Preface	iii
---------	-----

Crystallography in Organic Chemistry and Biochemistry

Ab-initio methods for structure determination <i>A. Podjarny, A. Urzhumtsev, I. Usón</i>	1
Phasing at low resolution: methods and applications <i>V. Y. Lunin, A. Urzhumtsev, A. D. Podjarny</i>	4
Ab-initio phasing by dual-space direct methods <i>C. M. Weeks, G. M. Sheldrick, R. Miller, I. Usón, H. A. Hauptman</i>	37
Structure factors with rational indices: The statistics and the phase relationships <i>C. Giacovazzo, D. Siliqi, C. Fernandez-Castano, G. Comunale</i>	65
Automatic building and refinement of protein crystal structures <i>V. Lamzin, R. Morris, A. Perrakis</i>	73
Attempts to solve the structure of a small protein ab initio at 3 Å resolution <i>C. Gilmore, Wei Dong</i>	81
Sequence-dependent anisotropic elastic modelling of local DNA bending phenomena <i>K. Vlahoviček, M. Gh. Munteanu, S. Pongor</i>	93
Dynamic structuring of water in polysaccharides by neutron scattering and Rayleigh scattering of Mössbauer radiation <i>A. Deriu, G. Albanese, F. Cavatorta</i>	107
Varieties of polymorphism <i>F. H. Herbstein</i>	114

Chemical crystallography, Structure determination from powder diffraction

Inorganic crystallography <i>V. Kaučič</i>	155
Trends in structure determination by powder diffractometry <i>A. Le Bail</i>	166
Solving crystal structures from powder diffraction data in direct space <i>K. D. M. Harris, M. B. Kariuki, R. L Johnston</i>	190

Types of structural units based on anion-centred tetrahedra in crystal structures of inorganic compounds <i>S. V. Krivovichev, S. K. Filatov</i>	205
Simulation of crystal structure of complex oxides by the use of interatomic bond characteristics <i>G. A. Geguzina</i>	223
Phase stability and some physical properties of the YbCu ₅ -related intermetallics <i>K. Yoshimura, N. Tsujii, J. He, T. Kawabata, H. Michor, K. Kreiner, G. Hilscher, T. Miyano, M. Kato, K. Kosuge</i>	245
Comparison of structure of 8-mercaptoquinolates of trivalent metals belonging to eight (Co, Rh, Ir), fifth (As, Sb, Bi) and third (Ga, In, Tl) group <i>E. Silina, Y. Bankovsky, V. Belsky, L. Pech, J. Ashaks, J. Lejejs</i>	256
X-ray investigation of internal complexes of 8-mercaptoquinoline and its derivatives with transition metals <i>L. Pech, J. Bankovsky, V. Belsky, A. Kemme, E. Silina, J. Ashaks, A. Sturis</i>	260
Modular aspect in the structures of cuprates <i>V. Maltsev, L. Leonyuk, G.-J. Babonas, D. Pushcharovskii</i>	269
Growth, structure and properties of ladder-type cuprate single crystals <i>L. Shvanskaya, L. Leonyuk, G.-J. Babonas, A. Reza, R. Szymczak, V. Rybakov, V. Maltsev</i>	277
Structure analysis of intercalates <i>P. Čapková, M. Trchová, P. Matějka, L. Beneš, K. Melánová, D. Janeba, H. Schenk</i>	285

Instrumentation

Optimisation of CCD detector systems for non-routine applications in biological and chemical crystallography <i>S. K. Byram, E. R. Hovestreydt</i>	297
Multilayer optics for soft X-rays <i>H. Grimmer, M. Horisberger, U. Staub, H.-Ch. Mertins, F. Schäfers</i>	311

Theoretical crystallography

- A geometrical self-consistent system of crystallographic point group symbols
D. Weigel, R. Veysseyre, T. Phan, H. Veysseyre 319
- Is a revision of Vol. A of the international tables for crystallography desirable or necessary?
V. Kopský 334

Crystallography in physics and materials science

- The structure and dynamics of "Soft Matter"
John W. White 354
- Texture - statistical crystallography of polycrystals
H. J. Bunge 362
- In-situ phase transition characterization probed by synchrotron radiation
C. Landron 389
- Novel applications of energy-dispersive diffraction in materials and industrial science
P. Barnes, S. L. Colston, A. Jupe, S. Jacques, J. K. Cockcroft, A. Bennet, C. Hall 399
- The limitation for the phenomenological crystallographic theory of martensite transformations
Nanju Gu, Huifen Peng, Xiaoyan Song, Fuxing Yin, Yuguo Wang 410
- Stresses induced by ultrasound in SMA
T. Breczko 421
- Anomalous effects of scattering by aging crystals and solid solutions
R. I. Barabash 430
- Anisotropy of X-ray and neutron scattering by crystals with dislocation walls
R. I. Barabash, P. Klimanek 438
- X-ray study of the order-disorder transformation by the plastic deformation
S. V. Starenchenko, E. V. Kozlov, V. A. Starenchenko 449
- Structural characterization of nanostructured materials from severe plastic deformation
I. V. Alexandrov, R. Z. Valiev 456

Time-resolved SWAXS measurement of effects induced by variation of pressure <i>M. Steinhart, M. Kriechbaum, M. Horký, J. Baldrian, H. Amenitsch, P. Laggner, S. Bernstorff</i>	463
Subject index	473
Author index	483
Appendix (colour figures)	487
