

CONTENTS

1. INTRODUCTION	11
2. ELECTRIC POWER SYSTEM	13
2.1. CHARACTERISTICS OF THE ELECTRIC POWER SYSTEM	13
2.2. ENSURING REQUIRED QUALITY OF ELECTRICITY	14
2.3. SECURITY OF SUPPLY	16
2.4. ELECTRIC SYSTEM POWER CONTROL	20
2.5. ELECTRIC POWER SYSTEM OF THE CZECH REPUBLIC	22
2.6. ORGANISATIONAL STRUCTURE OF THE EPS	24
2.6.1. <i>Vertically-Integrated System</i>	24
2.6.2. <i>Liberalisation of the Power Electricity Industry</i>	25
2.6.3. <i>The Electricity Market at Present</i>	27
2.7. BASIC ENERGY LEGISLATION DOCUMENTS	29
2.7.1. <i>Basic Energy Legislation Documents in the EU</i>	29
2.7.2. <i>Energy Industry Legislation in the Czech Republic</i>	31
2.8. DESCRIPTION OF MAJOR FAILURES AND EXTRAORDINARY SITUATIONS, PREVENTION OF MAJOR OUTAGES	34
2.8.1. <i>Proverbial Black-Outs</i>	34
2.8.2. <i>Results of Analyses</i>	43
2.8.3. <i>Exchanges of Electricity in Europe</i>	48
2.8.4. <i>Legislative Acts for Emergency Plans and States Solving in the Czech Republic</i>	50
2.8.5. <i>Example of Using the Distributed Generators for Power Plants Black-Start-Up</i>	53
2.9. REFERENCES	57
3. BASIC THEORY OF RELIABILITY OF THE NON RESTORABLE OBJECTS..	59
3.1. TERMS OF RELIABILITY	60
3.2. SORT OF THE FAILURES	61
3.3. INDICATORS OF THE FAILURE – FREE OPERATION	62
3.4. MEANING OF INDICATORS OF THE FAILURE – FREE OPERATION	64
3.5. PARAMETERS ESTIMATION OF DISTRIBUTION LAW	66
3.6. RELIABILITY OF THE SYSTEM	67
3.6.1. <i>Series System</i>	68
3.6.2. <i>Parallel System</i>	69
3.6.3. <i>Combined Systems</i>	69
3.6.4. <i>Examples for Estimation of Failure – Free Operation Systems Which Structure Isn't Able to Transfer for Series – Parallel Combination</i>	71
3.7. FOUNDATIONS OF THEORY RELIABILITY OF RECOVERY ELEMENTS	78
3.8. MARKOV MODELS	85
3.8.1. <i>Markov Chains</i>	86
3.8.2. <i>Markov's Processes</i>	89
3.9. RELIABILITY OF THE ELECTRICAL STATIONS AND ELECTRICAL NETWORKS	104
3.9.1. <i>Determine the Reliability of the Electrical Stations and Simple Electrical Networks</i>	106

3.9.2.	<i>Determine the Reliability Operation of the Complicated Networks at the Electrical System (ES)</i>	113
3.10.	REFERENCES	130
4.	POWER QUALITY	133
4.1.	INTEREST IN POWER QUALITY	133
4.2.	DEFINITION OF POWER QUALITY	134
4.3.	OVERVIEW OF POWER QUALITY PHENOMENA	136
4.3.1.	<i>Variations</i>	136
4.3.2.	<i>Events</i>	139
4.4.	POWER QUALITY STANDARDS AND REGULATION	142
4.4.1.	<i>Electromagnetic Compatibility (EMC)</i>	142
4.4.2.	<i>Voltage Characteristics (EN 50160)</i>	145
4.4.3.	<i>Power Quality Monitoring</i>	148
4.4.4.	<i>Power Quality Regulation</i>	148
4.5.	VOLTAGE DIPS	150
4.5.1.	<i>Definition, Characterisation and Indices</i>	150
4.5.2.	<i>Effects on Sensitive Equipment</i>	153
4.5.3.	<i>Mitigation</i>	154
4.6.	VOLTAGE FLUCTUATIONS (VOLTAGE FLICKER)	156
4.6.1.	<i>Definition and Causes of Voltage Fluctuations</i>	156
4.6.2.	<i>Effects of Voltage Fluctuations</i>	157
4.6.3.	<i>Characteristics of Voltage Fluctuations</i>	158
4.6.4.	<i>Propagation of Voltage Fluctuations</i>	159
4.6.5.	<i>Mitigation of Voltage Fluctuations in Power Systems</i>	160
4.7.	HARMONICS	161
4.7.1.	<i>Origin of Voltage Harmonic Distortion</i>	162
4.7.2.	<i>Resonances in Power Systems</i>	163
4.7.3.	<i>Power System Quantities under Nonsinusoidal Conditions</i>	165
4.7.4.	<i>Harmonic Phase Sequences</i>	167
4.7.5.	<i>Sources of Harmonics</i>	168
4.7.6.	<i>Effects of Harmonics</i>	168
4.7.7.	<i>Mitigation of Harmonics</i>	169
4.8.	REFERENCES	171
