CONTENT

Vořišek K.:
Introduction. 7

Babulicová M.:
Influence of the fertilization on the winter wheat in the crop rotation and in the long-term monoculture (abstract). 9

Bosak V., Smeyanovich A.:
Humus content dynamics depending on fertilizer application and crop rotation on podzoluvisol soils. 11

Cerhanová D., Friedlová M., Klement V., Kubát J.:
Evaluation of the effect of organic matter balance on the organic C contents in the topsoil. 14

Ciećko Z., Żołnowski A.C., Najmowicz T., LisowskiJ.:
Residual effect of coal fly ash on soil total nitrogen and organic carbon concentrations. 20

Cwalina-Ambroziak B., Bowszys T.:
Changes in fungal communities in organically fertilized soil (abstract). 30

Czakó A., Mikanová O., Kubát J.:
The effects of various fertilizers on soil enzyme activities. 31

Černý J., Balík J., Kulhánek M., Nedvěd V.:
The changes in microbial biomass C and N in a long-term field experiments (abstract). 36

Dostál J., Cerhanová D., Martincová J., Hajzlerová L., Kratochvíl J., Kubát J.:
Long–term evaluation of the organic matter balance and its relations to the organic C content in the topsoils in Ústí nad Orlicí district (abstract). 37

Dudeja S.S., Gupta S.C., Majumdar V.L., Chaudhary P. :
Competitiveness of molecularly predominant and host specific chickpea rhizobia under field conditions. 38

Filep T., Kincses I., Rékási M., Kovács A.B.:
Water extractable organic matter concentrations on two different soils as affected by biofertilization. 53

Friedlová M., Klement V., Kubát J.:
Organic matter content in the topsoil in selected variants of the stationary field experiments conducted in different soil and climate conditions. 62

Gans W., Herbst F., Merbach W., Deubel A., Schuster C., Gutser R.:
Effect of an urease inhibitor on the fate of urea-N under field conditions. 68

Halas J., Torma S. :
Spatial variability of soil organic carbon and soil moisture content within selected fields of arable land. 75

Krejčová J.:
Comparison of available N values in soil determined by different methods: laboratory experiments. 80

Krejčová J.:
Available carbon and nitrogen amounts in soil after humate and oxyhumolite applications. 84

Kunzová E., Klír J.:
The nutrient balance in the long-term field experiment in Prague – Ruzyne. 89

Kunzová E.:
Evaluation of the nitrogen balance in the long-term field experiment in Prague – Ruzyne. 93

Kurowski T.P., Sądej W.:
Effect of fertilization systems on crop pathogens. 97

Lapa V.:
SOM and productivity of agricultural crops. 101

Merbach W., Deubel A.:
Long-term field experiments – museum relics or scientific challenge? (abstract). 104

Mikhailouskaya N., Mikanova O.:
SOM content and ligninolytic activity in luvisol loamy sand soil under long-term fertilization. 105

Mühlbachová G.:
Microbial activities and heavy metal availability following the treatment of long-heavy metal contaminated soils with humates and lucerne. 110

Mühlbachová G., Šimon T.:
The response of microbial activities on organic and inorganic treatments in a long-term heavy metal contaminated soil. 120

Nerušil P., Čižmár D., Kohoutek A., Kubát J., Nováková J.:
The utilization of NIR spectroscopy for determination of the soil organic matter content in arable soils. 128

Ondrasek L., Cunderlik J.:
Effects of organic and mineral fertilisers on biological properties of soil under seminatural grassland (abstract). 136

Popelářová E., Voříšek K., Strnadová S.:
Relations between activities and counts of soil microorganisms (abstract). 138

Rychcik B., Lachacz A., Sadowski T.:
Quality of soil organic matter under conventional and ecological farming systems (abstract). 139

Sądej W., Rozmyslowicz R., Sądej W.:
Soil concentration of C and N shaped by unidirectional long-term fertilization versus noxious soil macrofauna (abstract). 140

Sądej W., Przekwas K.:
Fluctuations in soil profile nitrogen levels under conditions of a long-term fertilization experiment (abstract). 141

Sheoran R.K., Neeru Narula, Behl R.K.:
Host genotype x Azotobacter strains interaction in elite hybrids of sunflower. 142

Smeyanovich A., Bosak V.:
Effectiveness of long term fertilization in cereal-tilled crop rotation on podzoluvisol soil. 146

Svoboda P., Mühlbachová G., Raimanová I.:
The stratification of the total carbon in the soil profil following the application of humates and oxyhumolites. 149

Šimon T.:
Long-term changes of soil organic matter in the fallow experiment with different fertilization and tillage. 157

Wachowska U., Głowacka K.:
Dynamics and structure of soil microbial communities of winter wheat treated with agrochemicals. 167

Wragge V., Ellmer F.:
Anaerobic digested residues as fertiliser in spring-wheat - effects on soil and crop. 180
