2.	BASIC TERMS	6
3.	LIST OF FIGURES	8
4.	BASIC FUNCTIONS OF BANKSIDE TREES AND SHRUBS	9
4.1	Erosion and Abrasion Control Functions	9
4.2	Anti-deflationary Function	10
4.3	Protective Function	10
4.4	Water Quality Function	11
4.5	Function of a Refuge for Fauna living near waters	12
4.6	Aesthetic Function	13
4.7	Productive Function	14
4.8	Function of Creating a Natural Bio-corridor	14
4.9	Recreational Function	14
4.10	Sanitary Function	15
5.	ASSESSMENT OF THE CURRENT CONDITION OF RIPARIAN AND ACCOMPANYING STANDS	16
5.1	Method of Assessment of the Condition of Trees and Shrubs	16
6.	PRE-DESIGN OF THE BANKSIDE VEGETATION	19
6.1	Generally Valid Recommendations for a Suitable Design of Accompanying Vegetation	20
6.2	Spatial Arrangement of Bankside Trees and Shrubs:	22
6.3	Species Composition of Stands	25
6.4	Use of Accompanying Vegetation on Waterways	26
6.5	Use of Self-Seeding Species and Naturally Spreading Vegetation	28
6.6	Grassland	31
6.6.1	Establishment of Grassland	31
6.7	Final Recommendations	34
	SELECTION CRITERIA FOR THE DESIGN OF DECIDUOUS SPECIES	37
	SELECTION CRITERIA FOR THE DESIGN OF CONIFEROUS SPECIES	43
	Description of deciduous species – additional characteristics	46
	Description of coniferous species – additional characteristics	106
	7.Used and Related Bibliography	128
