

## CONTENTS

PART I. - SHELL STRUCTURES		1
S. Al Athel M.S. El Naschie	Localized buckling of elastic shells in the light of modern nonlinear dynamics	3
K. Brandes	Contact force distribution between thin-walled tubes and saddle supports	11
H.D. Bui S. Taheri	Splitting of three-dimensional solution into local and global effects	20
V. Křupka	Plastic squeeze of circular shell due to saddle or lug	28
A. Muc	On the contact of cylindrical shells with an elastic or rigid foundation	34
Lars Å. Samuelson	Effect of local loads on the stability of shells subjected to uniform pressure distribution	42
J.G. Teng J.M. Rotter	A study of buckling in column-supported cylinders	52
A.S. Tooth F.A. Motashar	The support of cylindrical vessels on rigid and flexible saddles - an improved analysis	62
P. Vokroj	Expert like system for cylindrical shell support	70
DISCUSSIONS		75
M.T. Alimzhanov	Load carrying capacity of shells with regard to cumulation of damages	77
A. Muc	Effects of fibre orientations on failure modes of composite shells subjected to unilateral constraints	83
B.L. Pelekh N.N. Shcherbina D.D. Matieshyn	Contact problem in the theory of anisotropic cylindrical shells	91

J.M. Aribert A. Lachal M. Moheissen	Modelling and experimental investigation of plastic resistance and local buckling of H or I steel sections submitted to concentrated or partially distributed loading	101
M. Drdäcký	Non-stiffened steel webs with flanges under patch loading	111
Bo Edlund R. Luo	Buckling analysis of trapezoidally corrugated web under patch loading using spline finite strip method	119
M. Elgaaly	Behavior of webs under eccentric compressive edge loads	128
T. Höglund	Local buckling of steel bridge girder webs during launching	135
A. Kolesov B. Lampsi V. Gusev	Elastic and plastic states of metallic structures under bending with allowance for local stresses	140
I. Kutmanová M. Škaloud K. Januš O. Löwitová	Ultimate load behaviour of longitudinally stiffened steel webs subject to partial edge loading	148
I. Kutmanová M. Škaloud K. Januš	"Breathing" of longitudinally stiffened steel webs subject to repeated partial edge loading	158
C.M. Menken G.M. van Erp	Buckling of thin-walled beams under concentrated transverse loading	165
J. Raoul I. Schaller J.-N. Theillout	Tests of buckling of panels subjected to in-plane patch loading	173
S. Shimizu S. Horii S. Yoshida	Behaviour of stiffened web plates subjected to the patch load	184
I. Spinassas J. Raoul M. Virlogeux	Parametric study on plate girders subjected to patch loading	192
R. Maquoi J.P. Jaspert	Load-introduction resistance of column webs in strong axis beam-to-column joints	204

J. Studnička	Behaviour of thin-walled cold-formed wide profiles under concentrated loading	212
A. Venkatesh J. Jirousek	A finite element formulation for the analysis of local effects	218
DISCUSSIONS		229
M. Drdácký	Early prague tests on welded plate girder webs under partial edge loadings	231
M. Drdácký	Comments on constructions of empirical formulas	235
S. Krenk L. Damkilde	Models of thin-walled beam connections	240
PART III. - POSTERS		253
R. Bogacz Sz. Imielowski	On stability of crushed columns under non-conservative contact loading	255
P. Brož	Interaction of structures	262
V.Z. Gristchak A.N. Pisanko	The influence of edge effects on the stress concentration around a hole in a thin spherical shell	267
M. Hýča	Local effects in thin-walled beams subject to bending and shear	271
E. Inan	The nonlocal theory of thermoelastic plates and surface problems	277
I. Ivanova	Cylindrical shells under dynamic axial impact	281
V. Kartopolvev	Stability of double-steel beams elements beyond the elasticity limit	285
G. Mateescu V. Gioncu	Local buckling effects on the supports of continuous trapezoidal profiled steel sheets	288
J. Náprstek O. Fischer	Nonstationary vibrations of rectangular plate excited by concentrated force with linearly variable frequency	292

B.L. Pelekh M.V. Marchuk	Generalized nonlinear theory of shells and plates applicable for contact loads problems	296
J. Szlendak	Influence of the weld size on the strength of rectangular hollow section joints	300
D.D. Zakharov I.V. Simonov	Vibrations of composite plate containing circle delamination on boundary of layers	304
