

# CONTENTS

<b>1. BASIC CONCEPTS IN NUTRITION.....</b>	<b>1</b>
<b>1.1. Energy and protein balance .....</b>	<b>1</b>
<b>1.2. Body composition.....</b>	<b>7</b>
1.2.1. Body composition and its measurement.....	7
1.2.1.1. Background.....	8
1.2.1.2. Densitometry .....	8
1.2.1.3. Total body water.....	9
1.2.1.4. Anthropometry .....	10
1.2.1.5. Other methods for measuring body composition.....	11
1.2.1.6. Precision of body composition estimates .....	12
1.2.2. Bioelectrical Impedance Analysis.....	13
1.2.2.1. Basic principle of the method.....	14
1.2.2.2. Factors which influence BIA measurement .....	17
1.2.2.3. BIA as marker of tissue health .....	18
1.2.2.4. BIA methods used in clinical practice.....	18
<b>1.3. Diagnosis of malnutrition — Screening and assessment.....</b>	<b>21</b>
1.3.1. Definition of Malnutrition.....	21
1.3.2. Screening .....	22
1.3.3. Nutritional Assessment .....	23
1.3.4. Techniques used in nutritional assessment.....	26
<b>1.4. Influence of malnutrition on function.....</b>	<b>32</b>
<b>1.5. Overnutrition – functional and clinical consequences.....</b>	<b>36</b>
1.5.1. Physiology of adipose tissue .....	37
1.5.2. Acute overfeeding.....	39
1.5.3. Chronic overfeeding .....	39
1.5.3.1. Obesity .....	39
1.5.3.2. Obesity and metabolic complications .....	41
1.5.3.3. Metabolic syndrome .....	43
1.5.4. Treatment of obesity .....	43
1.5.5. Perioperative nutritional treatment of obese patients .....	45
<b>1.6. Prevalence of malnutrition.....</b>	<b>46</b>
1.6.1. Undernutrition (disease-related malnutrition) .....	47
1.6.2. Prevalence of undernutrition .....	48
1.6.3. Causes.....	50
1.6.4. Overnutrition (overweight/obesity).....	50
<b>1.7. Nutritional requirements for health at rest and upon exercise.....</b>	<b>53</b>
1.7.1. Adult subjects .....	53
1.7.1.1. Macronutrients.....	53
1.7.1.2. Micronutrients .....	59

1.7.2.	Nutritional needs of infants, children and adolescents .....	61
1.7.2.1.	Nutrient requirements for growth and development .....	62
1.7.2.2.	Nutrient requirements .....	64
<b>2.</b>	<b>NUTRITIONAL PHYSIOLOGY AND BIOCHEMISTRY .....</b>	<b>77</b>
<b>2.1.</b>	<b>Appetite and its control .....</b>	<b>77</b>
2.1.1.	Peripheral signals .....	78
2.1.2.	Hypothalamic pathways integrating peripheral signals .....	80
<b>2.2.</b>	<b>Digestion and absorption of nutrients .....</b>	<b>83</b>
2.2.1.	Principal sites of digestion and absorption .....	84
2.2.2.	The small intestine .....	85
2.2.2.1.	Carbohydrates .....	85
2.2.2.2.	Lipids .....	88
2.2.2.3.	Proteins .....	90
2.2.2.4.	Vitamins .....	92
2.2.2.5.	Water electrolytes and trace elements .....	93
2.2.3.	The absorptive functions of the colon .....	94
2.2.3.1.	Water and electrolytes .....	94
2.2.3.2.	Metabolic and digestive functions .....	94
<b>2.3.</b>	<b>Energy metabolism .....</b>	<b>96</b>
2.3.1.	Calorimetry for the measurement of energy expenditure .....	96
2.3.2.	Components of energy expenditure, measurement and determinants .....	99
2.3.3.	Disease-related alterations in energy expenditure .....	100
2.3.4.	Energy expenditure in intensive care .....	101
<b>2.4.</b>	<b>Carbohydrate metabolism .....</b>	<b>103</b>
2.4.1.	Carbohydrates in normal metabolism .....	103
2.4.2.	Regulation of glucose metabolism .....	104
2.4.3.	Effects of stress on glucose metabolism .....	105
2.4.4.	Metabolic responses to critical illness .....	107
<b>2.5.</b>	<b>Lipid metabolism .....</b>	<b>108</b>
2.5.1.	Basic pathways in lipid metabolism .....	109
2.5.2.	Lipid metabolism in fasting conditions .....	112
