H.SKOLIMOWSKI: INTRODUCTION / 11

O. A. FUNDA: TOLLE LEGE (TAKE AND READ...) / 17

WE ARE NO LONGER HUNTERS AND GATHERERS / 25

1. FROM ONTOLOGY TO POLITICS / 35

*The independence of traditional politics from ontology.
The crisis of the anthropocentric concept of the world.
The supremacy of ontology vis-a-vis values and
morality. The twilight of the consoling function of
philosophy. Evolutionary ontology and ecological
politics. Outline of an evolutionary ontology.*

2. THE UNIQUENESS OF TERRESTRIAL NATURE / 57

*Universal nature and terrestrial nature. The new geo-
centrism. Evolutionary memory of living systems. Ge-
netic information - "the spiritual culture" of the biosphere.
Information value of nature. The mutual opposition
of natural and cultural structures.*

3. THE THREATENED CULTURE / 79

Anthropocentric and systemic concept of culture. Culture - an opposition and burden to the biosphere. Evolutionary and ontological concept of culture. Spiritual culture - "genome" of the system of culture. The threat to culture through the weakened biosphere. Strategies for the salvation of culture.

4. ECOLOGICAL PHENOMENON OF TECHNOLOGY / 99

Biotic and abiotic technology. Ecological aspect of technology. Technological "genotype" and technological "phenotype". Expansion of technology and of the technosphere. Technology as both a threat and a solution to the crisis. The role of the intelligentsia in the field of science and technology.

5. THE CONFLICT BETWEEN THE BIOSPHERE AND THE TECHNOSPHERE / 121

Biosphere - the smallest autonomous living system. Similarities and differences in the evolution of life and of technology. The co-existence of the instrumental and mechanical technosphere. Opposition and reconciliation of the biosphere with the technosphere. Ecological politics and the spontaneous evolution of technology.

6. MAN, CULTURE AND NATURE / 143

Biological stability of Man. Growth of culture without a change of human nature. Ecological transformation as a change of the internal information of a system of culture. Nature - a neglected factor in the shaping of Man. The precedence of Man's naturalization over his socialization and individualization.

7. ECOLOGICAL ETHICS AND POLITICS / 167

The ecological crisis as a crisis of the evolutionary success of culture. Traditional morality is immoral. Traditional politics approves of the devastation of the earth. The risk inherent in strong integration. Reduction of pressure and a weak integration - the salvation of threatened culture.
