<i>Tichý M., Jansa P., Hubáček J.:</i> Hojení CO ₂ laserové rány v experimentu	7
<i>Stodůlka J.:</i> Test »otevřeného pole«: aplikace v současném výzkumu	73
<i>Kopecký J., Richter V.:</i> Kongenitální obstrukce duodena	97

CONTENTS

<i>Tichý M., Jansa P., Hubáček J.:</i> Healing of a Carbon dioxide Laser Wound in the Experiment	7
<i>Stodůlka J.:</i> The Open Field Test: A Recent Research	73
<i>Kopecký J., Richter V.:</i> Congenital Obstruction of the Duodenum	97

CONTENT

A. Introduction	7
B. Problems	19
C. Material and methods	20
D. Results	22
I. Histology of a fresh laser wound	22
II. Histology of laser wound healing on the 1st day after intervention	26
III. Histology of laser wound healing, 2nd day after intervention	31
IV. Histology of laser wound healing, 3rd day after intervention	36
V. Histology of laser wound healing, 7th day after intervention	42
VI. Histology of laser wound healing, 14th day after intervention	47
VII. Histology of laser wound healing, 28th day after intervention	52
VIII. Histology of laser wound healing, 3 months after intervention	55
IX. Histology of laser wound healing, 6 months after intervention	60
E. Discussion	63
F. Summary	67
G. References	69

TABLE OF CONTENTS

1. Introduction	97
2. History	99
3. Czechoslovak literature on problems of congenital duodenal obstruction	102
4. Classification of congenital duodenal obstruction	103
5. Incidence of congenital duodenal obstruction	105
6. Embryology and pathogenesis	107
6.1 Embryology and pathogenesis of internal duodenal obstruction	107
6.2 Embryology and pathogenesis of external duodenal obstruction	112
6.3 Embryology and pathogenesis of combined forms of duodenal obstruction	121
6.4 Megaduodenum	130
7. Heredity and congenital duodenal obstruction	131
8. Complications in the course of pregnancy	132
9. Immaturity of newborns with duodenal obstruction	132
10. Sex and time of diagnosis in congenital duodenal obstruction	133
11. Prenatal diagnosis of congenital duodenal obstruction	133
12. Clinical picture of congenital duodenal obstruction	135
12.1 Newborns with internal obstruction of the duodenum	135
12.2 Newborns with external obstruction of the duodenum	136
12.3 Diagnosis and differential diagnosis of congenital duodenal obstruction.	136
13. Associated anomalies	139
14. Therapy of congenital duodenal obstruction	140
14.1 Operations used for internal duodenal obstruction	140
14.2 Operations used for external duodenal obstruction	150
14.3 Operations used for combined forms of duodenal obstruction	155
14.4 Operations used for the megaduodenum	155
15. Early postoperative complications	156
16. Mortality	156
17. Prognosis of infants treated for congenital duodenal obstruction	157
18. Clinical series of patients.	158
18.1 Symptoms of congenital duodenal obstruction	159
18.2 Mother's age	160
18.3 Characteristics of pregnancy and delivery.	160
18.3.1 Order of deliveries.	160
18.3.2 Birth weight	161
18.3.3 Apgar score	161
18.3.4 Period of admission	161
18.3.5 Sex predisposition	162
18.3.6 Complications in the course of pregnancy.	162
18.4 Division of newborns into groups and diagnoses	163
18.5 Time interval between diagnosis and operation	166
18.6 Surgical management	166
18.7 Postoperative care and time of hospitalization	170
18.8 Immediate postoperative results and complications	171
18.9 Early and late reoperations	171
18.10 Mortality.	172
18.11 Long-term results	176
18.12 Prognosis of patients operated on for congenital duodenal obstruction	178
19. General conclusions	179