2.5.3.	Influence of surgical stress, sepsis and organ failure .....	113
<b>2.6.</b>	<b>Protein and amino acid metabolism .....</b>	<b>115</b>
2.6.1.	Physiology .....	116
2.6.2.	Protein turnover .....	117
2.6.3.	Metabolism of amino acids .....	118
2.6.4.	Whole body protein synthesis and/or breakdown .....	119
2.6.5.	Methods to measure protein metabolism .....	123
<b>2.7.</b>	<b>Water and electrolytes in health and disease .....</b>	<b>128</b>
2.7.1.	Water and fluid compartments .....	128
2.7.2.	Flux of fluid through the gastrointestinal tract .....	130
2.7.3.	Role of the kidney .....	131
2.7.4.	External fluid balance .....	132
2.7.5.	Effects of starvation and injury .....	133
2.7.6.	Electrolytes .....	133
<b>2.8.</b>	<b>Physiological function and deficiency states of trace elements .....</b>	<b>140</b>
<b>2.9.</b>	<b>Physiological function and deficiency states of vitamins .....</b>	<b>145</b>

<b>2.10. Antioxidants in health and disease</b> .....	153
2.10.1. Oxidative stress .....	154
2.10.2. Oxidation in vivo and neutralisation of RNOS .....	155
2.10.3. Dietary recommendations for antioxidants .....	156
<b>2.11. Dietary fibre: metabolism and physiological effects</b> .....	157
2.11.1. Physicochemical properties and metabolism of fibre .....	158
2.11.2. Physiological effects of fibre in the gut and the clinical implications .....	162
<b>2.12. Simple and stress starvation</b> .....	170
2.12.1. Energy stores .....	171
2.12.2. Simple starvation .....	171
2.12.3. Stress starvation .....	173
2.12.4. Malnutrition and the response to injury .....	175
<b>2.13. Influence of genotype on inflammation and metabolism</b> .....	178
2.13.1. Single nucleotide polymorphisms and cytokines .....	178
2.13.2. Gender gene effects .....	180
2.13.3. Genotype insulin sensitivity and body fat mass and distribution .....	180
2.13.4. Genomic effects on longevity .....	181
2.13.5. Influence of genotype on anti-inflammatory responses to nutrients .....	182
<b>2.14. Injury and sepsis</b> .....	185
2.14.1. Main cytokines and their effect during injury and sepsis .....	185
2.14.1.1. Reaction of the immune system .....	186
2.14.1.2. Endocrine changes during the inflammatory response .....	187
2.14.1.3. The immune response exerts a high metabolic and nutritional cost upon the body .....	187
2.14.1.4. Adverse effects of cytokines .....	189
2.14.1.5. Antioxidant defences are depleted by infection and trauma .....	190
2.14.1.6. Influence of phenotype on the cytokine response .....	191
2.14.2. The neuroendocrine response .....	192
2.14.2.1. Neural stimuli and the sympathetic nervous system .....	193
2.14.2.2. Endocrine effects on metabolism .....	194
2.14.2.3. Therapeutic implications .....	195
2.14.3. Metabolic response to injury and sepsis .....	197
2.14.3.1. Stress response .....	198
2.14.3.2. Substrate metabolism .....	199
<b>2.15. Metabolic response to hypoxia</b> .....	203
2.15.1. Transient response to anoxia or acute hypoxia .....	204
2.15.2. Functional adaptation to hypoxia .....	205
2.15.3. Molecular adaptation to hypoxia .....	207
2.15.4. Nutritional consequences of chronic hypoxia .....	208
<b>2.16. Nutritional aspects of chronic inflammatory disease</b> .....	209
2.16.1. Chronic inflammation .....	210
2.16.2. Characteristic disease processes or conditions .....	212
2.16.3. Interventions .....	213
<b>2.17. Metabolic aspects of neurological diseases</b> .....	216
2.17.1. Denervation atrophy .....	217
2.17.2. Metabolic consequences of muscle denervation .....	217
2.17.3. Hormonal and systemic consequences .....	219
