

## Contents

Preface . . . . .	9
Introduction . . . . .	11
Some pharmacological properties of <i>Shigella shigae</i> toxin . . . . .	13
Toxicity changes of <i>Shigella shigae</i> toxin in ontogenesis . . . . .	16
Action of <i>Shigella shigae</i> toxin on the nervous system . . . . .	19
Effect of <i>Shigella shigae</i> toxin on interoceptor activity . . . . .	19
Effect of <i>Shigella shigae</i> toxin after intracerebral injection in unanaesthetized cats . . . . .	24
Effect of <i>Shigella shigae</i> toxin on conductivity of the sciatic nerve . . . . .	27
Effect of <i>Shigella shigae</i> toxin on the autonomic nervous system . . . . .	29
Changes in the level of labile phosphorus in rabbits intoxicated with <i>Shigella shigae</i> toxin . . . . .	31
Effect of <i>Shigella shigae</i> toxin on oxidative phosphorylation . . . . .	33
Effect of <i>Shigella shigae</i> toxin on ATPase activity . . . . .	35
Effect of <i>Shigella shigae</i> toxin on the mammalian heart . . . . .	37
Some pharmacological properties of <i>Salmonella typhi</i> endotoxin . . . . .	42
Effect of S-typhi endotoxin on various interoceptive zones . . . . .	46
Influence of S. typhi endotoxin on conditioned reflexes . . . . .	52
Effect of S. typhi endotoxin on synapses of autonomic nerves . . . . .	54
Antibody formation and humorally isolated areas . . . . .	56
Some pharmacological properties of Streptolysin O . . . . .	60
Effect of Streptolysin O on rabbits with special reference to haemolytic action in vivo . . . . .	62
Effect of Streptolysin O on the isolated mammalian heart . . . . .	71
Effect of Streptolysin O on cutaneous and muscular blood vessels . . . . .	73
Effect of Streptolysin O on some isolated organs . . . . .	75
Effect of Streptolysin O on the activity of the adrenals . . . . .	78
Effect of Streptolysin O on interoceptors . . . . .	78
Influence of Streptolysin O on conditioned reflexes in rats . . . . .	79
Effect of intraventricular injections of Streptolysin O in unanaesthetized cats . . . . .	82
The forming of a myoactive substance after intraventricular injection of Streptolysin O . . . . .	85
Effect of Streptolysin O on nerve-muscle preparations in situ . . . . .	87
Nonspecific adaptation to some actions of studied bacterial toxins . . . . .	91
Nonspecific adaptation to the effect of S. typhi endotoxin and Streptolysin O on conditioned reflexes . . . . .	91
Adaptation to impairment of nerve conductivity produced by bacterial toxins . . . . .	93
Toxins and adenosintriphosphoric acid . . . . .	100
References . . . . .	117
Index of authors . . . . .	123
Index of subjects . . . . .	127
