1 Introduction: China's biophysical foundations

My Chinese experience 1  
Challenge of understanding 4  
Interdisciplinary perspective 7

9

2 Energy

Half a century of advances 9  
The continuing importance of traditional energy 27  
A failed strategy 42  
From a new South Africa to concerns about oil security 52  
A remarkable shift in energy interests 60

72

3 Food

The world's greatest famine 73  
From subsistence to surplus 87  
Dietary transitions 92  
Nitrogen in China's agriculture 109  
Can China feed itself? 120

141

4 Environment

Attitudes and constraints 142  
The first of the five elements 152  
China's environment and security 168  
The cost of China's environmental change 178  
Meteorologists and China's environment 186