2.17.4. Amyotrophic lateral sclerosis .....	220

<b>3. INDICATIONS FOR NUTRITIONAL SUPPORT</b> .....	<b>223</b>
3.1. A clinical framework for considering the indications for nutritional support .....	224
3.2. A practical framework for considering the indications for nutritional support .....	226
3.2.1. Identify malnutrition or those at risk of malnutrition.....	226
3.2.2. Treat malnutrition or those at risk of malnutrition with the appropriate type of nutritional support.....	227
3.3. Common indications of nutritional support according to healthcare setting and disease.....	228
<b>4. ORGANISATION AND LEGAL ASPECTS</b> .....	<b>231</b>
4.1. Organisation of nutritional care .....	231
4.1.1. Policy, Standards and Protocols .....	231
4.1.2. Hospital food and catering .....	233
4.1.3. Education and training .....	233
4.1.4. Dietetics .....	234
4.1.5. Nutritional support teams .....	234
4.1.6. Purchasing and Equipment .....	235
4.2. Ethical and legal aspects .....	236
4.2.1. Beneficence and non maleficence.....	236
4.2.2. Autonomy .....	238
4.2.3. Special situations.....	239
4.2.4. Justice .....	242
<b>5. SUBSTRATES USED IN PARENTERAL AND ENTERAL NUTRITION</b> .....	<b>247</b>
5.1. Energy.....	247
5.1.1. Energy intake during nutrition support .....	248
5.1.2. Energy intake and acute disease stage .....	250
5.2. Carbohydrates.....	252
5.2.1. Carbohydrate metabolism in nutrition support.....	252
5.2.2. Carbohydrates used in nutrition support .....	253
5.2.3. Dosages of carbohydrates in parenteral and enteral nutrition .....	255
5.3. Lipids.....	257
5.3.1. Enteral nutrition .....	258
5.3.2. Parenteral nutrition .....	258
5.4. Proteins and amino acids .....	262
5.4.1. Requirements of proteins and amino acids in humans.....	262
5.4.2. Requirements of protein and amino acids in disease .....	263
5.4.3. Sources and chemical nature.....	264
5.4.4. Assessment of the biological quality of proteins.....	264
5.4.5. Amino acids: the building blocks of protein.....	265
5.5. Water and electrolytes during nutritional support .....	268
5.5.1. Monitoring.....	269
5.5.2. Normal requirements.....	269
5.5.3. Abnormal requirements.....	269
5.5.4. Oral rehydration solutions.....	270
5.5.5. Enteral nutrition .....	271
5.5.6. Subcutaneous fluids .....	271
5.5.7. Parenteral fluids .....	272

<b>5.6. Trace elements and vitamins in parenteral and enteral nutrition</b> .....	273
5.6.1. Micronutrients and trace elements.....	273
5.6.1.1. Individuals at risk of deficiency.....	273
5.6.1.2. Clinical deficiency syndromes and subclinical deficiency states	274
5.6.1.3. Optimisation of provision of micronutrients.....	274
5.6.1.4. Legislation from the European Union and enteral nutrition..	276
5.6.2. Trace elements in PN and EN.....	276
5.6.3. Vitamins in EN and PN.....	278
<b>5.7. Dietary fibre: definition and classification</b> .....	281
5.7.1. Definition.....	281
5.7.2. Classifications.....	282
<b>5.8. Special substrates</b> .....	287
5.8.1. Antioxidants and phytochemicals in nutrition.....	287
5.8.1.1. What is an antioxidant?.....	288
5.8.1.2. Damage associated with depletion of antioxidants.....	288
5.8.1.3. Who might benefit from antioxidant supplements: biomarkers of oxidative stress.....	288
5.8.1.4. Overview of antioxidant strategies.....	289
5.8.1.5. Dietary antioxidants.....	290
5.8.1.6. Some remaining questions related to antioxidant therapy:...	290
5.8.2. Nutrients that influence inflammation and immunity: $\omega$ -3 fatty acids..	292
5.8.2.1. $\omega$ -3 fatty acids.....	292
