

C O N T E N T S

	page
Invited lectures	4
Oral contributions	8
Posters	24

Notes:

1. Contributions related to the main topics of the Conference are divided into three sections:
A Crystal and molecular structures
B Diffraction analysis of physical phenomena
C Powder diffraction and real structure
2. Posters with miscellaneous topics are distributed among the sessions PA, PB and PC
3. Abstracts of the papers have been prepared by photo-reproduction of texts submitted by the respective authors. The names of all authors (not only the first author's names) are given in the Author Index in the Programme.

Are you tired by conference programme?
What about playing with us?
