Foreword . . . . .	6
Notation . . . . .	7
0. Preliminaries . . . . .	11
1. The Gaussian Plane . . . . .	21
2. Functions of a Complex Variable . . . . .	28
3. Curves . . . . .	50
4. Eilenberg's Theorem and its Consequences . . . . .	64
5. Curvilinear Integrals and Primitives . . . . .	81
Appendix to Chapter 5 . . . . .	96
6. Cauchy's Theorem and its Direct Consequences . . . . .	102
Appendix to Chapter 6 . . . . .	120
7. Laurent Expansions and the Residue Theorem . . . . .	132
8. Meromorphic Functions . . . . .	156
9. Conformal Mappings . . . . .	176
10. Extensions of Meromorphic Functions . . . . .	197
Appendix to Chapter 10 . . . . .	245
11. Cauchy-Goursat's Theorem . . . . .	249
12. Notes on Conformal Mappings of Arbitrary Regions . . . . .	263
13. Analytic Functions . . . . .	278
Part A. The Notion of Analytic Function . . . . .	280
Part B. Operations with Analytic Functions . . . . .	295
14. Applications to the Theory of Plane Vector Fields . . . . .	322
Bibliography and References . . . . .	370
Index . . . . .	373
