

# Contents

<b>Foreword</b>	i
<b>Chapter 1</b>	iii
<b>Phytoremediation and phytotechnologies: basic data</b> Nelson Marmiroli, Elena Maestri and Michel Tissut	1
<b>Chapter 2</b>	iv
<b>Uptake, metabolism, and persistence of xenobiotics in different plant systems</b> Hans Harms, Maria Bokern, Marit Kolb and Claudia Bock	11
<b>Laboratory studies of the different steps in a phytoremediation process for pesticides</b> A. Aajoud, P. Ravanel, M. Raveton, S. Krivobok and M. Tissut	12
<b>Expression and distribution of the phytoremediation potential in cultivated plants, corn and sunflower</b> P. Ravanel, D. Felix, M. Raveton and M. Tissut	13
<b>Phytodegradation of some PAH compounds of creosote</b> Yaodong Wang and Maria Greger	14
<b>Phytoremediation test in PAH contaminated soil by <i>Medicago sativa</i></b> Eliana Tassi, Meri Barbaferi, Stefano Cervelli and Gianniantonio Petruzzelli	15
<b>Towards PAHs degradation in contaminated soils by means of transgenic plants over expressing fungal laccases in root exudates</b> Edgaro Filippone, Silvana Esposito and Carolina Galante	16
<b>Phytotreatment of sulphonated anthraquinones in textile wastewater: Preliminary greenhouse study</b> Sylvie Aubert and Jean-Paul Schwitzguébel	17
<b>Greenhouse studies to investigate possible threats by organic waste product disposal on agricultural fields</b> Frank Laturnus	18
<b>Water plants – a model for study of phytoremediation of TNT</b> Ales Nepovim, Anja Hebner, André Gerth and Tomas Vaněk	19
<b><i>In vitro</i> phytoextraction of pentachlorophenol</b> Stanislav Smrcek, Lenka Dufkova and Sarka Krenkova	20
<b>Testing the interactive potential of plants and rhizospheric bacteria for the phytoremediation of lindane (<math>\gamma</math>-HCH)</b> Sylvie Marcacci and Jean-Paul Schwitzguébel	21
<b>Increase in herbicide metabolism in P450 overexpressing plants</b> Laurence Gondet, Luc Didierjean, Hubert Schaller and Danièle Werck-Reichhart	22
<b>Towards the functional characterization of rice GSTs</b> C. Frova, G. De Toma, L. Mizzi and M. Sari Gorla	23
<b>Organization and structural evolution of the glutathione s-transferase gene family</b> N. Soranzo, C. Frova, L. Mizzi and M. Sari Gorla	24
<b>Gsts characterization in <i>Brassica juncea</i></b> D. Santelia, L. Mizzi and M.E. Pè	25

