PREFACE	5
STOCHASTIC EQUATIONS AND STOCHASTIC METHODS IN PARTIAL DIFFERENTIAL EQUATIONS <i>Bohdan Maslowski</i>	7
1 Introduction	9
2 A crash course in probability theory: Basic notions and results	11
3 Brownian motion	16
3.1 Historical remarks and heuristics	16
3.2 Basic properties	21
4 Stochastic integration	24
5 Stochastic differential equations: Basic results	33
6 The Markov property and relation to PDE's	39
7 Stochastic equations in infinite dimensions	47
7.1 Gaussian measures and OU processes	48
7.2 Semilinear stochastic PDE's and Kolmogorov equations in Hilbert spaces	55
References	60
INVITATION TO MATHEMATICAL CONTROL THEORY <i>Jaroslav Milota</i>	63
Introduction	65
1 Linear theory	67
1.1 What Is a Linear System	67
1.2 Basic Control Problems — Finite Dimensional Case	72
1.3 Basic Control Problems — Infinite Dimensional Case	78
1.4 Stabilizability in Infinite Dimensions	82
1.5 Stability in Frequency Domain	86
1.6 Optimal Control — Finite Horizon	91
1.7 Optimal Control — Infinite Horizon	96

<b>2 Nonlinear Theory</b>	<b>99</b>
2.1 Controllability for Linear Systems with Constraints . . . . .	99
2.2 Controllability and Stabilizability of Nonlinear Systems . . . . .	103
2.3 Pontryagin Maximum Principle . . . . .	108
2.4 Hamilton-Jacobi-Bellman Equation . . . . .	112
<b>References</b>	<b>115</b>

1	Introduction	9
2	A crash course in probability theory: Basic notions and results	11
3	Brownian motion	16
3.1	Historical remarks and motivation	16
3.2	Basic properties	21
4	Stochastic integration	24
5	Stochastic differential equations: Basic results	33
6	The Markov property and relation to PDE's	39
7	Stochastic equations in infinite dimensions	47
7.1	Gaussian measures and OU processes	48
7.2	Semilinear stochastic PDE's and Kolmogorov equations in Hilbert spaces	57
8	References	60
9	INVITATION TO MATHEMATICAL CONTROL THEORY	63
10	Introduction	65
11	Linear theory	67
11.1	What is a Linear System . . . . .	67
11.2	Basic Control Problems — Finite Dimensional Case	73
11.3	Basic Control Problems — Infinite Dimensional Case	78
11.4	Stabilizability in Infinite Dimensions . . . . .	83
11.5	Stability in Frequency Domain . . . . .	86
11.6	Optimal Control — Finite Horizon . . . . .	91
11.7	Optimal Control — Infinite Horizon . . . . .	96
