

# CONTENTS

<b>Introduction</b>	<b>1</b>
<b>Marie Budíková</b> <i>Confidence Intervals for the Kernel Estimator of the Regression Function in the Stochastic Design Model</i>	<b>3</b>
<b>Ivana Horová, Marie Budíková</b> <i>Multivariate Kernel Estimators</i>	<b>7</b>
<b>Ivana Horová</b> <i>Boundary Kernels</i>	<b>17</b>
<b>Jiří Kobza, Radek Kučera</b> <i>Spline Toolbox in MATLAB</i>	<b>25</b>
<b>Jiří Kobza</b> <i>Quadratic and Quartic Splines in MATLAB</i>	<b>47</b>
<b>Lubomír Kubáček</b> <i>Some Statistical Properties of MINQUE</i>	<b>67</b>
<b>Ludmila Kubáčková</b> <i>Efficient Transformation of Data Influenced by Systematic Effects</i>	<b>79</b>
<b>Pavla Kunderová</b> <i>Multivariate Linear Model with Nuisance Parameters</i>	<b>95</b>
<b>Jaroslav Michálek</b> <i>Application of Kernel Smoothing to Additive Models</i>	<b>103</b>
<b>Jaroslav Michálek</b> <i>Kernel Smoothing with Variable Bandwidth</i>	<b>113</b>

<b>Luboš Bauer, Miloslav Mikulík</b>	
<i>The Least Squares Problem with Linear Equality Constraints</i>	129
<b>Miloslav Mikulík</b>	
<i>The Algorithm for Cubic Spline of the Prescribed Shape for the Given Data</i>	133
<b>Miloslav Mikulík</b>	
<i>Shape Preserving <math>C^1</math> Cubic Splines</i>	139
<b>Ladislav Skula</b>	
<i>Application of Generalized Inverses in Linear Models</i>	143
<b>Ladislav Skula</b>	
<i>Involutions of Matrices and Generalized Least Squares Solution</i>	147
<b>Jan Štecha, Vladimír Havlena</b>	
<i>Smoothing in Simultaneous State and Parameter Estimation in a Linear System</i>	153
<b>Osvald Vašíček</b>	
<i>Bayesian Identification of Macroeconomic Model</i>	169
<b>Petr Veselý</b>	
<i>Structure and Reliability of Binary Systems</i>	187
<b>Vítězslav Veselý</b>	
<i>Kernel Smoothing as a Regularization of a Singular Distribution</i>	193
<b>Jiří Zelinka</b>	
<i>Boundary Kernels – Usage and Results</i>	201
<b>Jiří Zelinka</b>	
<i>Multivariate Density Estimation</i>	205
