

## C O N T E N T S

1. Introduction . . . . .	5
2. Previous work . . . . .	7
3. Geological environment . . . . .	7
4. Methodology . . . . .	10
5. Description of the manganese minerals . . . . .	13
a) Manganite . . . . .	14
b) Hydrohausmannite . . . . .	14
c) Pyrolusite . . . . .	15
d) Ramsdellite . . . . .	15
e) Cryptomelane . . . . .	16
f) Psilomelane-type . . . . .	16
g) Lithiophorite . . . . .	17
h) Braunita . . . . .	17
i) Vredenburgite . . . . .	18
j) Woodruffite . . . . .	18
6. X-ray study . . . . .	19
7. Microhardness . . . . .	31
8. Thermal study . . . . .	37
a) Differential thermal analysis . . . . .	37
b) Gravimetric thermal analysis . . . . .	50
9. Mineral chemistry . . . . .	57
10. Nomenclature of the manganese oxide and hydrous oxide minerals studied . . . . .	67
11. Mineralogical assemblage, textures and paragenesis . . . . .	72
12. Origin . . . . .	75
13. Conclusions . . . . .	79
14. Acknowledgements . . . . .	81
15. References . . . . .	83