5.8.2.2. Dietary sources and typical intakes of $\omega$ -3 fatty acids.....	293
5.8.2.3. Supplementation with long-chain $\omega$ -3 fatty acids alters the fatty-acid composition of plasma, cells and tissues in humans..	293
5.8.2.4. Mechanisms of action of long-chain $\omega$ -3 fatty acids.....	294
5.8.2.5. Experimental studies with long-chain $\omega$ -3 fatty acids.....	295
5.8.2.6. Fish oil in artificial nutrition.....	296
5.8.3. Nutrients that influence immunity: experimental and clinical data....	299
5.8.3.1. Glutamine.....	299
5.8.3.2. Arginine.....	301
5.8.3.3. Nucleotides.....	302
5.8.3.4. Polyunsaturated fatty acids (PUFAs).....	303
5.8.3.5. Micronutrients.....	305
<b>6. TECHNIQUES OF NUTRITIONAL SUPPORT</b> .....	309
<b>6.1. Enteral nutrition</b> .....	309
6.1.1. Indications and administration of nutrition.....	309
6.1.1.1. Indications for enteral nutrition.....	309
6.1.1.2. Contraindications to enteral nutrition.....	309
6.1.1.3. Routes for enteral tube feeding.....	310
6.1.1.4. Choice of feeding solution.....	310
6.1.2. Methods of delivering enteral nutrition.....	312
6.1.2.1. Oral nutritional supplements.....	312
6.1.2.2. Transnasal access.....	314
6.1.2.3. Endoscopic access: PEG, PEG-J and D-PEJ.....	316
6.1.2.4. Surgical access: gastrostomy, needle catheter jejunostomy...	323
6.1.2.5. Administration of enteral tube feeds.....	326
6.1.2.6. Equipment for delivering enteral nutrition.....	327

6.1.3.	Diets for enteral nutrition .....	330
6.1.3.1.	Homemade enteral (tube) nutrition .....	330
6.1.3.2.	Commercially prepared diets for enteral nutrition .....	333
6.1.4.	Complications of Enteral Nutrition .....	343
6.1.4.1.	Gastrointestinal complications.....	344
6.1.4.2.	Mechanical complications.....	345
6.1.4.3.	Metabolic complications .....	347
<b>6.2.</b>	<b>Parenteral nutrition</b> .....	<b>348</b>
6.2.1.	Methods of delivering parenteral nutrition.....	348
6.2.1.1.	Peripheral parenteral nutrition.....	348
6.2.1.2.	Central parenteral nutrition .....	353
6.2.1.3.	Complications associated with central catheter insertion and care .....	363
6.2.2.	Different systems for parenteral nutrition (AIO vs. MB) .....	370
6.2.2.1.	Multiple bottle system .....	370
6.2.2.2.	All-in-One system .....	370
6.2.3.	Pharmaceutical aspects of parenteral nutrition support.....	373
6.2.3.1.	Compounding of an AIO admixture.....	374
6.2.3.2.	Stability and compatibility of parenteral nutrition admixtures	384
6.2.3.3.	Drugs and nutritional admixtures .....	392
6.2.4.	Composition of nutritional admixtures and formulas for parenteral nutrition .....	400
6.2.4.1.	Planning of parenteral nutrition .....	401
6.2.4.2.	PN formulas .....	405
6.2.4.3.	Initiating parenteral nutrition .....	406
6.2.5.	Metabolic complications of parenteral nutrition .....	411
6.2.5.1.	Clinically relevant acute metabolic complications .....	412
6.2.5.2.	Long-term metabolic complications .....	415
<b>7.</b>	<b>MONITORING OF NUTRITIONAL SUPPORT</b> .....	<b>419</b>
7.1.	<b>Clinical monitoring</b> .....	<b>419</b>
7.1.1.	Aims and objectives .....	419
7.1.2.	Integrated nutrition .....	420
7.1.3.	Parameters .....	420
7.2.	<b>Some laboratory measures of response to nutrition</b> .....	<b>421</b>
7.2.1.	Nitrogen balance.....	422
7.2.2.	Proteins as markers of nutritional status.....	423
7.2.3.	Other laboratory markers .....	425
7.3.	<b>Refeeding syndrome.</b> .....	<b>427</b>
7.3.1.	Pathophysiology .....	428
7.3.2.	Clinical manifestation .....	428
7.3.3.	Guidelines for prevention and treatment of the refeeding syndrome in adult patients at risk .....	429
