

## CONTENTS

|  |    |
|--|----|
| Proposed modifications to flood prevention systems and evaluation of flood damage to property, life and health of affected region residents<br><i>Karel Drbal, Ladislav Pavlovský, Evžen Polenka, Miloš Rozkošný</i> | 5  |
| Assessment of microbial contamination of surface waters<br><i>Dana Baudišová, Vladimír Hejtmánek</i>   | 31 |
| An overall assessment of phosphorus and nitrogen emissions into surface waters<br><i>Marie Kalinová</i>  | 39 |
| Impact of Temelín nuclear power plant waste water on tritium concentration in the Vltava and Elbe Rivers<br><i>Eduard Hanslík, Diana Ivanovová, Eva Juranová, Pavel Šimonek</i>                                      | 47 |
| A comparison of phytobenthos and zoobenthos abilities to predict ecological status in rivers<br><i>Milena Forejtníková, Jiří Heteša, Petr Marvan</i>   | 61 |
| Half a century of monitoring czech-austrian transboundary water bodies<br><i>Eva Kočková, Hana Mlejnková, Zdeňka Žáková</i>  | 71 |
| Assessment of pesticide substances in surface water in the Morava River basin<br><i>Danuše Beránková, Milena Forejtníková, Jitka Vejvodová</i>   | 77 |
| A comparison of the organic pollutant load of the Odra and Moravice rivers by means of passive sampling using semipermeable membranes<br><i>Jiří Šajer</i>   | 85 |
| Monitoring of wetland localities along the Dyje River floodplain – a part of the “Projekt Morava” research project<br><i>Miloš Rozkošný, Jiří Heteša, Petr Marvan</i>  | 93 |

Winter operation of waste stabilisation ponds

*Lada Felberová*

103

Production and utilisation of sewage sludge from waste water treatment plants

*Marie Michalová*