<b>Isolation and characterisation of TNT reduction enzyme from <i>Saponaria officinalis</i> suspension culture</b>	
Aleš Nepovím, Radka Podlipná, Tomáš Vaněk	26
<b>Plant cell cultures as a biological model for heavy metal phytosensitivity</b>	
Emília Lima-Costa	27
<b>Tolerance of <i>Linum usitatissimum</i> L. to Cd and Pb stress <i>in vitro</i></b>	
Eva Tejklova and Miroslav Griga	28
<b>Screening of plant species for phytoremediation purposes</b>	
Alexander Lux, Elena Masarovičová, Desana Lišková, Katarína Kráľová, Peter Capek, Daniela Kákoniová, Lucia Lunáčková, Anna Šottníková, Erika Nehnevajová, Ivan Zelko, Kristian Czubula, Mária Marčeková, Vladimír Streško and Ladislav Varga	29
<b>Advanced physical techniques for studying metal distribution in plant tissues</b>	
Marta Marmioli, Nelson Marmioli, Elena Maestri	30
<b>Hydroponics rapid screening technique to assess the potential of willow for phytoremediation of heavy metal contaminated soil</b>	
Ian Pulford, Conor Watson and Drusilla Riddell-Black	31
<b>Laboratory methodology to evaluate phytoremediation of toxic elements</b>	
Luis Hernández, Elvira Esteban, Pilar Zornoza, Saúl Vázquez and Ramón Carpena	32
<b>Study of mercury mobilisation and uptake by crops in laboratory and greenhouse conditions</b>	
Rocio Millán, Ricardo Vera, Thomas Schmid, Fernando Recreo, Ramón Carpena	33
<b>Use of iodide to enhance phytoextraction of mercury</b>	
Yaodong Wang and Maria Greger	34
<b>Changes in the rhizosphere of <i>Salix viminalis</i> and <i>Thlaspi caerulescens</i> evidenced by chemical extractants</b>	
Daniel Hammer and Catherine Keller	35
<b>Phytoextraction of Pb and As by <i>Lupinus albus</i> and <i>Brassica juncea</i> in microcosm tests</b>	
Eliana Tassi, Meri Barbafieri, Laura Rizzi and Giannantonio Petruzzelli	36
<b>Metal phytoextraction on carbonate rich soils: a greenhouse study</b>	
Krasimira Sapundjieva, Jordanka Kouzmanova, Andon Vassilev, Yordanka Kartalska and Stefan Krastev	37
<b>Desert plants tolerance and hyper accumulation of heavy metals</b>	
Avi Golan-Goldhirsh	38
<b>Utilization of rhizobacteria <i>Pseudomonas fluorescens</i> in phytoremediation strategies</b>	
Stefan Shilev, Manuel Benlloch and Enrique Sancho	39
<b>Hyperaccumulation versus Phytoremediation: studying plants for improving their exploitation</b>	
Cristina Gonnelli, Francesca Galardi, Alessio Mengoni, Elena Chianni, Rita Barzanti, Marco Bazzicalupo and Roberto Gabbriellini	40
<b>Phytofiltration of stormwater for removal of zinc</b>	
Johanna Nyquist, Åsa Fritioff and Maria Greger	41
<b>Heavy metal removal of a two-stage constructed wetland for surface water treatment</b>	
Raimund Haberl, Günter Langergraber, Johannes Laber and Reinhard Perfler	42

<b>Accumulation of 137-caesium by different plant species</b> Petr Soudek, Richard Tykva and Tomáš Vaněk	43
<b>Growth-chamber experiments on soils from four sites contaminated with different mixtures of metals</b> Lizzi Andersen, Nikolaj Lehmann, Peter Holm, Uffe Jørgensen and Jørgen Vestergaard Hansen	44
<b>Chapter 3</b>	v
<b>Phytostabilisation of mine tailings under wetland conditions</b> Donna L. Jacob, David Matthews, Olive McCabe and Marinus L. Otte	45
<b>Wetlands for removal of sulphate and metals from mine tailings water</b> Aisling D. O'Sullivan, Ciara Finnegan, Eric Brady, Declan Murray and Marinus L. Otte	46
<b>Wetland plants used for phytostabilization of metal rich mine tailings</b> Eva Stoltz and Maria Greger	47
<b>Constructed wetland treatment of dairy wastes</b> Nelson Marmioli, Marta Marmioli, Elena Maestri, Paolo Mantovi and Sergio Piccinini	48
<b>A subsurface vertical flow constructed wetland for 230 p.e.</b> Reinhard Perfler, Raimund Haberl, Johannes Laber and Günter Langergraber	49
<b>Secondary treatment of wastewater from a single farmhouse with a subsurface vertical flow constructed wetland</b> Raimund Haberl, Reinhard Perfler, Johannes Laber and Günter Langergraber	50
<b>Advanced nitrogen removal with subsurface vertical flow constructed wetlands</b> Johannes Laber, Raimund Haberl, Reinhard Perfler and Günter Langergraber	51
<b>Tertiary treatment of an activated sludge plant effluent with subsurface vertical flow constructed wetlands</b> Johannes Laber, Raimund Haberl, Reinhard Perfler and Günter Langergraber	52
<b>Secondary treatment of hospital wastewater with a 2-stage constructed wetland systém</b> Johannes Laber, Raimund Haberl and Günter Langergraber	53
<b>Phytoremediation with wetland plants growing without soil</b> Friedrich Wissing	54
<b>Constructed wetlands used for removal of heavy metals from polluted water</b> Wolfgang Grosse and Shuiping Cheng	55
<b>Treatment of TNT-contaminated water in a constructed wetland</b> André Gerth and Hartmut Thomas	56
<b>Field trials to assess yield and heavy metal uptake by willow</b> Ian Pulford, Conor Watson, Stephen Rees and Drusilla Riddell-Black	57
<b>Phytoextraction of metals by Salix — a field study</b> Maria Greger and Tommy Landberg	58
<b>Field-scale bioremediation of a soil contaminated with heavy metals by the toxic mine spill at Aznalcóllar (Spain)</b> M.P. Bernal, R. Clemente, D.J. Walker and A. Roig	59