<b>8.</b>	<b>NUTRITIONAL SUPPORT IN DIFFERENT CLINICAL SITUATIONS</b> .....	<b>433</b>
8.1.	<b>Nutritional support in severe malnutrition</b> .....	<b>433</b>
8.1.1.	Nutrition support .....	433
8.1.2.	Oral nutritional support .....	434
8.1.3.	Enteral nutrition .....	435
8.1.4.	Parenteral nutrition .....	435

8.1.5.	Monitoring.....	436
8.1.6.	Rehabilitation.....	436
<b>8.2.</b>	<b>Perioperative nutrition.....</b>	<b>437</b>
8.2.1.	Preliminary remarks.....	437
8.2.2.	Patients at low risk from nutrition-related complications.....	439
8.2.3.	Malnourished patients.....	440
8.2.4.	Complicated surgical patients.....	442
8.2.5.	Prescription of feed.....	442
8.2.6.	Integration.....	443
<b>8.3.</b>	<b>Nutritional support in critically ill and septic patients.....</b>	<b>444</b>
8.3.1.	Enteral versus parenteral nutrition.....	445
8.3.2.	Energy supply.....	446
8.3.3.	Glucose.....	446
8.3.4.	Lipids.....	448
8.3.5.	Amino acids.....	449
8.3.6.	Vitamins and trace elements.....	449
<b>8.4.</b>	<b>Nutritional support in trauma.....</b>	<b>451</b>
8.4.1.	Pathophysiology of trauma reaction.....	451
8.4.2.	Nutritional support in trauma patients.....	453
<b>8.5.</b>	<b>Nutritional support in inflammatory bowel disease.....</b>	<b>458</b>
8.5.1.	Effect of inflammatory bowel disease on nutritional status and metabolism.....	458
8.5.2.	Indications for nutritional support.....	459
8.5.3.	Preoperative nutrition.....	464
8.5.4.	Relapse prevention.....	464
8.5.5.	Pharmaconutrition in IBD.....	465
8.5.6.	Symptomatic therapy.....	465
<b>8.6.</b>	<b>Nutrition support in liver disease.....</b>	<b>466</b>
8.6.1.	Nutrition in liver disease.....	467
8.6.1.1.	Oral diet.....	467
8.6.1.2.	Dietary supplements.....	467
8.6.1.3.	Enteral feeding.....	468
8.6.1.4.	Parenteral nutrition.....	469
8.6.2.	Conclusions for diagnosis related nutritional therapy.....	470
<b>8.7.</b>	<b>Nutritional support in renal disease.....</b>	<b>473</b>
8.7.1.	Pathophysiology.....	474
8.7.2.	Nutritional therapy of patients with renal disease.....	474
8.7.2.1.	Non-catabolic patients with stable chronic kidney disease... ..	474
8.7.2.2.	Patients on chronic renal replacement therapy.....	475
8.7.2.3.	Patients with acute renal failure (ARF) and HD/CAPD patients with acute catabolic disease.....	479
8.7.2.4.	Solutions used for nutritional support.....	481
8.7.2.5.	Complications and monitoring of nutritional support.....	482
8.7.2.6.	Nutritional management of renal transplantation.....	482
<b>8.8.</b>	<b>Nutrition in pulmonary and cardiac disease.....</b>	<b>485</b>
8.8.1.	Epidemiology.....	485
8.8.2.	Pathophysiology and consequences of malnutrition.....	487
8.8.3.	Nutritional support and intervention.....	489

<b>8.9. Nutritional support in acute and chronic pancreatitis</b> .....	494
8.9.1. Acute pancreatitis .....	495
8.9.1.1. Outcome predictors .....	496
8.9.1.2. Physiology and pathophysiology with respect to nutrition and fluid resuscitation .....	497
8.9.1.3. Treatment of acute pancreatitis .....	498
8.9.1.4. Nutritional support .....	499
8.9.2. Chronic pancreatitis .....	505
8.9.2.1. Nutritional treatment in chronic pancreatitis .....	506
<b>8.10. Nutrition support in GI fistulas</b> .....	510
8.10.1. Complications of fistula .....	510
8.10.2. Principles of fistula management .....	511
<b>8.11. Nutritional support in extensive gut resection (short bowel syndrome)</b> .....	514
8.11.1. Aetiology of short bowel syndrome .....	515
8.11.2. Pathophysiology .....	516
8.11.3. Complications of SBS .....	517
