FOREWORD	5
1. FUNDAMENTALS OF IMMUNOCHEMISTRY	7
1.1 BRIEF HISTORY	7
1.1.1. The roots of the basic principles	7
1.1.2. Birth of the science of immunology towards the end of the 19th century	7
1.1.3. The first serological tools	8
1.1.4. Other major advances in immunochemical techniques	8
1.2. ANTIGENS AND ANTIBODIES: DEFINITIONS, STRUCTURES, FUNCTIONS AND INTERACTIONS	10
1.2.1 Antigen and haptens	11
1.2.1.1. Antigens	11
1.2.1.2. Epitopes or antigenic determinants	11
1.2.1.3. Haptens	11
1.2.2. Antibodies	12
1.2.2.1. Structural and functional properties of antibodies	13
1.2.2.2. Paratopes or antibody sites	14
1.2.3. Antigen-antibody reaction	14
1.2.3.1. In vivo actions of antibodies	14
1.2.3.2. Characteristics of antigen-antibody interactions	15
1.2.3.3. Cross-reaction	15
1.2.3.4. Secondary effects of antigen-antibody complex formation	17
1.3. CELLULAR AND MOLECULAR BASIS OF ANTIBODY PRODUCTION	17
1.3.1. Role of B and T lymphocytes in antibody production	17
1.3.2. Cellular mechanisms of antibody production	17
1.3.3. Organisation of the genes coding for the variable regions of heavy and light chains	21
1.3.4. Remarks on a few mechanisms contributing to prevention of the formation of antibodies specific to self antigens and involved in the „tuning“ of antibody specificity	23
1.4. MAIN TYPES OF ANTIBODIES USED IN IMMUNOCHEMICAL TECHNIQUES, PRINCIPLE OF THEIR PREPARATION	24
1.4.1. Polyclonal antibodies	24
1.4.2. Monoclonal antibodies	28
1.4.3. Recombinant antibodies	29
1.4.4. Other types of antibodies	31
1.4.5. How antibodies are used in immunochemical techniques	32
2. PRINCIPLES OF IMMUNOCHEMICAL TECHNIQUES	33
2.1. ANALYTICAL TECHNIQUES BASED ON THE PRIMARY REACTION BETWEEN ANTIGENS AND ANTIBODIES	34
2.1.1. Liquid and solid phase techniques, direct and indirect detections	34
2.1.2. Immunofluorescence techniques	34
2.1.2.1. Immunohistology	35
2.1.2.2. Other applications of immunofluorescence	36

2.1.3. Radioimmunoassay	37
2.1.3.1. Titration in liquid phase	37
2.1.3.2. Titration in solid phase	39
2.1.4. Immunoenzymatic techniques	39
2.1.4.1. Titration in liquid phase	39
2.1.4.2. Titration and identification in solid phase	42
2.2. APPLICATION OF THE REVERSIBILITY OF THE ANTIGEN-ANTIBODY COMPLEX FORMATION	55
2.2.1. Immunoaffinity chromatography	55
2.3. APPLICATION OF A SECONDARY EFFECT RESULTING FROM ANTIGEN-ANTIBODY COMPLEX FORMATION	57
2.3.1. Immunoprecipitation	57
2.3.1.1. Immunoprecipitation in liquid phase	57
2.3.1.2. Immunoprecipitation in gel	59
2.3.2. Immunoagglutination	62
2.3.2.1. Direct immunoagglutination	62
2.3.2.2. Passive immunoagglutination	62
2.3.2.3. Immunoagglutination inhibition	62
2.3.2.4. Direct visualisation, turbidimetry, nephelometry	62
2.3.3. Complement fixation	64
3. APPLICATION OF IMMUNOCHEMICAL METHODS TO MEDICAL DIAGNOSIS, FOOD QUALITY CONTROL AND ENVIRONMENTAL TESTING	66
3.1. MEDICAL ANALYSIS	66
3.1.1. Areas of application	66
3.1.2. Immunochemical techniques used in medical analysis	66
3.1.3. Trends	70
3.2. FOOD ANALYSIS	70
3.2.1. Areas of application	70
3.2.2. Immunochemical techniques used in food analysis	73
3.2.3. Trends	75
3.3. ENVIRONMENTAL TESTING	76
3.3.1. Areas of investigation	76
3.3.2. Immunochemical techniques used and trends	77
RECOMMENDED BOOKS	78
GLOSSARY	79
LITERATURE	83
