2 Choice of the Analyzing Waveforms ..... 225

12.4.3 Training the Algorithm ..... 226

12.4.4 Identification of an Acoustic Signal ..... 228

12.5 Experimental Results ..... 277

12.5.1 Detection Experiments ..... 277

12.5.2 Examples of the Detection of a Moving Vehicle with a Signal ..... 278

12.6 Appendix: Random Search for a Near-Optimal Footprint ..... 281

12.7 Appendix: Sensing Method for Acoustic Detection ..... 289

13 Detection of Incipient Bearing Fault in a Slowly Rotating Machine Using Spline Wavelet Packets ..... 281

13.1 Preliminaries ..... 281

13.1.1 Background ..... 281

13.1.2 Outline of the Methodology ..... 282

13.1.3 Time-Domain Meaning of Wavelet Packet Transform ..... 283

13.2 WPT-Based Methodology for Fault Detection ..... 284

13.2.1 Structure of the Recorded Data ..... 284

13.2.2 Outline of the Research Methodology ..... 288

13.3 Experimental Results ..... 291

13.3.1 Experiments with Bearings with Faults ..... 291

13.3.2 Experiments with Bearings with Faults ..... 292

13.3.3 Experiments with Bearings with Faults ..... 293

13.3.4 Comments ..... 299

13.4 Appendix: Envelope of the Recorded Signal ..... 300

13.5 Appendix: Characteristics of the Recorded Signal ..... 302

13.6 Dimension Reduction ..... 302
