|--|-----|
| Introduction | 2 |
| I. Linear algebra | 4 |
| I.1. Vector spaces | 4 |
| I.2. Matrices and determinants | 9 |
| I.3. Systems of linear algebraic equations | 17 |
| I.4.* Linear mapping of \mathbb{R}^n into \mathbb{R}^m | 21 |
| I.5. Eigenvalues and eigenfunctions of square matrices | 26 |
| I.6. Survey of equivalent properties of a square matrix | 29 |
| II. Analytic geometry in \mathbb{E}_3 | 30 |
| II.1. Some basic notions | 30 |
| II.2. Straight lines in \mathbb{E}_3 | 32 |
| II.3. Planes in \mathbb{E}_3 | 35 |
| II.4.* Quadric surfaces in \mathbb{E}_3 | 39 |
| III. Differential calculus | 46 |
| III.1. Sequences of real numbers | 47 |
| III.2. Functions – basic notions | 51 |
| III.3. Limits and continuity of a function | 56 |
| III.4. Derivative of a function | 62 |
| III.5. Applications of derivatives, behavior of a function | 69 |
| III.6. The osculating circle, Taylor's theorem | 80 |
| III.7. Parametric representation of functions | 83 |
| III.8. Approximate solution of a nonlinear equation $f(x) = 0$ | 86 |
| III.9. Complex and vector-valued functions of a real variable | 90 |
| IV. Indefinite integral | 92 |
| IV.1. Antiderivative, indefinite integral | 92 |
| IV.2. Integration by parts | 95 |
| IV.3. Integration by substitution | 97 |
| IV.4. Integration of simple rational functions | 100 |
| IV.5. Integration of functions of the type $\sin^n x \cdot \cos^m x$ | 106 |
| IV.6. Integration of some other types of functions | 107 |
| IV.7. Separable differential equations | 111 |
| V. Definite (Riemann's) integral | 116 |
| V.1. Historical approach | 116 |
| V.2. Definition of the Riemann integral | 119 |
| V.3. Important properties of the Riemann integral | 122 |
| V.4. Evaluation of the Riemann integral | 125 |
| V.5. Numerical integration | 127 |
| V.6. The improper integral | 129 |
| V.7. Some geometrical and physical applications of the definite integral ... | 132 |
| Bibliography | 134 |
| Index + Vocabulary | 135 |
| List of selected symbols | 141 |
