

CONTENTS

Foreword	7
<i>John Stobo Prichard</i> : Opening speech	8
I. HYPOTONIA IN EARLY CHILDHOOD	
<i>Dubowitz V.</i> : Hypotonia in Infancy	13
<i>Lesný I., Pazourková E., Prošková M., Tokalaki L.</i> : A Follow up Study of Infantile Hypotonia of Central Origin	19
<i>Vlach V., Zezuláková J., Číperová V., Dolanský J.</i> : Evolutive Changes of Muscle Extensibility in Children	23
<i>Pfeiffer J.</i> : Hypotonic Syndrome in Cerebral Palsy	29
<i>Lehovský M.</i> : Electromyography in Hypotonic and Spastic Children	32
<i>Jirásek A., Kocura P.</i> : Muscle Biopsy in Hypotonic Children	35
<i>Ryniewicz B.</i> : Some Electrophysiological and Immunological Problems in Werdnig-Hoffmann Disease	37
<i>Neušímalová S., Dittrich J., Bráza J.</i> : The Uses of Dermatoglyphic Investigation of Hypotonic Syndrome in Early Childhood	39
<i>Siemes H., Siegert M., Rating D., Hanefeld F.</i> : Protein Patterns of the CSF in Children with Cerebral Palsy	40
<i>Fišarová M.</i> : Hypotonic Children with Low Birth Weight	43
<i>Holub V., Žáková E., Zemanová H.</i> : Hypotony in Children with Infantile Spasms	45
<i>Vesper J., Engel E., Bilz D.</i> : Periodic Paralysis and Secondary Hypoaldosteronism in Childhood	47
<i>Havlová M., Otradovec J., Dittrich J.</i> : Hypotonic Syndrome Accompanied by Paroxysmal Paralyses and Skew Deviation	54
<i>Pěťová J., Červenka J., Kapras J., Kovařík J.</i> : Hormonal Disorders in Women and their Possible Influence Upon the Child's Development	56
<i>Bjegovic L.</i> : Acute Cerebellar Ataxia of Childhood	58
<i>Hoffmann W.</i> : A Modern Method of the Spectral Analysis of the Electromyogram in the Spinal Progressive Muscular Atrophy	61
II. RAISED INTRACRANIAL PRESSURE OF NON TUMOUROUS ORIGIN	
<i>Hemmer R.</i> : Hirndrucksteigerung nichttumörösen Ursprungs im Säuglingsalter	69
<i>Brachfeld K.</i> : The Dynamics of the Increased Intracranial Pressure and its Clinical Correlations	80
<i>Bejšovec M., Malý Z., Gajdošová A.</i> : Subdural Hematoma in Infants	82
<i>Bilz D., Vesper J.</i> : Hydrocephalometry and Neurological Examinations in the Neonates which Developed Subdural Effusions later on	84
<i>Zemánková M., Vengřínová J.</i> : A Follow up Study of Children with Subdural Hematoma in the Early Childhood	87
<i>Lebeda D.</i> : Subdural Hygroma and its Composition	90

<i>Majewska Z., Szelożyńska:</i> Epileptic Fits in Children with Hydrocephalus	92
<i>Krauze M., Waclawczyk H., Marek J., Marszał E., Siemianowicz, Nowotny J., Kólt-Pilat B., Ramos A.:</i> Initial Symptoms and Operation Medical Treatment of Hydrocephalus of Own Patients	94
<i>Daute K. H., Hässler A., Klust E., Müller G.:</i> Problems and Experiences with the Operative Treatment of Active Hydrocephalus in Children	97
<i>Slowik F., Balint K.:</i> Clinicopathological Aspects in the Treatment of Infantile Hypertensiv Hydrocephalus	101
<i>Göllnitz G., Kleinpeter U.:</i> Pseudotumor cerebri — Eine gefährliche Diagnose	105
<i>Šlovítek Zd., Šíp M., Cihlár V.:</i> Notes to Diagnosis and Treatment of Cerebral Intracranial Hypertension in Children	111
<i>Jankowicz E., Czervińska-Giechan, Śliżewska I., Tomczyk H., Winogrodzka W.:</i> Analysis of Cases with Non Tumourous Intracranial Hypertension	114
<i>Bárdošová G., Prékop R., Pilarová L.:</i> Longterm Continuous Follow up of Babies with Transitory Intracranial Hypertension in the Newborn Period	117
<i>Szénási J., Hollósy A.:</i> Clinical and Catamnestic Data of Intracranial Hypertension of Uncertain Origin in Childhood	121
<i>Szelożyńska K.:</i> Raised Intracranial Pressure Syndrome of Non Tumourous Origin in Children Aged up to 3 years.	123
<i>Veress E., Neuwirth M., Mályus A.:</i> Akute Hirndrucksteigerung bei abakteriellen Meningo-enzephalitiden	125
<i>Dittrich J.:</i> Premature Suture Synostosis — an Aetiological Factor of Chronic Intracranial Hypertension	130
<i>Heuser M., Heuser H.:</i> Pseudotumor Cerebri — Following Insecticide (Lindane) Intoxication	133
<i>Krátkík M., Cesnak D., Pavkovečková O., Veréb J.:</i> Intracranial Hypertension — Early Symptom of Childhood Meningeal Leukemia	136
<i>Krátkík M., Beňo P., Tischler V.:</i> The Idiopathic Hypoparathyroidism as the Cause of the Intracranial Hypertension in Infant	139
<i>Paraicz E.:</i> Continuous Recording of the Intracranial Pressure in Non Tumourous Infantile Hypertension	141
<i>James H. E., Bruno L., Schut L., Langfitt T. W.:</i> Intracranial Pressure Monitoring with a Subarachnoid Bolt in Children	144
<i>Vajda J., Paraicz E.:</i> The Importance of the ICP Recording in the Clinical Practice	146
