

FOREWORD .....	8
CHAPTER 1 FOOD MACHINERY DESIGN.....	9
1.1 General Requirements.....	9
1.2 Basic steps of food machinery design.....	9
1.2.1 Preparation of food machinery design.....	9
1.2.2 Planning design.....	10
1.2.3 Technical design.....	10
1.2.4 Evaluation.....	10
1.3 Technical design.....	10
1.3.1 Construction design.....	10
1.3.2 Calculations.....	11
1.3.3 Drawings.....	11
1.3.4 Instructions.....	11
1.4 Technological analysis of the food production process.....	11
1.4.1 Requirements of the technological process.....	12
1.4.2 Determination of the production process.....	12
1.4.2.1 Study of the food technology before design.....	12
1.4.2.2 Analysis of the food process.....	12
1.5 Food machinery control systems.....	13
1.5.1 Transmission coordinated control system.....	13
1.5.2 Time control system.....	13
1.5.3 Travel limit control system.....	13
1.5.4 Numerical program control system.....	14
1.6 Transmission systems design.....	14
CHAPTER 2 THE RAW MATERIAL AND THE PROCESS.....	16
2.1. Aspects of food raw materials.....	16
2.1.1 Suitability of Raw Material.....	16
2.1.2 Major Important Properties in the Selection of Food Raw Materials.....	16
2.1.2.4 Functional properties of food raw materials.....	18
2.1.2.5 Growth properties of raw material.....	19
2.1.2.6 Mechanisation and the raw material.....	20
CHAPTER 3 CLEANING OF RAW MATERIALS.....	23
3.1 The functions of cleaning.....	23
3.2 Contaminants in food raw material.....	24
3.3. Cleaning methods.....	25
3.3.1. Dry cleaning methods.....	25
3.2.1.4. Magnetic cleaning.....	28
3.2.2. Wet cleaning methods.....	28
3.2.2.1. Soaking.....	28
3.2.2.2. Spray washing.....	29
3.2.2.4. Ultrasonic cleaning.....	30
3.2.2.5. Dewatering.....	31
CHAPTER 4 SORTING AND GRADING.....	32
4.1 Sorting.....	32

4.1.1 Shape and size sorting.....	32
4.1.1.1 Fixed aperture screens.....	33
4.2.1.2 Variable-aperture screens.....	35
4.2.1.3 Image processing.....	35
4.2.2 Colour sorting.....	35
4.2 Grading.....	39
4.3 Peeling.....	39
4.3.1 Flash steam peeling.....	39
4.3.2 Knife peeling.....	40
4.3.3 Abrasion peeling.....	40
4.3.4 Caustic peeling.....	40
4.3.5 Flame peeling.....	40
CHAPTER 5 SIZE REDUCTION.....	41
5.1 Size reduction of solid foods.....	41
5.1.1 Theory.....	41
5.1.2 Equipment.....	44
5.1.2.1 Size reduction of fibrous foods.....	44
5.1.2.2 Size reduction of dry foods.....	46
5.1.3 Effect on food.....	48
5.1.3.1 Sensory characteristics.....	50
5.1.3.2 Nutritive value.....	50
5.2 Size reduction in liquid foods (Emulsification and Homogenisation).....	50
5.2.1 Theory.....	50
5.2.2 Equipment.....	52
5.2.3 Effect on foods.....	54
CHAPTER 6 MIXING.....	57
6.1 Introduction.....	57
6.2 Important points to consider when designing a mixer.....	57
6.2.1 Viscosity of industrial materials.....	58
6.3 Equipment.....	58
6.3.1 Types of Mechanically agitated vessels.....	58
6.3.2. Mixers for Liquids of low or moderate viscosity.....	59
6.3.2.1. Paddle agitators.....	60
6.3.2.3. Propeller agitators.....	61
6.3.2.5 Mixing vessels.....	62
6.3.2.6. Power requirements for low viscosity liquid mixing systems.....	63
6.3.3 Mixers for high viscosity pastes and plastic.....	63
6.3.3.1. Pan mixers.....	63
6.3.3.4. Other devices.....	65
6.3.3.5. Power requirements for higher viscosity liquid systems.....	65
6.3.4. Mixers for dry solids.....	66
6.3.4.1. Tumbler mixers.....	66
6.3.4.2. Horizontal trough mixers.....	66
6.3.5. Applications for mixing equipment in the food industry.....	67
6.3.5.1. Low viscosity fluids.....	67

