

Content

Introduction	7
1 Technical drawing.....	8
1.1 The types of technical drawings.....	8
1.2 Drawing sizes and setting of drawing sheets	9
1.3 Folding of drawings	12
1.4 Drawing scales	13
1.5 Drawing of lines.....	13
1.6 Engineering lettering.....	17
1.7 Micrographic processing of technical documentation	18
1.8 Terms of using the CAD systems	19
2 Types of projection on technical drawings	22
2.1 Methods of orthogonal projection.....	22
2.1.1 Projection method 1.....	23
2.1.2 Projection method 3.....	24
2.2 The basic rules for correct projection.....	25
2.3 Views	26
2.3.1 Sectional view.....	26
2.3.2 Local view	28
2.3.3 Two or more analogous views.....	28
2.3.4 Developed view	29
2.4 Additional rules for projection of views (simplification)	30
2.5 Sectional view	35
2.6 Cross sections.....	41
3 Dimensioning of machine parts	43
3.1 General introduction.....	43
3.2 Drawing of dimensioning elements	44
3.3 Indicating the dimension figures in drawings	45
3.4 Dimensioning of geometrical and structural elements.....	46
3.4.1 Dimensioning of diameter and radius.....	47

4 Dimension tolerances.....	49
4.1 General terms concerning dimension tolerances	49
4.2 Set of tolerances and ISO fit.....	52
4.3 Indicating of limit errors and tolerances in the drawings	62
4.3.1 Indication of limit errors and tolerances of length dimensions.....	62
4.3.2 Indicating of angle limit errors.....	63
4.4 General tolerances - Unrated limit errors of the length and angle dimensions	64
5 Surface structure	66
5.1 Surface structure – basic terms.....	67
5.2 The basic characteristics of surface roughness.....	68
5.2.1 Height (amplitude) characteristics	69
5.2.2 Characteristics in the longitudinal direction of the profile.....	73
5.2.3 Shape characteristics	74
5.3 Indicating of surface roughness on the drawings	75
5.3.1 Historical development of surface structure indicating.....	75
5.4 Directions for the selection of the surface structure	80
6 Geometrical tolerance	84
6.1 Tolerance zone (tolerance space).....	86
6.2 Geometrical tolerances referred to one element – tolerance and deviation of shape.....	88
6.2.1 Straightness and planarity	88
6.2.2 Circularity and cylindricity	89
6.2.3 Explanation of basic types of geometric tolerances related to one element.....	89
6.2.4 Prescription of geometrical tolerances related to one (tolerated) element.....	91
6.3 Geometric tolerances related to two or more elements	92
6.3.1 Bases.....	92
6.3.2 Basic types of geometric tolerances related to bases	94
6.3.3 Prescription of bases.....	99
6.4 General tolerance. Not-prescribed geometric tolerances.....	101
Literature.....	102
