

Table of contents

INTRODUCTION	7
PART I: SYSTEMS THINKING AND SYSTEMS APPROACH	9
1 Systems approach – a theoretical introduction.....	10
1.1 Mechanistic approach	10
1.2 Systems approach.....	13
2 History of systems thinking.....	19
3 Systems thinking in practice.....	23
3.1 Systems thinking skills.....	23
3.2 Systems archetypes	27
3.3 The fifth discipline	39
PART II: SYSTEM	43
4 System definition.....	44
4.1 Examples of definitions	45
4.2 Definitions analysis and classifications	45
5 System identification	49
6 System elements and relations.....	53
6.1 Elements	53
6.2 Relations.....	54
6.3 Feedback	54
7 System structure	58
7.1 Structure representation	58
7.2 Structure types.....	60
8 System behaviour	63
9 Systems classifications	65
9.1 Boulding's classification.....	68
9.2 Miller's General Living Systems Theory	74
9.3 Subsystem vs. partial system	79
10 System attributes.....	82
10.1 Selected attributes	82
10.2 Isomorphism vs. homomorphism.....	83
PART III: SYSTEMS SCIENCES	87
11 Systems sciences – an overview.....	88
12 General systems theory.....	91
12.1 Basic ideas of GST.....	92
12.2 GST theories, laws and principles	95

13 Systems engineering	100
13.1 The nature of systems engineering	102
13.1.1 Definitions and Descriptions	105
13.1.2 Objectives of Systems Engineering	109
13.2 Systems engineering and the “look-alikes”	109
13.3 Systems engineering “strategies”	111
13.3.1 The waterfall strategy	112
13.3.2 The spiral strategy	114
13.3.3 The concurrent strategy	116
13.3.4 Chaos	117
13.4 Summary	118
14 Systems analysis	120
15 Cybernetics	123
15.1 Content of cybernetics	123
15.2 Historical development	125
16 Operational research	130
16.1 History of operational research	130
16.2 The nature of operational research	132
16.3 Operational research disciplines	134
17 Systems dynamics	139
GLOSSARY	143
18 A-G	144
19 H-P	155
20 R-Z	168
CONCLUSIONS	179
21 Summary	180
22 Information resources	181

Table of figures and tables

Figure 1: Metaphors for a mechanistic and systems approach.....	10
Figure 2: Graphical illustration of a system separation.....	13
Figure 3: Systems approach levels	15
Figure 4: Hierarchy levels and corresponding sciences	17
Figure 5: Hierarchical decomposition	18
Figure 6: Reinforcing loop.....	28
Figure 7: Balancing loop	28
Figure 8: Limits to growth – generic structure	29
Figure 9: Limits to growth – tennis ability example	29
Figure 10: Limits to growth – alternative structure.....	29
Figure 11: Fixes that fail.....	30
Figure 12: Shifting the burden – generic structure.....	31
Figure 13: Shifting the burden – examples.....	31
Figure 14: Eroding goals – generic structure	32
Figure 15: Eroding goals – examples	33
Figure 16: Success to the successful – generic structure.....	33
Figure 17: Success to the successful - examples	34
Figure 18: Escalation – generic structure	35
Figure 19: Escalation - examples.....	36
Figure 20: Tragedy of the commons – generic structure.....	37
Figure 21: Tragedy of the commons - overfishing.....	37
Figure 22: Tragedy of the commons – the market for farms commodities.....	38
Figure 23: The attractiveness principle	39
Figure 24: Process of system identification.....	51
Figure 25: Positive and negative feedback in a causal-loop diagram	56
Figure 26: Centrifugal generator	57
Figure 27: Real system	65
Figure 28: Conceptual system	65
Figure 29: Boulding’s hierarchy.....	70
Figure 30: Living systems	75
Figure 31: Subsystems and partial systems	81
Figure 32: Homomorphism.....	85
Figure 33: The shape of the systems movement	90
Figure 34: Systems sciences and major external influences	90

Figure 35: Archetypal systems engineering strategies	112
Figure 36: The waterfall strategy	113
Figure 37: The spiral strategy	115
Figure 38: Interface.....	121
Figure 39: Cybernetics and other science.....	124
Figure 40: Cybernetic abstraction.....	125
Figure 41: Queueing theory	137
Figure 42: Causal-loop diagram	140
Figure 43: Stocks and flows diagram	140
Figure 44: Virtual Hamlet – the structure.....	141
Figure 45: Virtual Hamlet – simulation1.....	141
Figure 46: Virtual Hamlet – simulation 2.....	142
Table 1: Typological analysis of definitions of a system.....	47
Table 2: The differences between “heap” and the “system”	50
Table 3: Boulding’s hierarchy	74
Table 4: Paradigm shift.....	88