CHAPTER 7 MECHANICAL SEPARATIONS.....	68
7.1 Centrifugation .....	68
7.1.1 Theory .....	68
7.1.2 Equipment .....	70
7.2 Filtration.....	73
7.2.1 Introduction.....	73
7.2.2 General theory.....	74
7.2.3 Washing the cake .....	74
7.2.4 Filter media .....	75
7.2.5 Filtration equipment - principle, design features and general applications. ....	75
7.2.5.1 Pressure filters.....	75
7.2.6 Application for filtration equipment in the food industry.....	78
7.2.6.1 General solid/liquid separation.....	78
7.2.5.2 Clarification by filtration.....	78
7.2.5.3 Removal of micro-organisms by filtration.....	78
CHAPTER 8 SOLID-LIQUID EXTRACTION AND EXPRESSION .....	79
8.1 Solid-Liquid extraction (Leaching, Washing) .....	79
8.1.2 Rate of extraction.....	79
8.1.3 Extraction equipment – principles, design, features and general applications .....	80
8.1.3.1 Single stage extractors.....	80
8.1.3.2 Complete extraction plants.....	81
8.1.4 Application for solid – liquid in the food industry.....	81
8.1.4.1 Extraction of sugar from sugar beet.....	81
8.1.4.2 Extraction of edible oil.....	81
8.1.4.4 Manufacture of instant tea.....	83
8.2 Expression.....	83
8.2.1 Expression equipment.....	84
8.2.1.1 Hydraulic pressing.....	84
8.2.3 Applications .....	87
CHAPTER 9 HEAT PROCESSING .....	88
9.1. Evaporation .....	88
9.1.1 Theory .....	88
9.1.1.1 Heat and mass transfer.....	88
9.1.1.2 Factors influencing the rate of heat transfer.....	89
9.1.1.3 Factors influencing the economics of evaporation.....	90
9.1.2 Equipment .....	90
9.1.3 Natural circulation evaporators.....	91
9.2.2 Forced circulation evaporator with external calandria.....	92
9.2.3 Long tube evaporator .....	93
9.2.3.1 Climbing film evaporator.....	93
9.2.3.2 Falling film evaporator.....	93
9.2.3.2 Climbing-falling film evaporator.....	93
9.2.4 Expanding flow evaporator.....	94
9.2.5 Low temperature evaporators – heat pump or refrigeration cycle evaporators .....	94
9.2 Extrusion.....	95
9.2.1 The main purpose of extrusion .....	95
9.2.2 Theory.....	95

9.2.3 Equipment .....	96
9.2.3.2 Cold extrusion .....	97
9.2.4 Applications .....	98
9.2.4.1 Cereal products .....	98
9.2.4.2 Protein-based foods .....	98
9.2.4.3 Confectionery products .....	98
CHAPTER 10 HEAT STERILISATION .....	100
10.1 In container sterilisation .....	100
10.1.1 Theory .....	100
10.1.1.1 Rate of heat penetration .....	100
10.1.2 Equipment .....	105
10.2 Ultrahigh – Temperature Processes .....	107
10.2.1 Theory .....	107
10.2.2 Processing .....	107
10.2.3 Equipment .....	108
10.2.3.3 Tubular heat exchangers .....	110
10.2.3.4 Scraped-surface heat exchangers .....	112
10.2.3.5 Jupiter double-cone heat exchanger .....	112
CHAPTER 11 PASTEURISATION .....	113
11.1 Theory .....	113
11.2 Equipment .....	113
11.2.1 Pasteurisation of packaged foods .....	113
11.2.2 Pasteurisation of unpackaged liquids .....	114
CHAPTER 12 FREEZING .....	119
12.1 Theory .....	119
12.1.1 Ice crystal formation .....	120
12.1.2 Solute concentration .....	121
12.1.3 Volume changes .....	122
12.3. Freezing equipment .....	122
12.3.2. Freezing by contact with a cooled liquid .....	124
12.3.3. Freezing by contact with a cooled gas .....	124
12.3.4. Two-phase freezing systems .....	127
12.4 Thawing .....	129
12.4.1 Equipment for thawing .....	130
CHAPTER 13. PACKAGING .....	131
13.1. General principles .....	131
13.2 Filling, closing and sealing equipment .....	131
13.2.1 Filling Equipment .....	131
13.3.2. Closing equipment .....	135
13.3.3. Heat sealing equipment .....	136
13.3.4. Form, fill and seal systems (FFS) .....	137
13.3.5. Aseptic filling .....	139
ANNEX .....	142
REFERENCES .....	147