<b>Effect of <i>Lupinus albus</i> L. on toxic element availability in soils affected by the Aznalcollar mine spillage</b> E. Esteban, J. Peñalosa, S. Vázquez and R.O. Carpena	60
<b>Mercury uptake by flora in an experimental plot from Almadén</b> Rocio Millán, Thomas Schmid, Ricardo Vera and Roberto Gamarra	61
<b>Lead and copper extraction potential of pseudo-metallophytes in the Mediterranean area</b> Juan Barceló, Charlotte Poschenrieder, Mercè Llugany, Jaume Bech, Alessandra Lombini	62
<b>Increased zinc-extraction potential of maize grown in acidic soil under field condition</b> Satish Gupta, Kathrin Wenger and Rainer Schulin	63
<b>Genetic differences of flax and linseed varieties in phytoextraction of Cd from contaminated soil: field-simulated study</b> Marie Bjelkova and Miroslav Griga	64
<b>Phytoremediation of heavy metal from contaminated soil</b> Petr Soudek, Ivana Špirochová-Kališová and Tomáš Vaněk	65
<b>Radiophytoremediation of uranium decay range contaminated soil</b> Petr Soudek, Richard Tykva, Petr Petřík, Martin Vágner, Eva Podracká, Avi Golan – Goldhirsh and Tomáš Vaněk	66
<b>Phytostabilization of metal rich dredged sediments</b> Valérie Bert, Bertrand Girondelot, Fabienne Marseille and Agnès Laboudigue	67
<b>Restoration of a metal polluted dredged sediment deposit</b> Bertrand Girondelot, Valérie Bert, Fabienne Marseille and Agnès Laboudigue	68
<b>Revaluation of contaminated sediments with Short Rotation Forestry systems</b> P. Vervaeke, J. Mertens, E. Meers, F.M.G. Tack and N. Lust	69
<b>Urban areas decontamination by <i>Canna x generalis</i></b> Aleksandra Trąpczyńska and Stanisław Gawroński	70
<b>Phytostabilisation of the Jales soil after <i>in situ</i> treatments</b> Michel Mench, Jaco Vangronsveld, and Jacques Guinberteau	71
<b>Plant and <i>Rhizobium</i> responses to natural remediation in sludged-plots contaminated by trace elements</b> Michel Mench, Nicolas Recalde, Paul Solda and Jaco Vangronsveld	72
<b>Phytoextraction efficiency of in vitro-bred tobacco variants using a non-GMO-approach</b> Rolf Herzig, Michele Guadagnini, Albert Rehnert and Karl-Hans Erismann	73
<b>Metal uptake of oil crops prior to mutation breeding</b> Rolf Herzig, Erika Nehnevajova, Guido Federer and J-P. Schwitzguébel	74
<b>Phytoremediation and land management of radionuclide contaminated soil</b> Tomas Vaněk, Petr Soudek, Martin Vagner, Marie Bjelkova, Miroslav Griga and Richard Tykva	75
<b>Selection of woody species with enhanced uptake capacity: the case study of Niedzwiady resort pollution by pesticides stored in bunkers</b> Stefano Predieri, Edoardo Gatti, Jaroslav Figaj and Leslaw Rachwal	76

**Phytoremediation programme for petroleum hydrocarbons degradation and removal  
in the frame of the remedial work carried out after the Trecate oil well blow out**

Augusto Porta, Klaus Mueller, Nadia Plata and Giorgio Andreotti

77

**Chapter 4**

vi

**Outlook and expected developments**

Jean-Paul Schwitzguébel and Augusto Porta

79

**Author Index**

vii

**Plant and Microbial Species Index**