8.11.4. Small bowel adaptation .....	519
8.11.5. Management of SBS .....	520
8.11.6. Dietary management of SBS .....	521
8.11.7. The role of the dietician in SBS treatment .....	525
<b>8.12. Nutritional consequences of bariatric surgery</b> .....	528
8.12.1. Principal bariatric modalities .....	530
8.12.2. Perioperative nutritional management .....	530
8.12.3. Expected weight loss .....	531
8.12.4. Early nutritional complications .....	532
8.12.5. Stabilisation period .....	533
8.12.6. Long-term nutritional complications .....	533
8.12.7. Priorities in nutritional supplementation .....	534
8.12.8. Recommendations for pregnancy .....	537
8.12.9. Attention to children and adolescents .....	538
8.12.10. Refeeding the undernourished bariatric subject .....	538
<b>8.13. Nutrition in the elderly</b> .....	540
8.13.1. Determinants of PEM in the elderly .....	542
8.13.1.1. Changes in body composition and function .....	542
8.13.1.2. Appetite in the elderly .....	545
8.13.1.3. Small-bowel bacterial overgrowth .....	547
8.13.1.4. The ageing immune system .....	548
8.13.2. Drug interactions in the elderly .....	549
8.13.3. PEM in the elderly and outcome .....	550
8.13.4. Detection of undernutrition in the elderly .....	550
8.13.5. Changes in nutrient requirements .....	554
8.13.6. Nutritional intervention .....	557
8.13.7. Ethical considerations .....	560
<b>8.14. Nutritional support in burns patients</b> .....	563
8.14.1. Pathophysiology and fluid resuscitation of burn injuries .....	564
8.14.1.1. Metabolic response .....	564
8.14.2. Treatment .....	565
8.14.2.1. Non-nutritional measures .....	565
8.14.2.2. Nutritional requirements .....	565
8.14.2.3. Route of nutritional administration .....	569

<b>8.15. Nutritional support in cancer patients</b> .....	573
8.15.1. General features of the nutritional support .....	573
8.15.1. Nutritional regimens .....	575
8.15.2. Indications .....	576
8.15.3. Perioperative nutrition .....	577
8.15.4. Non surgical cancer patients .....	579
8.15.5. Home artificial nutrition .....	580
<b>8.16. Cancer Cachexia</b> .....	583
8.16.1. Definition .....	583
8.16.2. Pathogenesis .....	584
8.16.3. Impact of weight loss on clinical features and outcome .....	589
<b>8.17. Radiation enteropathy</b> .....	591
8.17.1. Role of parenteral nutrition .....	592
8.17.2. Outcome with long-term HPN .....	592
<b>8.18. Effect of anticachectic agents in cancer</b> .....	594
8.18.1. Appetite stimulating agents .....	594
8.18.2. Anticatabolic agents .....	595
8.18.3. Anabolic agents .....	596
8.18.4. Others agents .....	596
<b>8.19. Nutritional support in AIDS</b> .....	597
8.19.1. History and pathophysiology .....	597
8.19.2. Metabolic and nutritional consequences of HIV infection .....	599
8.19.3. Side effects of the drugs .....	600
8.19.4. Indications for and aims of nutritional support .....	600
8.19.5. Dietary counselling .....	602
<b>8.20. Nutritional support during pregnancy</b> .....	605
8.20.1. Pathophysiology .....	605
8.20.2. Indications for and aims of nutritional support .....	606
8.20.3. Parenteral nutrition in pregnancy .....	607
<b>8.21. Nutritional support in neonatology</b> .....	609
8.21.1. Enteral or parenteral nutrition? .....	610
8.21.2. Goals of nutritional support .....	611
8.21.3. Early nutritional management .....	611
8.21.4. Parenteral nutrition .....	612
8.21.5. Enteral nutrition .....	623
<b>8.22. Nutritional support in infants children and adolescents</b> .....	625
8.22.1. Diagnostic approach .....	625
8.22.2. Nutritional support .....	627
