

# Contents

Preface .....	7
<b>1. Introduction</b> .....	<b>9</b>
<b>2. The basement and its cover</b> .....	<b>13</b>
<b>3. Basement: Variscan orogen</b> .....	<b>27</b>
3.1. Mid-German Crystalline Belt .....	27
3.2. Saxo-Thuringian Belt (Saxothuringicum) .....	29
3.3. The Mariánské Lázně Suture Belt .....	44
3.4. The Barrandian-Armorican Belt .....	46
3.4.1. The Bohemium (the Teplá-Barrandian Unit) .....	47
3.4.2. The Erbendorf-Vohenstrauß Unit (ZEV) .....	61
3.5. The Moldanubicum (Moldanubian Belt) .....	63
3.6. The Lügicum .....	73
3.6.1. The Lusatian-Kłodzko Belt .....	74
3.6.2. Units of Saxo-Thuringian and Bavarian character .....	81
3.6.3. The Kłodzko Unit .....	88
3.6.4. The Sowie Góry Unit (Sowie Góry Block, Sowie Góry Mountains) and its associated units .....	88
3.6.5. The mosaic of blocks south of the Lusatian-Kłodzko Belt .....	93
3.7. The Northeastern marginal units .....	95
3.8. The Danube-Odra Suture Belt .....	96
3.9. The Moravian-Silesian Belt (Moravosilesicum) .....	99
3.10. The belt of Carboniferous flysch nappes .....	111
<b>4. Basement: Foreland – the Brunnia</b> .....	<b>115</b>
<b>5. Characteristics of the Paleozoic faunas and depositional systems</b> ( <i>J. Hladil, J. Cháb, eds</i> ) .....	<b>121</b>
5.1. Cambrian ( <i>O. Fatka, J. Hladil</i> ) .....	121
5.2. Ordovician ( <i>P. Štorch, J. Hladil</i> ) .....	123
5.3. Silurian ( <i>P. Štorch</i> ) .....	126
5.4. Devonian ( <i>J. Hladil</i> ) .....	131
5.5. Lower Carboniferous to the end of the Viséan ( <i>J. Hladil, J. Kalvoda, J. Zapletal</i> ) .....	142
5.6. The youngest Lower Carboniferous, Lower Namurian, Serpukhovian ( <i>J. Zajíc, Z. Vašíček, J. Hladil</i> ) .....	147

<b>6. Syn-orogenic and post-orogenic basins</b> .....	148
6.1. The foreland basin .....	149
6.2. Lower Carboniferous (Mississippian) basins of the interior of the orogen .....	154
6.3. Westphalian basins of the interior of the orogen .....	159
6.4. The youngest basin fills: late Stephanian and Permian .....	166
<b>7. The Devonian floral prologue and floras and faunas of the Carboniferous and Permian basins (Z. Šimůnek, J. Zajíč)</b> .....	171
7.1. Floras (Z. Šimůnek) .....	171
7.1.1. Devonian .....	171
7.1.2. Viséan .....	172
7.1.3. The Viséan/Namurian transition .....	172
7.1.4. The Lower Namurian (Serpukhovian) paralic succession, Ostrava Formation .....	173
7.1.5. Terrestrial plants of the Namurian and early Westphalian .....	173
7.1.6. Upper Westphalian (Bolsovian and Westphalian D) .....	175
7.1.7. Stephanian: From Cantabrian to the hiatus between Stephanian B and C .....	177
7.1.8. Stephanian C .....	178
7.1.9. Autunian .....	180
7.2. Fauna (J. Zajíč, Z. Vašíček) .....	181
7.2.1. Upper Carboniferous, Pennsylvanian (J. Zajíč, Z. Vašíček) .....	181
7.2.2. Permian (J. Zajíč) .....	183
<b>8. Variscan and early post-Variscan intrusions (J. Cháb, K. Breiter)</b> .....	187
8.1. Volcano-plutonic front .....	188
8.2. Intrusions in the hinterland of the volcano-plutonic front .....	202
8.2.1. Intrusions of the Danube-Šumava (Böhmerwald) branch of the Moldanubian Plutonic Complex, extending from the Danube River valley to the Šumava Mountains ridge .....	203
8.2.2. Intrusions of the interior and boundaries of the Bohemicum ..	205
8.3. Hyperpotassic intrusions in the Moldanubicum (durbachites) .....	210
8.4. Pegmatites .....	211
8.5. Late intrusions .....	212
<b>9. Paleozoic of the post-Variscan platform in the Bohemian Massif and its environs: Upper Permian (J. Cháb, J. Zajíč)</b> .....	215
<b>10. Provenance, drift, and collision</b> .....	217
<b>References</b> .....	235
