

CONTENTS

Contents	3
Preface	5
Notations	7
Introduction	9
1. Motivation	9
2. Classical perfect codes	13
3. Perfect codes in distance regular graphs	15
Perfect codes in general graphs	20
4. Packings, dominating sets and perfect codes	21
5. Perfect codes in a random graph	28
6. Perfect codes and Seidel's switching	34
7. Computational complexity of codes in graphs	46
7.1 Perfect code completion	49
7.2 Perfect codes in regular graphs	54
7.3 Defect of a tree	69
8. Partitioning graphs into perfect codes	71
Perfect codes in cartesian powers of graphs	77
9. Some nonexistence results	79
10. Second powers of self-complementary graphs	87
11. Perfect codes in the second power of a random graph	89
12. Perfect codes in the second powers of trees	92
Final remarks and open problems	114
References	123
Резюме	126
