<i>Preface</i>	vii
<i>Figures and tables</i>	xi
1. Introducing blockchain	1
1.1 A transaction	2
1.2 Key characteristics	6
1.3 Categories	10
2. Blockchain's basic components	15
2.1 Technical components	18
2.2 Mathematical components	35
2.3 Economic, political and social components	49
3. Potential and actual socio-economic impacts of blockchain	81
3.1 Crypto knowledge and crypto usage	84
3.2 Perceived and actual use of cryptocurrencies	90
3.3 Dis-intermediation, localization and individualization	97
3.4 Censorship resistance and privacy	103
3.5 Property and the empowerment of the individual	106
3.6 New markets and marketplaces	108
3.7 Crypto-secession: the most disruptive potential of distributed ledger technology	111
4. Applications of blockchain technology in different domains	115
4.1 Central bank digital currency (CBDC)	117
4.2 Energy markets and infrastructure	124

Contents

4.3 Self-sovereign identity	133
4.4 Capital markets and security services	141
4.5 Supply chains and logistics	151
4.6 The gambling industry	164
5. Conclusion: possible directions of blockchain	173
